Wettlaufer Heart Shape Mixer making Hydro Electric Poles at plant on Spadina Road.

Competition cannot touch you if you use Wettlaufer Heart Shaped Mixers

Every batch off the drum will be on time and right. It delivers as fast as fed and assures absolutely accurate and uniform concrete. If you use Wettlaufer Improved Heart Shaped Mixers you can contract for and completely finish several times the amount of work you are now doing in one season.

Accompanying illustration shows our mixer turning out 250 Hydro Electric poles a day. This mixer has been in constant operation for over one year. It shows no sign of mechanical wear and tear and is as good at the present time as the day it was put on the job, and has made fourteen thousand poles.
