Calmar Orthopaedics Incorporated is dedicated to the rehabilitation of the physically challenged. The company provides professional services ranging from clinical consultation to the manufacture and fitting of the appropriate device to assist clients/patients achieve their maximum potential. Cervical, lumbosacral, knee, ankle, foot orthoses, extra-depth & orthopaedic footwear, to conventional, myo-electric and the state-of-the-art endolite prostheses are some of the devices supplied by Calmar for adults and children. The company is currently developing a unique device to replace the wheelchair that will revolutionize sports for the disabled. The device is being designed to encompass a multi-purpose usage; being lightweight, portable and at a low cost to ensure its availability for all.

Calmar Orthopaedics Incorporated has a pool of extremely experienced personnel in the field of prosthetics and orthotics that enables the research and development to be pursued very effectively. The facility has the capability to produce entire devices thus achieving a 75 percent Canadian content in its products.

While Calmar Orthopaedics is interested in pursuing and developing services worldwide, the United States, Caribbean Islands, U.S.S.R., Middle East and Pakistan have been identified as priority markets. Advice regarding agents/distributors in these markets would be appreciated. The company would also entertain licensing arrangements/joint ventures with overseas companies seeking to broaden their services/product lines. The company would like to participate in one Eastern European/U.S.S.R. and one Middle Eastern-Pakistan trade show.
