In a number of cases the amounts of pensions paid by C.N.R. does not represent the total pensions payable to employees for railway service. Pensions payable by the C.N.R. to international employees (service in both Canada and the United States) relate to their service in Canada only. Such employees also receive annuities payable under the U.S. railroad retirement act or the social security act for service performed in the United States. For example, in the group receiving pensions of under \$25 from the C.N.R., there are over 65 former international employees who also receive U.S. railroad retirement or social security annuities in respect of C.N.R. service rendered in the United States. FERRY "WILLIAM CARSON"

Question No. 842—Mr. Stewart:

1. On how many occasions in each year since the *William Carson* went into service has she been unable to dock at North Sydney, N.S. because of ice in and near the harbour?

2. What losses have resulted because of (a) stress and damage to the ship (b) spoilage of goods and (c) other effects?

3. What alternate port has the *William Carson* used and have facilities there been found adequate and, if not, what are the inadequacies?

Mr. McBain: The management of Canadian National Railways advise as follows:

1. 1958, nil; 1959, 14; 1960, 1; 1961, 39; 1962, 28.

2. Losses cannot be stated in the terms phrased by the question. Estimated total damage is \$70,000. There was damage to deck cargo on three occasions resulting from heavy weather. On one other occasion cargo on deck and below deck was damaged, as well as ship's furniture, due to a power failure which reduced speed in heavy weather. No spoilage or damage as a direct result of ice conditions.

3. The alternate port used has been Mulgrave and while the facilities there are not designed for a *Carson* type ship operation they have served their purpose on an emergency basis.
