INCREASE IN IMMIGRATION.

The total immigration to Canada during April and May, 1913, was 146,060, made up of 56,940 British, 33,507 Americans, and 55,613 from all other countries.

During April and May, 1912, the total was 129,453, composed of 49,279 British, 39,595 American, and 40,579 from all other countries.

The increase is 13 per cent.

LINKING UP THE WORLD'S RAILWAYS.

At the International Railway Conference held at Moscow, Russia, on Saturday, a proposal was made by the representative of the Canadian Pacific Railway to the effect that the Korean Railway be added to the regular transsiberian service, and also that the North China Railway participated in the same service. The proposal was adopted. It means that Seoul and Peking may now be stations on the regular round the world route via Russia and Canada.

CANADA'S WATER AREA.

"Canada has an estimated water area of 125,755 square miles. Hence as compared with the estimated area of 52,630 square miles of water area in the (continental) United States, Canada is seen to have nearly two and one-half times the water area possessed by the States. The estimated water area of Ontario is 40,354 square miles exclusive of any portion of the Great Lakes, or any arm of the sea, and this area is over 75 per cent. of the total water area of the United States, exclusive of Alaska, the Philippines, and other external possessions."

FIRE PROTECTION APPLIANCES.

In order to protect the valuable records of the Government from danger by fire Congress has made an appropriation for the installation of a modern system of auxiliary fire protection for three of the largest buildings occupied by the Department of the Interior in the City of Washington. A committee has been appointed to investigate the relative merits of systems adaptable to the buildings of the Department and to prepare plans and specifications.

WHO IS THE SUFFERER?

"A remarkable fact about the present situation," remarks the Paris Journal des Debats, "is that the heavy commitments in the troubled credit market are not at all those of the general public, but of the underwriters of new securities, especially in Germany and England."
