## EMBARGO-ON NURSERY STOCK FROM CANADA IS AMENDED BY U.S.

Entry of Product of Canadian Nurseries into United States is Now Permitted

### PROVISION A BENEFIT

The following announcement is made by the Department of Agriculture :-

Considerable apprehension has been felt by many Canadian nurserymen and florists on account of Quarantine No. 37 of the Federal Horticultural Board, United States Department of Agriculture, which went into effect on June 1, 1919. According to the regulations issued under this quarantine, Canadian nurserymen and florists were prohibited from exporting to the United States practically all kinds of nursery stock with the exception of certain bulbs, seeds, stocks, cuttings, scions, and buds of fruits for propagation. No exception was made, however, for ornamental trees and shrubs grown in Canadia. An amendment to these regulations was passed last March which permitted the importation into the United States "In limited quantities" of nursery stock and other plants and seeds "for the purpose of keeping the country supplied with new varieties and necessary propagating stock." As the amendment definitely stated that stock other than that listed as being permissible to import could only be shipped into the United States in limited quanties, and as this quarantine would undoubtedly prove to be a hardship on our nurserymen and florists, the Department of Agriculture with a view to securing an amendment to the quarantine that would permit the entry of native-grown Canadian nursery stock into the United States.

We are pleased to say that our recommendations have been accepted in the friendly and co-operative spirit that was anticipated and as a result the following Amendment No. 3 to Quarantine 37 was passed on August 16:—

"Regulation 15. Permits for the Importation of Otherwise Prohibited Stock from Foreign Countries Contiguous to the United States.

"When it is deemed by the Secretary of Agriculture that the importation from countries contiguous to the United States of nursery stock and other plants and seeds of nursery stock and other plants and seeds which can be considered as peculiar to such contiguous countries, and not mer reproductions of imported stock from foreign countries, and other plants and seeds proposed
