

LAI D STONE AT NEW SCHOOL

CEREMONY PERFORMED
MONDAY AFTERNOON

George Jay Refers to the Increased Interest in Affairs.

With all the eclat necessary to so great an occasion the corner stone of the new Moss street school was laid by Chairman Jay, of the Victoria schoolboard Monday afternoon. There were present also Trustees McIntosh, McNeil and Standand, Architect Keith, Clerk of Works Berkholder, F. Andrews of the High school staff, Mrs. Jay, Mrs. Keith, and a number of others.

When the party had gathered, Chairman Jay took the small silver trowel which had been especially provided for the occasion and with a few deft strokes declared the stone well and duly laid. He also stated that within the aperture at the top of the stone they were placing a list of the names of the contractors, the mayor, aldermen, and the leading civic officials, the school trustees, city superintendent, architect and clerk of works. The stone of the realm consisted of 50c, 25c, 10c pieces, all of the year 1908, and a 5c piece for 1904. The chairman said that the smallness of the coin indicated the economy of the present board of trustees. There were copies of the daily newspapers, of the current date, and a memorandum book which was in use in the schools of Upper Canada in the year 1854, the property of W. H. Berkholder.

Mr. Malcolm, of the firm of Malcolm and Dinsdale, contractors, lowered the stone into place assisted by his foreman, Harry Jones.

Chairman Jay said he esteemed it a high privilege to officiate on an occasion of this sort. In the construction of the other schools in the city, with the exception of the High school, the school board had not seen it to have any public ceremony at the laying of the foundation stone. He considered, however, this was a very proper thing to do.

Continuing Mr. Jay said that it afforded him great satisfaction to think that the ratepayers had seen fit to place the money in their hands for this work. It marked a new era in the progress of the city. It was a matter for great congratulation that the people had shown this confidence in the board and in the future of the city.

This was one of two schools which were at the present time being constructed. The other was at the corner of Chambers street and Princess avenue, which had been named after him, the George Jay school. It was a large and commodious building. The present building, although not quite so large, would be a model structure with the very best heating and ventilation arrangements. The citizens and ratepayers might well be proud of the structure which was commenced there and which would be completed either at the close of this year or very early in that which was coming. It would be a large relief to the pressure on the Central and South Park schools which at present were over crowded.

The basement of the new building has been almost completed. Two extra rooms will be added to this giving eight new class rooms. Six of these it is expected will be necessary in the immediate future and the other two will be left in the form of an assembly room which can at any time be easily divided. The facing of the building is in buff brick and it will be a handsome structure.

The location is a good one as ample playgrounds will be provided on either side.

OPEN NEW SCHOOL IN SOUTH SAANICH

Minister of Education and Hon.
D. M. Eberts Present at
Pretty Ceremony.

Hon. Dr. Young, minister of education, officiated at the ceremony Tuesday afternoon at the opening of the school in the new school district in South Saanich. The building lies to the north of the North Dairy pumping station, and is two stories in height and of pretty design. Dr. Young was accompanied at the opening ceremony by Hon. D. M. Eberts, in whose constituency the school is located. There was a good attendance of residents of the surrounding districts and speeches were made by Dr. Young, Hon. Mr. Eberts and Messrs. Campbell and Dunn, school trustees for South Saanich, and R. M. Palmer. The new school stands on a pretty plot of ground on which there are a number of oak trees. There is at present some forty children in the new district, and there is a likelihood that this number will be increased shortly.

KILLED BY SHOCK FROM DROP ELECTRIC LIGHT

Bakersfield, Cal., Oct. 5.—Gilbert Ayton, an Englishman, 35 years old, is dead here to-day from shock, an ordinary drop electric light in a livery stable. The floor of the stable was wet and the man's clothing was damp when he grasped the socket of the light.

DISCONTINUES DANCE.

New York, Oct. 6.—The case against Miss Gertrude Hoffman, who was arrested on July 24th at the close of her Salome dance and charged with giving an improper programme, was dropped and she was discharged yesterday, when her counsel assured the court that the dance had been discontinued.

KIDNEY DISEASE FOR YEARS

This Well Known Gentleman Strongly Recommends 'Fruit-a-tives' to All Sufferers.

JAMES DINGWALL, ESQ.

"I have much pleasure in testifying to the almost marvellous benefit I have derived from taking 'Fruit-a-tives'. I was a lifelong sufferer from Chronic Constipation, and the only medicine I ever secured to do me any real good was 'Fruit-a-tives'. This medicine cured me when everything else failed. Also, last spring I had a severe ATTACK OF BLADDER TROUBLE WITH KIDNEY TROUBLE, and 'Fruit-a-tives' cured these complaints for me, when the physician attending me had practically given me up."

"I am now over eighty years of age and I can strongly recommend 'Fruit-a-tives' for chronic constipation and bladder and kidney trouble. This medicine is very mild like fruit, is easy to take, but most effective in action." (Sgd.) JAMES DINGWALL, Williamstown, Ont., July 27th, 1908. Fifty cents per box, for \$2.50 per trial box, 25c at dealers or from Fruit-a-tives Limited, Ottawa.

ROASTED UNDER RAILWAY ENGINE

MAN MEETS HORRIBLE
DEATH IN TRAIN WRECK

One Person Killed and 18 Injured in Collision on Illinois Central

Portland, Ore., Oct. 6.—Engineer Bigsby killed, his fireman and mail clerk fatally injured and seven passengers suffering serious injuries, is the result to-day of a wreck of train No. 4 of the North Bank railroad, leaving here at 5:40 last night. The accident occurred between Fountain and Roosevelt, flag stations east of Vancouver, Wash., at midnight. The wreck was caused by a landslide across the tracks. Bigsby's engine and a mail car was derailed.

When the crash came, the engine turned partly over and Bigsby was caught beneath the boiler and roasted to death. His fireman jumped as did the mail clerk, and both were pinned under the wreckage of the mail and express cars which piled up over the engine.

Woman Killed. Clinton, Ill., Oct. 6.—Miss Clara Watson, aged 35, is known to be dead and eighteen are injured. Among the injured are Charles Daniels and Baggageman L. W. Large, probably fatally, as the result of a head-on collision between a special through train loaded with sight-seers from the Illinois state fair at Springfield and a southbound mail train on the Illinois Central railroad. The wreck occurred at Farmer about 8 o'clock last night. The scene of the accident is a small station with few facilities for communicating with the outside world, and the news of the wreck did not reach here until early to-day.

Although only one person was killed outright in the wreck it is feared that several others will die. Most of the injured were passengers on the fair train. The two trains collided at a sharp curve and the crash that followed an engine and two cars were demolished.

Physicians and nurses have been sent to the scene of the accident on a relief train from here.

Engineer Killed. Temple, Texas, Oct. 6.—Engineer McGinnis is known to have been killed, thirty persons are reported fatally hurt and it is believed that four were burned to death when a passenger train on the Santa Fe railroad was wrecked at a switch near here to-day.

The engine turned turtle and the baggage and express cars were burned, and it is thought at least four men were incased in them.

A relief train is on the way from Houston to the wreck. Every passenger of the train was more or less injured.

COURT ACQUITS MISSIONARY.

Washington, D. C., Oct. 6.—A telegram received at the state department yesterday states that the American missionary, W. J. Sheppard, in the Congo Free State, has been acquitted of the charge of criminal libel.

DR. COOK'S CLAIMS.

Copenhagen, Oct. 6.—The Royal Geographical society yesterday expressed its willingness to act simultaneously with the American Geographical Society in passing upon Dr. Frederick A. Cook's claims, if the Brooklyn physician desires it to do so.

DIRECTORS RE-ELECTED.

Montreal, Oct. 7.—Hon. R. McKay, Hon. Jas. Dunsinuir and Messrs. McNicol and Hogmer were re-elected directors of the Canadian Pacific at the annual meeting yesterday.

NEW GOVERNMENT BUILDINGS AT REGINA

Corner Stone Laid by Earl Grey—Thousands Attend Ceremony.

Regina, Oct. 5.—With the blowing of the high noon whistles yesterday the citizens of Regina abandoned work and commenced the celebration of laying the corner stone of the legislative and executive buildings of Saskatchewan, an event second in importance only to the inauguration of the province. The ceremony took place soon after 2.30 p.m. His Excellency the Governor-General officiating. Gathered about him on the platforms and in the grandstands was a throng composed not only of residents of Regina, but of citizens of Saskatchewan generally, among whom was a large representation of farmers. A thousand bright faces indicated that the import of events was not misunderstood by the school children of the city.

The viceregal party occupied a position of prominence. Massed bands composed of one hundred musical instruments played patriotic tunes. The guard of honor fired a salute and the boom of guns of the R. N. W. M. P. and the battery was heard. The very air breathed loyalty to the British crown and his Majesty, as represented by Earl Grey. National airs rang from a thousand lusty throats of school children, and the vast throng stood with heads bared while the actual ceremony of laying the stone was performed.

The decorations of the grounds surrounding the parliament buildings were in keeping with the occasion. Citizens responded loyalty to the request for a display of flags, and every building boasting a flag staff was adorned with the British ensign. Here and there a display of the Stars and Stripes indicated that American cousins have joined in the celebration. Buildings, both public and private, were tastefully decorated with bunting.

His Excellency was greeted with rousing cheers from the crowd upon his arrival, while the guard of honor presented arms.

The task of invoking the divine blessing upon the structure to be erected devolved upon S. Spencer Page, clerk of the legislature.

Following the invocation, Hon. W. R. Motherwell, minister of agriculture and provincial secretary in the government of Saskatchewan, came forward and extended the greetings of the province in the following speech:

"May it please Your Excellency: The government of the province of Saskatchewan desires to take this opportunity to extend our appreciation of the kindly courtesy and interest which Your Excellency has shown to this province during your tenure of the high office of governor general. It is a privilege to have Your Excellency's presence here today."

"Four years ago today a leading part in celebrating the entrance of the province of Saskatchewan into the federation of Canadian provinces of the North American continent, and to-day you will practically complete that work by laying the corner stone of this building, which is destined, we hope and trust, to be the home of those to whom the people of this province entrust the duty of guarding their liberties and the guidance of their future. During the past four years the growth of this province has been marvellous. Our people have doubled their numbers, the crops of grain they are taking from the land to provide food for the world have increased by one hundred and fifty million bushels annually, and will this year be four times more than that of 1908. Nothing can be said which will more clearly demonstrate the growth of this province than by directing your attention to the school children now before you. The prosperous condition of our people is one thing that we feel will be pleasing to Your Excellency, and we do not doubt but the people of this province have your Excellency's wish for continued prosperity in the years to come. The government desires to record its gratification at the presence of her Excellency and the other members of your family, and be permitted to wish that all blessings may be enjoyed by them and you."

The attorney-general read a list of the contents of the box to be placed in the cavity and Hon. J. A. Calder, minister of education and provincial treasurer laid the box in position. The school children were at this stage again introduced into the ceremony, singing "The Homeland."

The Lieutenant-Governor handed to his Excellency the beautifully worked silver trowel, and the actual ceremony of laying the stone was performed. His Excellency spread the mortar and the stone was lowered into place, while the massed bands played the National Anthem. Heads were uncovered and the vast throng rose as one man when the simple ceremony was over and the Lieutenant-Governor in a few well chosen words declared the stone "well and truly laid."

NEW MILL NEAR CRESTON.

Creston, Oct. 5.—C. O. Rodgers, the well-known sawmill man of Creston, is building another large sawmill on his property Canyon City, eight miles from Creston. The machinery for this mill has all been secured. The new mill is a very heavy portable one and will have a capacity of 20,000 feet of lumber per day. It is expected that it will be in operation by November 1st, next.

MAYOR MAKES CHARGES.

Hamilton, Ont., Oct. 6.—Mayor McLaren made a series of sensational charges against the police at a session of the police commissioners. He claims that a number of hotel men are in the habit of supplying liquor free to officers on duty. The police commissioners have asked for an investigation.

FARMER KILLED BY BULL.

Woodstock, Ont., Oct. 6.—Thomas Connors, a Princeton farmer, who was attacked by an infuriated bull on Friday last, succumbed to his injuries yesterday.

BLUE FUNNEL LINER ARRIVES

KEEMUN BRINGS NEARLY
NINE THOUSAND TONS

Typhoon Signals Disregarded and Much Time Saved by Vessel.

The season of equinoctial gales has commenced and the steamer Keemun, which arrived Monday from Liverpool via the Orient, reported that a number of gales had been experienced en route. A big typhoon had, however, been escaped altogether. Just as she was leaving Hongkong the typhoon signals were hung out and all the vessels in the neighborhood at once made for Typhoon bay, with the exception of the Keemun. She could not afford to lose any time, so she proceeded on her way and just escaped the typhoon which came behind her. The lateness of the arrival of the vessel, Capt. Conradi explained, was owing to her having experienced head winds nearly all the way across and thick weather outside the straits. So thick was it that the lighthouse which should have been anchored at the Swiftsure Bank was not seen, although the Keemun passed right over the bank.

The Keemun brought nearly 9,000 tons of general merchandise, of which 1,400 tons was for Victoria and 2,636 for Vancouver. Included in the cargo was 244 bales of silk, which goes direct to the east. About two-thirds of the cargo was from Europe, the rest being picked up at Oriental ports.

The steamer brought 263 Chinese from Hongkong, all of which were discharged on Monday before the steamer left for Tacoma.

Among the officers aboard the steamer was Mr. McGee, formerly of Ottawa, who has been for some time surgeon on the Cunarders, but who is taking a trip to this coast for a change. He was much interested in hearing news from Canada once more.

SUN SPOTS WERE DISCUSSED

NATURAL HISTORY
SOCIETY INTERESTED

F. Napier Denison and O. E. Hastings Give Results of Investigations.

At the regular meeting of the Natural History Society, held in the rooms Monday, some interesting observations on sun spots were made by the president, F. Napier Denison, and O. E. Hastings, another local astronomer, who has for years past taken a great interest in viewing the heavens. Mr. Denison said that after reading of the electric currents which took place September 26th which interfered so much with commercial electricity, he set up his small three-inch telescope and found a large sun spot. Changes took place from day to day, and drawings were made showing the locations of the spots. These drawings were shown and created a good deal of interest. Mr. Denison explained that the spots were enormous, cyclones of immense size, probably 100,000 miles in diameter. He was of opinion that the changes in the magnetic elements of the earth were electric storms on the earth when there were electric storms on the sun. Mr. Hastings said he also had been watching the spots through his telescope, and he had decided that they did not move except as the sun moved. He estimated the diameter of the large spot being 60,000 miles, and there was a large tongue running into it from the north. This spot, although appearing very small on the surface of the sun, was so large that half a dozen earths could be thrown into it, and then it would not be full.

Speaking of the origin of the spots, Mr. Hastings said it was not generally accepted that the spots were composed of which the sun was composed were thrown off from that body by chemical action and becoming condensed or partially so formed clouds of dust, and this was again precipitated by the action of gravity. It was these clouds of dust which formed the spots which were seen from time to time. When watching the spots through the telescope the light could be seen shining through the edge of a cloud. Radium and helium were always very active over the spots.

The spots, continued Mr. Hastings, were seldom seen at the sun's equator or near the poles. Sometimes there were no spots visible on the surface of the sun. At such times it was thought probable that there may be such spots on the opposite side of the sun from the earth which of course could not be seen. A sun spot would have to be 100,000 miles in length to be seen by the naked eye. They were at such spots on the opposite side of the sun that it had for a long time been thought that the sun was composed of nothing but elemental gases, but of late years prussic acid had been discovered. This was the only compound known to exist there.

W. B. Anderson told of having seen a sun spot with the naked eye some years ago, and Mr. Hastings said that he had observed the same phenomena at that time through his telescope. A good many interesting botanical specimens were examined at the meeting. Wright's statement was made that he has to numerous fabulous offers that he has received from persons who desire him to make flights.

WILL NOT FLY FOR MONEY.

New York, Oct. 6.—"I do not think that I shall ever take part again in the flying meet for money," declared Wright yesterday.

"We are not in the sidishow business," he continued, "but are making a serious study of the airship."

Wright's statement was made in reply to numerous fabulous offers that he has received from persons who desire him to make flights.

Taft VISITS CITIES ON SAN FRANCISCO BAY

Declares Popular Government is Best Form of Government.

San Francisco, Cal., Oct. 6.—More than half a million men, women and children welcomed President Taft to the cities around San Francisco bay yesterday. After going through the programme in Berkeley and Oakland and delivering an address in each city, the president was greeted by the San Francisco committee on board the revenue cutter Golden Gate and escorted across the bay. On the way from Oakland, luncheon was served.

At the transport dock, a large detachment of regular soldiers from the presidio held back the crowds and opened the way through the throngs to the automobiles which formed the parade. At Van Ness ave., the parade made a counter-march for the president to review the school children. The parade stopped at the new Y.M.C.A. building, where the president laid the cornerstone. He then was escorted to the Union League club, where a reception to him was held. Late in the afternoon a public reception was arranged at the St. Francis Hotel.

Speech at Berkeley.

Berkeley, Cal., Oct. 6.—In his speech before 3,000 persons gathered to hear him in the Greek theatre on the University of California grounds, President Taft dwelt particularly upon the relations of the United States and the Philippines and expressed the opinion that popular government is the best form of government possible, for the reason that the whole people know better what is best for their interests than the combined heads of a few. He said: In part:

"The modern trend of everything is toward specialization. The business of running government is easy to one who is not doing it. There are difficulties and frictions that are not seen by the general public. These difficulties, frictions and frictions are not appreciated by the critics. The criticisms directed at government officials, however, do much to lift the government and the people to a higher and more enlightened plane."

In referring to his government of the Philippines, the president said:

"One thing which is an outgrowth of the policies of the United States is the justice which we have at last granted the Philippines by giving them free trade with America."

BRIEF LOCALS.

The Westminster for October contains a very interesting sketch of the A.-Y.-P. fair from the pen of the local poet, Donald A. Fraser. The article is illustrated by a number of excellent photos.

The members of the local fire department have been promised a handsome billiard table by the fire underwriters. It is expected that the table will be in position for the coming winter and there will be entertainment for all the members of the brigade.

A joint meeting of the members of the Sons and Daughters of St. George was held on Tuesday for the purpose of considering the preliminary details in connection with their annual ball. Committees were elected to make full arrangements for the big event which will be held on or about November 6th.

An inquiry has been received from Ishpan, Persia, by the Vancouver Island and Development League, asking for a supply of literature dealing with the fruits and farm lands on Vancouver Island. A number of letters have also been received from Japan, where there are persons who are asking the same question.

A quiet wedding took place on Saturday, October 2nd, at 8 p.m., when Miss Margaret McConnell became the bride of Mr. W. F. Vance. The ceremony was performed at the home of the groom's parents, Highland Park, Vancouver, B. C., by the Rev. H. K. Vance, brother of the groom, assisted by the Rev. A. M. Sanford. Mr. and Mrs. Vance will reside in Victoria.

Mrs. Patterson, of the Dallas hotel, while alighting from an outer wharf car at Menzies and Superior streets on Wednesday, fell and sustained an abrasion on the head. She was assisted to a seat by passengers. Mrs. Patterson at the time had left her umbrella in another car and was going back for it. She called on the motorman to stop, but left the car before it had been brought to a standstill.

The Ladies Aid Society of the Victoria West Methodist church held a very pleasant and successful social in the parlour on Tuesday. Rev. A. E. Roberts gave a short illustrated lecture on British Columbia. The illustrations used were picture postcards thrown on the screen by means of a postcard projector, kindly loaned by Wm. Ritchie. There was a large attendance.

The following donations have been gratefully received at the Aged Women's Home for August and September: For August—Mrs. Burns, magazines, pineapples; Mrs. Holmes, salmon; Mrs. Sopher, flowers; Mrs. Cooper, butter; Mrs. (Dr.) Heilmann, salmon; Reformed church Sunday school, fruit and flowers. For September—Congregational church, flowers; Mrs. Goodacre, grapes, jam; Reformed Episcopal church, bread and tins of fruit and flowers.

Notice is hereby given that, 30 days after date, I intend to apply to the Hon. Chief Commissioner of Lands for a license to prospect for coal and petroleum upon the following described lands, situate in Bayward District of Vancouver Island, British Columbia: Commencing 'at a post placed at the southwest corner of A. R. Macdonald's location No. 25, and marked May T. Roof's southeast corner, thence north 60 chains more or less to the shore of Campbell Lake, thence east following the sinuosities of the shore of the said Campbell Lake, to a point of commencement, containing 320 acres more or less.

Located this 15th day of August, 1909.

Our Standard of Value

THESE are the days of keen, strenuous competition, when tried and proven merit alone can win permanent success.

It is astonishing how many men are wearing Fit-Reform garments in preference to any that the merchant tailors can make.

The demand for Fit-Reform Suits and Overcoats has never been so active and so widespread before.

The Fit-Reform reputation has been built on value. Fit-Reform garments have proved their quality and, to-day,

enjoy the esteem of gentlemen from the Atlantic to the Pacific.

We illustrate the "Cambridge" Fall Overcoat made up in a variety of elegant Tweed effects—
