

"Pedlarize" Your Barns and Other Buildings

YOU can rest easy if your barns and dwellings are roofed with "George" or "Oshawa" Galvanized Steel Shingles. A roof that is "Pedlarized" is proof against fire, wind and weather. It is absolutely protected against lightning. For more than 25 years we have studied the effects of fire, lightning and tempest—sun, rain and snow—upon our metal shingles on thousands and thousands of roofs in all parts of Canada. From time to time we have seen fit to make an alteration—every alteration has been an improvement—until now we can honestly say that the "George" and "Oshawa" Steel Shingles are as perfect as human brains and experience can make them.

Pedlar's "GEORGE" Shingle

is the best roofing material we know of for barns and big buildings. It is a great big generous shingle (24 in. x 24 in.). Every "George" Shingle is made to lock on all Four Sides, making a roof that is, to all intents and purposes, one solid sheet of steel, which affords absolute protection against snow, rain, fire, lightning, sun or wind.

In one day you can lay a roof of "George" Shingles that would take three days to lay in cedar shingles. To cover 100 square feet of surface with cedar shingles would require 1,000 shingles and a small keg of nails—25 of these big "George" Shingles will cover the same surface as 1,000 cedar shingles and you have only 75 nails to drive.

A prominent resident of Montreal, writes to The Great-West Life:—

"I duly received cheque in settlement for the matured values of my two policies in your Company, and I have great pleasure in telling you that the result is very satisfactory, the profits being far ahead of a similar policy maturing in one of the American Companies and another in one of the large Canadian Companies. I shall have much pleasure in recommending The Great-West to my friends."
