There are now five buildings and fourteen rooms along the line of the New York Central devoted to the use of the employes of that road as places of rest, recreation, education and religious instruction. No intoxicants find a place in them, and they are substitutes for the saloon. They have been erected or leased by the men themselves, aided by the railroad, and especially by Cornelius Vanderbilt.

A new and important development of the scheme of temperance teaching in the public schools of London has recently occurred. The committee of the United Kingdom Band of Hope Union has had £10,000 placed at its disposal to be expended during the next five years. This money is to be expended mainly in providing for the delivery of illustrated lectures in the schools on the physiological results of the use of stimulants. Seven lecturers have been engaged, the plan of the lectures being so arranged as to assist the ordinary work of the schools. The scheme also embraces the bestowal of certificates for the best reports of the lectures by pupils, prizes in a competitive examination on the subjects taught, and the distribution of suitable literature. lic schools of London has recently occurred.

TEMPERANCE NOTES.

The Toronto Presbytery has refused to adopt a recommendation by the Committee on Temperance that those who manufactured, sold or used alcoholic beverages should be retused church membership.

It is stated in the Alliance that in one of the London institutions, which still maintains its quantity of alcohol, 24 per cent. of the typhoid fever patients die; whereas in Glasgow Fever Hospital, where milk is used, the mortality is only 12 per cent.

There are now five buildings and fourteen rooms along the line of the New York Central devoted to the use of the employes of that road as places or rest, recreation, education and religious instruction. butter and hot water. Sprinkle with sugar and cinnamon.

Jelly Cake—Ingredients: Two cupfuls of sugar, one-half a cupful of butter, three-quarters cupful of milk, one large table-spoonful of baking powder, two and a-half cupfuls flour, eight eggs (whites); beat butter and sugar to a cream, then add the milk. Mix thoroughly the baking powder and flour, lastly the whites of eggs. Bake in papered jelly pans, and when cool spread jelly between. When I use recipes that call for the whites of eggs only (as do the last two given), I make custard of the yolks by using a little constarch, to do the work of the whites, and sweet milk, or simply scramble the yolks for the next meal, taking care not to cook too long, but keep juicy.
