Questions and Answers. Miscellaneous.

Patents.

To whom should I apply for a patent in Canada?

J. M. J.

Ans.—Write G. F. O'Halloran, Commissioner of Patents, Ottawa.

Rabbits.

Where can I get red New Zealand rabbits?

E. E.

Ans.—An advertisement placed in our columns would no doubt give you the desired information. We do not know of any.

Water Coming Through Wall.

I have a concrete wall under a barn. It is up against a clay bank. The water comes through in the spring. Could anything be done on the inside of the wall to prevent this. It is impossible to put plaster on the outside.

J. M.

Ans.—A coat of pitch might be applied on the inside wall. This would stop a good deal of the water from soaking through.

Strawberry Vines.

I planted a thousand strawberry plants this spring and plucked off the blossom to prevent fruiting, and to encourage the production of runners. I wish to set out another patch in the spring. Can I take the runners from my first patch?

A. L.

Ans.—Yes. These plants may be satisfactorily used.

Auctioneer's License.

1. Can our local Board of Health prevent me from holding an auction sale, as they have passed a ruling that there are to be no gatherings in our township?

2. Could I act as auctioneer myself, without a license?

3. To whom should I apply for a license?

J. A. D.

Ans.—1. Yes.
2. We think not.
3. Write your Township or County Clerk regarding a license.

Mangels or Turnips for Production.

Which is the more profitable to feed for the production of butter-fat, mangels or turnips?

D. R.

Ans.—There is somewhat of a diversity of opinion on this matter. Mangels and turnips analyze practically the same, but some claim that they can get better results by feeding turnips. For dairy cows, mangels are very often preferred, as they do not taint the milk. Unless carefully fed turnips may leave a taint in the butter-fat.

Swollen Legs.

Heavy horses swell in the legs when standing in the stable. They are all right when working. What is the treatment for same?

A. H. C.

Ans.—This trouble is very often the result of overfeeding when the animal is idle. Most horsemen avoid this condition by considerably reducing the grain part of the ration on Saturday night, or anytime previous to when the horse would be laid off for a day. Administer a purgative of 7 drams aloes and 2 drams ginger. When the bowels regain their normal condition, give one ounce Fowler's solution of arsenic in a pint of cold water, as a drench or sprinkled on rolled oats or bran twice daily for a week. Give the horse regular exercise and feed lightly on grain until the tendency to swell disappears.

Musk rats.

We have a number of muskrats around our property. What is the best way to catch them? Are the pelts valuable? What are the seasons for muskrats and mink?

H. T.

Ans.—According to the 1916 Game Laws, "no muskrat shall be hunted, taken, or killed, or had in possession of any person in that part of the Province lying south of the French and Mattawa Rivers, except from the first day of March to the 21st. day of April, and in that part of the Province lying north of the French and Mattawa Rivers from the 1st day of April to the 21st day of May. Musk rats are usually trapped. Shooting or spearing muskrats is forbidden, nor shall any muskrat house be cut, speared, broken or destroyed at any time, except in case where the animals are destroying property. Muskrat skins command a high price at the right season, the amount depending on the size and quality of the skins.
