

Explanation of Calendar Pages.

The ordinary tables of the changes and quadratures of the Moon are given at the head of each month respectively, calculated for the longitude of Montreal. The 1st and 2nd columns to the right of the Calendar give the mean time of the rising and setting of the Sun. The third column shows the Sun's declination S. or N., and the fourth gives the Moon's place on the Zodiac. The rising and setting of the Moon are given in the fifth column, with sufficient exactness for all practical purposes. The weather prognostications are again calculated according to the table of the celebrated Dr. Herschel, and for extraordinary accuracy Millers' Almanac has attained unprecedented popularity.

Astronomical Symbols and Abbreviations.

☉ The Sun,	♄ Saturn,	° Degrees,	♋ Cancer, <i>The Crab</i> ,
☾ The Moon,	♃ In Conjunction	' Minutes,	♌ Leo, <i>The Lion</i> ,
