## The KEYSTONE

Percussion Core Drill Attachment  
is an economical appliance for  
**TESTING COAL LANDS.**

It can be used in connection with any good "churn" drill, but  
operates best on the long stroke KEYSTONE, thus making the  
cheapest and quickest method of boring to be found.

In operation a hole is sunk to the coal with the ordinary Rock  
Bit. The Bit and Stem are then removed and the Coring Attach-  
ment put on in their place. It takes a 4 ft. core out of the Soft-  
est as well as the Hardest part of the vein. Avoids all delay and  
expensive of "red" water wash, diamonds, shot, and heavy operat-  
ing mechanism.

Price of Complete Attachment  
**\$200.00**

Catalog No. 2 B. is a book on the subject.  
We make Water, Oil & Test Well Drillers  
for all depths and purposes.

**Keystone Driller Co. Beaver Falls, Pa.**

### ONE MAN'S VIEW.

A well-known min-  
ing man recently fin-  
ished an inspection of  
the ANTHRACITE coal  
fields of Pennsylvania. When asked  
what impressed him most, he  
said—

"The acidity of the water, and the fact that  
of all the pumps I saw there two out of three  
were Jeannesville Pumps."

An indication at least that we know how  
to handle the acid water problem.

When you send us the lift and quantity of  
water and the available power, we will send  
you complete information about what we can  
do for you.

Our bulletin No. 8, fresh from the printer,  
is full of up-to-date information. Write for  
it now before you forget.

**Jeannesville  
Iron Works Co.,  
Hazleton, Pa.**
