Forward will publish to-morrow the opening article in the pro war campaign intended to prepare the opinion of the Greeks for the entry of their country in to the war. The newspaper demands an immediate explanation and the release of the Greek soldiers made prisoners by the Bulgarians at Kavala, plainly indicating that the alternative will be war. Speaking of the Greeks made prisoners at Kavala, Forward says that only these are treated as prisoners who surrender to the enemy. We know now that Premier Kalogoropoulis has taken steps with Germany for the immediate return of our soldiers with all their effects. If this demand is not at once satisfied, the Government must consider the measures to be taken.

"The events since the general offen sive have caused the German people at home to recognize that national interests are now at stake; that it is no longer a question of more or less gain, but of life or death for Germany.

"This recognition has had a singular influence on the Germans estimates of their enemies. The hatred against England which for long was decreas-
