

A delight to contemplate is a cup of coffee, clear, pure, and harmlessly invigorating.

Are you one of the millions who use

Chase & Sanborn's Seal Brand Coffee?

If so, you know its unquestionable excellence.

The manner in which you buy it, in pound and two-pound cans, insures its purity and freshness.

The Chase & Sanborn seal guarantees that it is a perfect coffee. If you have failed to use this famous brand of the best blend of Java and Mocha, you have yet to experience tasting the most delicious coffee imported into or sold in any country.

WITH A MOWER

Terrible Accident to a Guelph Township Farmer

His Horses Ran Away, and He Became Entangled in the Machine.

Guelph, July 12.—A terrible accident with a mowing machine occurred on the farm of Mr. Alexander McIntosh, Wilson's Corners, Guelph township. On Saturday afternoon his son Alexander, aged about 17, was mowing hay with two of his heaviest horses, considered the quietest span of horses on the farm. Owing to some defect in the large wheel of the mower, it collapsed, and the young man was thrown off his seat and was caught on the axle. The horses ran away, dragging the unfortunate man twisted round the axle of the mower for fully a quarter of a mile before they were stopped by coming in contact with some obstruction, when the mower was upset on top of McIntosh, and the horses on top of the mower, cutting them badly.

At this stage a neighbor, who had seen the accident, ran to the rescue, and jumped on to the horses' heads to keep them from kicking the young man to death. A woman also lent assistance by throwing her skirt over the infuriated animals' heads. Further assistance came, and the horses were removed. McIntosh was wound round in the action in such a manner that his clothes had to be cut from his body. He was taken home in a state of collapse, and remained so for hours. He sustained a compound comminuted fracture of the left leg below the knee, both bones being shattered and exposed. The right leg, though much torn, was not fractured. There are minor cuts and scratches on the head, face, and all over the body. It is hard to tell as yet whether there are any internal injuries or not, or whether the leg will have to be amputated. His recovery even is a question.

JUDGE MUIR

Resigns the Wentworth County Junior Judgeship.

Hamilton, July 12.—Judge Muir's resignation as Junior Judge of the county of Wentworth has been forwarded to Ottawa, and will take effect on July 15. He was appointed to office while a member of the law firm of Crerar, Muir & Crerar, in July, 1887, and his resignation after ten years of service leaves to him a substantial allowance, provided by statute.

Judge Muir was compelled to practically retire from active work about three years ago, owing to ill-health. It is thought that Mr. J. F. Monk will succeed him.

CARS BURNED.

Hamilton, July 12.—There was a fire in the west end of the Stuart street car in the west end of the Stuart street yard of the G. T. R. Sunday evening. One box car was burned and two more cars were damaged considerably. The burned car belonged to the C. P. R. and was worth about \$400. It is thought that tramps set the cars on fire.

Is the most reliable and effective remedy known for the relief and cure of DIARRHEA, DYSENTERY, COLIC, CHOLERA, and SUMMER COMPLAINT. It soothes the stomach, stimulates the heart, soothes and heals the irritated bowel.

NEVER FAILS.
"For several seasons we have relied on Dr. Fowler's Extract of Wild Strawberry for all summer complaints, and it has always given relief and it never fails to cure. We think it a very valuable medicine as precious as gold." Mrs. P. C. Winkler, Fort Hill, Ont.

RESIGNATION OF SAGASTA

Culmination of the Crisis in Spain.

The Premier and His Cabinet Hand in Their Resignations.

A Canadian War Correspondent Imprisoned at Porto Rico—Netting That Will Resist Attacks of Torpedo Boats.

NEW TORPEDO DEFENSE.

London, July 11.—The battleships of the channel squadron have just been fitted with a new torpedo defense net that is impenetrable against any torpedo, even when the latter is armed with a cutter. Each net is 25 feet wide, and 23 feet deep, weighs 17½ cwt., and contains 16,000 wire meshes. Each mesh is secured by six small rings, and these, combined with the small size of the mesh, render it practically impossible for a cutter to make any impression upon the net. All the new battleships and first-class cruisers are to be given the new net defense.

TELEPHONE IN ENGLAND.

London, July 12.—A committee of the commons has been sitting for several weeks for the purpose of finding whether it is advisable to give municipal corporations power to establish telephone exchanges and carry on a telephone business. This country is divided between the postoffice and the National Telephone Company, and as the managers of the latter are smart business men they have all along got the better of the red tape bureaucrats. The result is that the government has the unprofitable work and the company most of the profitable business. To give the municipalities the power sought would hit the company's monopoly in lucrative local exchanges, and it is moving heaven and earth to prevent it. The evidence given to the committee so far favors the transfer for the entire telephone business to the government.

FREEMAN HALSTED.

London, July 12.—The parliamentary secretary for the foreign office, Mr. Geo. N. Curzon, replying in the House of Commons to a question on the subject of the arrest of the Canadian war correspondent, Freeman Halsted, who was arrested at Porto Rico and sentenced to nine years' imprisonment for taking photographs of the fortifications at that place, said that recent reports showed the conditions of Halsted's imprisonment had been altered, as they were threatening to seriously affect his health. The British ambassador at Madrid, Sir Henry Drummond-Wolfe, had therefore been instructed to make representations to Spain with the view of securing more humane treatment for the prisoner, and he had expressed the hope that the latter's sentence of years' imprisonment would eventually be mitigated.

SPAIN'S CRISIS

The Premier and His Cabinet Resign—Sagasta's Counsel to the Queen Regent.

Madrid, July 12.—The Official Correspondence confirms the report of the cabinet crisis. A minister is quoted as saying that the crisis would be the reason for the whole ministry resigning in a body.

At 4 p.m.—It is understood that Premier Sagasta has submitted to the queen regent a question of confidence in the cabinet. It is said that Capt. Gen. Blanco has cabled to Madrid, declaring that the volunteer army in Cuba wishes the war to continue as the troops hope to secure victories.

SAGASTA DROPS OUT.

London, July 12.—The Madrid correspondent of the Times, telegraphing Monday, says: Senor Sagasta went to the palace today and tendered his resignation and that of the cabinet. It is said that he advised the queen to appoint a new cabinet, largely consisting of the military element, which would not necessarily mean the adoption of a warlike policy, but probably the reverse. It is generally expected that the resignation will be accepted, but the result may possibly be a mere partial reconstruction of the cabinet.

THE GALLOWES

Guillemain, the Murderer of His Uncle, To Be Hanged Sept. 12.

St. Hyacinthe, Que., July 12.—Guillemain was sentenced yesterday by Judge Teller to be hanged at 9 a.m. on Sept. 12. Guillemain's marvelous nerve still abides with him. A moment after learning his fate Guillemain, surrounded by a curious throng, began to write autographs. Two motions were asked for a reserved case on the question of the legality of the prisoner's confession to the murder of his uncle, and an application to the court of appeal for a new trial under section 147 of the criminal code, on the ground that the verdict was in accordance with the evidence—were refused by the judge.

UNITED STATES CROP REPORT.

Washington, July 12.—The crop report of the department of agriculture issued today says: The cotton returns to the statistician of the department of agriculture made up to July 1 indicate an average condition of 91.2 as compared with 89 on June 1, 1898, with 86 on July 1, 1897, and with 82.5 on July 1, 1896.

SPAIN'S POPULATION.

According to official returns the population of Spain in 1897 was 16,945,786. There were in Spain at that date 12,395 resident foreigners, the most of these being in the provinces of Barcelona, Cadiz, Gerona and Madrid. The Basques in the north number about 400,000, and differ materially from the rest of Spain. There are 100,000 Moriscos in the south, 50,000 gypsies and small number of Jews. In 1700 the population was estimated at 8,000,000; in the fourteenth century it is believed to have amounted to upwards of 24,000,000. Statistics published by the Instituto Geografico y Estadistico of Spain show that the population, according to the occupation in 1889, was as follows: Agricultural, 4,864,742; industrial, textile and mineral, 248,997; commercial, 194,752; arts and trades, 823,310; domestic servants, 409,548; merchant marine, 115,764; professional, legal, medical, etc., 949; public employees, 97,257; asylum inmates, 91,226; religious, Catholics, 72,077; private and railway employees, 49,565; teachers, 38,136; leisure classes, 23,918; hotelkeepers, 14,449; pupils at schools and colleges, 1,719,955; not stated, 8,723,519, or a total of 27,266,599.—St. Louis Globe-Democrat.

IN A TUNNEL!

Eleven Men Killed by an Explosion

That Occurred at the Cleveland City Waterworks

No Witness Lives to Tell How the Terrible Accident Occurred.

The Bodies Lie 6,000 Feet Out Under the Lake.

Cleveland, July 12.—The lives of eleven men were snuffed out in the twinkling of an eye last evening in the big waterworks tunnel that is being constructed under the bottom of Lake Erie, as a result of an explosion of gas. The tunnel is an immense affair being projected to extend outward from the shore for a distance of four and a half miles, and it has been under construction for more than a year. The work has been attended with great difficulty. About six weeks ago there was an explosion of gas in the shore end of the big hole, which killed eight men and injured a number of others. Soon afterward a big pocket of quicksand was struck, and work was stopped for some time. The contractors then asked for permission to deflect the course of the tunnel from the route fixed by the city engineers, but it was refused. Work was finally resumed and had progressed uneventfully until last evening when this latest and most horrible accident came.

The explosion occurred at a few minutes before 7 o'clock last evening, but nobody will ever be able to tell what caused it, or how it happened, for

EVERY WITNESS IS DEAD and the bodies of all 11 are lying where they fell, 6,000 feet out under the lake. The only man in the tunnel who escaped death is Con. O'Donnell, a look tender, who was stationed 3 or 4 feet from the shore. He heard the explosion, or series of explosions. He says there were

TEN OF THE SHOCKS.

and the concussion was something terrible for it threw him off his feet, and for four hours he was in such a dazed condition that he could scarcely remember what had happened. He finally groped his way out and told what had occurred.

Two men, Patrick Varner and Martin McCauley, were the first to venture in the tunnel after the accident occurred. They made their way to a lock 5,200 feet from the shore, but were there

OVERCOME BY THE GAS.

and fell to the floor. When they failed to return a young man named James Clements, son of one of the men who was killed, and who was employed as a male driver, risked his life to rescue them. He found them almost unconscious, lying over a pile of earth, and succeeded in helping them to the well at the shore end of the tunnel. The would-be rescuers say that all the lights were out beyond the 5,000-foot lock and that they could not go any further. A rescue party was made up of Patrick Gaytons, Mike McCauley, Dan Rogers, Barney Hughes and Ed Conboy. It failed utterly in accomplishing anything, as the tunnel was filled with foul gas and smoke. In an interview Ed Conboy said:

A DEATH PIT.

"When we got out 5,100 feet we found the electric lights were not burning from there on out. Gas and smoke were terrible. We had wet handkerchiefs over our noses and mouths, and went 200 feet further into the pitchy darkness, but the gas and smoke almost overcame us and we were forced to return. Nothing can be accomplished in the way of getting the bodies until the tunnel is lighted, and the sulphur gas and smoke are cleared out. It is sure death to try to reach the bodies now. As far out as we got, the case of the tunnel was covered to the depth of a foot with substance resembling snow in appearance."

Names of the dead: John Parks, foreman, 32 years old and single; James Parks, brother of John, 30 years old and single; John Pray, an Italian, 22 years old and single; Tony Brunette, Italian, 22 years old and single; John Emerson, 18 years old and single; James Smith, 44 years old, married; John McCauley, 21 years old, married; Wm. Tucker, colored, 28 years old and single; Cut Watts, 28 years old, wife and several children; Frank Clements, married, with several children; Frank Haney, married, aged 22.

THE SENSIBLE GOVERNMENT.

The government of Belgium has issued an order that every newspaper in the country is entitled to the free use of every railroad. The business of news-gathering the government regards as of so much importance to the development of the nation. The governments following the sensible and up-to-date view will find a free press of even more use than a standing army.—Baltimore American.

No one need fear cholera or any summer complaint if they have a bottle of Dr. J. D. Kellogg's Dysentery Cordial ready for use. It corrects all looseness of the bowels promptly, and causes a healthy and natural action. This is a medicine adapted for the young and old, rich and poor, and is rapidly becoming the most popular medicine for cholera, dysentery, etc., in the market.

The number of sheep in the world is estimated to amount to 550,000,000, of this number between one-third and one-half are believed to be merinoes.

Didn't Know His Wife.

When T. Coleman, a Brantford traveler, left on a three weeks trip his wife was a yellow faced, fagged out looking woman. When he returned he didn't know her. Her eyes were bright and her skin clear, and she walked differently. Merrill's System Tonic did it. 50c for 60 doses. Sold at Strong's Drug Store.

IDENTIFIED BY A MATCHBOX.

Rochester, N. Y., July 12.—On May 27 an unknown man was found drowned in the Thames at London, England. In his pocket was a match safe bearing the name and address of W. G. Au-miller, 37 Prior street, Rochester, N. Y. Harry Organ, who lives near Lincoln Park, told the police that he found a match safe such as the one described, and gave it to his father, who shortly left for England to visit a brother. He has not heard from him since, and as the description of the unknown tallies with that of his father, he thinks it must be his father who was drowned.

When a fish has lost any of its scales by a wound or abrasion, they are never renewed.

"He that stays in the valley will never get over the hill." Don't delay, but try Blue Ribbon if you want to enjoy good tea.
