Spring Purity

To brew good ale pure, hard
water is an absolute necessity.

The solvent powers of water
are so great that few springs
produce water pure enough for
brewing.

Carling's springs were discovered
after many years of searching, and the
brewery established only when Government
analysts deposed that the water never tested
less than 99.08 degrees pure.

Ask for Carling's Ale—accept no other,
because no other is quite so good.

Carling's Ale

The Ale that's Always Pure
