

HOME FROM OTTAWA.

The Garrison Artillery Parade to Welcome the Commanding Officer and Mr. Earle.

Who Fittingly Acknowledged the Compliment and Spoke of Their Parliamentary Work.

A guard of honor from the Battalion of Garrison Artillery turned out last evening to welcome home their popular commanding officer, Lieut.-Col. Prior, M.P., after his absence of six months attending the session of the House of Commons at Ottawa. The parade was in command of Major Quinlan, with Lieut. Jameson acting as Adjutant, and there was a full attendance of the other officers, while Sergeant-Major Mulochy mustered nearly a hundred non-commissioned officers and gunners. The band of course was present, under Bandmaster Finn. The Artillery left the drill hall as the steamer from the Mainland neared the entrance to the harbor, and came to a halt at the wharf just as the whistle of the steamer signalled the approach to the dock. The familiar figure of the Colonel was descried on the upper deck, and beside him stood his colleagues, Thomas Earle, M.P. The band struck up "Home, Sweet Home," and the crowd of spectators on the wharf gave a welcoming cheer to their parliamentary representative. Col. Prior having landed, the guard shouldered arms by way of salute, and after he had exchanged a few words with Major Quinlan and other officers who were on the wharf, he was accompanied by Mr. Earle, and followed by the Artillery, the band playing the liveliest airs. At the drill hall Col. Prior made a short speech to the men, thanking them for the honor they had done him and his colleagues by turning out to meet them at the wharf, and expressing his appreciation of the feeling of goodwill which had prompted them to do so. He spoke in flattering terms of the appearance and drill of his battalion as compared with the crack corps of the East which he had recently seen, and stated that since so much of the success of the battalion is due to having their fine new drill hall they would not doubt be pleased to hear that he and Mr. Earle had secured an appropriation of \$5,000 to put the finishing touches to it. He did not forget the general interest of Victoria either, and he was happy to say in this connection that they had brought the plans for the new post office and custom house with them so that an early commencement of this work might be looked for. This announcement was received with great applause from the crowd of spectators in the galleries and Col. Prior again thanked the battalion for having paraded, asked Mr. Earle to favor them with an address.

Mr. Earle in response said he could tell the battalion that they owed a great deal to Col. Prior for his efforts to secure for them the fine hall in which they were assembled, and for the completion of which with fittings yet required, a further appropriation had been secured. He complimented the band upon the fine music which they had rendered at the wharf, and he quite agreed with the musicians that "there is no place like home." He and Col. Prior had long ago come to that conclusion, and for weeks had been looking forward with great expectancy to their return to this beautiful city of Victoria.

Major Quinlan then called for three cheers for Col. Prior and Mr. Earle, which were right heartily given by all ranks, and the parade was then dismissed.

COLONEL BAKER.

Hon. Col. Baker, Provincial Secretary, who returned last night from the Mainland, said that the contest in his constituency was happily and successfully over, with a good majority in his favor; but Mr. Sohon had received more votes than had been expected at the commencement of the contest. "This may," said the Colonel, "be attributed to his having stolen a march on me while I was engaged on the Fraser river. In addition, the strong personality of Mr. Sohon must have great weight in any contest he undertakes. He did not descend to any personal matters and refused to allow the distribution of some most scurrilous posters which had been sent out by the committee at Vancouver. In fact he behaved on the whole in a most courteous manner. The contest may be said to have been a narrow one, as it kind as at all meetings Mr. Sohon's object appeared to have been to land his opponent with praise and find fault with his party."

At the time Col. Baker pointed out that, granting Mr. Sohon were returned as he desired to be, he was without a leader and without a policy. It would appear, said Col. Baker, that a number of people voted against him on account of misunderstandings about the various companies and individuals, some of which are highly amusing. All who had much at stake in the country were found on the side of the colonel to whom it is exceedingly satisfactory to find that the great majority of the electors in his own part of the district (some 86 in number) voted solidly for him, many coming as far as sixty miles to do so.

Col. Baker gives a good account of the mining prospects of the southern portion of the Kootenay. Several valuable leads of gold and silver have been discovered, but the depression in silver which is affecting other mining districts of the country is felt in that section and causes business to be stagnant.

MARINE MOVEMENTS.

Free access to the North Pacific ocean will be given of all sailing vessels after Sunday next awaiting the arrival of the open sailing season, and there are now about fifteen schooners and various companies and individuals, some of which are highly amusing. All who had much at stake in the country were found on the side of the colonel to whom it is exceedingly satisfactory to find that the great majority of the electors in his own part of the district (some 86 in number) voted solidly for him, many coming as far as sixty miles to do so.

Col. Baker gives a good account of the mining prospects of the southern portion of the Kootenay. Several valuable leads of gold and silver have been discovered, but the depression in silver which is affecting other mining districts of the country is felt in that section and causes business to be stagnant.

BRITISH COLUMBIA MINING.

This well-known miner of Cariboo, who has been on the Pacific Coast since 1853, is at present in Seattle. In an interview with a reporter he said that mining operations on the Fraser river were especially active. The Hydraulic mining is paying well. The Van Winkle mine at the mouth of the Lytton river a few days ago made a clean-up of \$1,500 after a two weeks' run. A new mining company is working the hills back of the town of Lillooet, which will be remembered by all old miners on Fraser river, and is making the dirt pay well. It is said that \$1 a yard is the usual amount of gold found in it. The company is preparing to bring in about 2,000 inches of water by a ditch from the Fraser river, and operate on an extensive scale. The river bars in front of Lillooet were worked as far back as the first gold excitement on the Fraser.

Mr. Ramos is not however so sanguine of the success of the various pumping and dredging machines on the river. The suction pumps which it was thought would work a revolution on the bars are not doing as well as expected. The small gravel on top is taken up by the suction pump all right, but as soon as the light top gravel is removed the bars are full of large boulders in which the pump will not work. The same objection is made to the "clam-shell" dredge; it will take up large stones and let the small gravel containing the gold escape. One of the suction pumps at one time made \$18 in two hours for its owner and then broke down. The bars will pay about \$1 a cubic yard, it is thought, if by method of working them is ever discovered. One gentleman has invented a method to suction pump dredge which will work something on the plan of a potatoe digger. It is a pointed cage to be placed on the bottom of the suction pipe. The bars of the cage are sufficiently close to exclude all large boulders, yet allow the small gold-bearing gravel to pass into the pump. This attachment may solve the problem of working the bars.

PUBLIC SCHOOL BOARD.

Appointments to the Teaching Staff of the Victoria Collegiate Institute.

Tonic Sol Fa System in the Schools—New Rules for City Janitors.

The School Board met last night, Mr. Charles Hayward in the chair, the other members present being Trustees Lovell, Saunders and Glover.

A. C. Ewart, the architect for the new Pemberton gymnasium, wrote stating that the building would be completed by August 2, and inviting the trustees to go through it before it was taken over from the contractor. Filled and invitation accepted.

Mrs. J. Smith wrote asking that her two children might be allowed to continue at the Central school. Laid on the table.

Mr. Sohon, the architect for the North Ward school, wrote that he would refuse to accept the material that the contractor was filling up the grounds with. Received and filed.

B. Cassidy wrote that he was instructed on behalf of Thomas H. Tye to claim \$800 damages for the breaking down of the fence between his property and that of the Douglas street school. If not satisfactorily arranged legal proceedings would be taken.

TRUSTEE LOVELL moved that the letter be received and filed. The board could not consider there was any claim on the fact of the matter seemed to be that Mr. Tye had been simply allowed the use of someone else's ground for several years.

Recorded and filed.

D. Graham wrote that he had interviewed Superintendent Pope on the subject of tonal sol fa singing in the schools and had been told that the department would be willing to introduce the system if the board of trustees agreed.

TRUSTEE SAUNDERS moved that Mr. Graham be retained at \$80 a month, to teach the tonal sol fa system in the schools, subject to the approval of the Department of Education.

TRUSTEE SAUNDERS thought that one difficulty in the way was that the estimates for the year had already been sent in.

TRUSTEE SAUNDERS said Mr. Graham would be willing to start in at once and wait for his salary till the beginning of the year, when the board would be in a position to pay.

TRUSTEE LOVELL thought that a committee should be appointed to arrange the matter and report at next meeting.

TRUSTEE SAUNDERS withdrew his motion and Trustee Lovell's suggestion was carried. Messrs. Saunders and Lovell being appointed the committee.

C. Brand and Co. wrote, offering to sell man and chalk to the board. Referred to the supply committee to act.

The Nanaimo school board, contemplating the erection of a new school, wrote asking information about the new schools recently erected in Victoria. The Secretary was instructed to reply.

A new set of rules for janitors was submitted by the Chairman to the meeting. He had, he said, drawn these up as the old rules were unsatisfactory and not sufficiently definite.

The regulations were read, found favor in the sight of the board, and were adopted. A number of applications for positions as teachers were laid on the table.

The usual batch of bills was referred to the finance committee for payment if found correct.

The board then went into committee of the whole on the applications for positions of second and third master in the Collegiate Institute.

Mr. Nell Heath, B.A., was appointed second master and Mr. John Simpson, M.A., third master, thus making the full staff of the institute as below:

Salary Per Month.
E. R. Paul, M.A., principal.....\$120
Nell Heath, B.A., second master.....110
John Simpson, M.A., third master.....100
A. J. Pines, B.A., fourth master.....90

SPORTS AND PASTIMES.

Opening of the B. C. E. A. Annual Meeting—Canadians Returning From Bisle.

Programme for the Championship Meet of the British Columbia Cyclists.

LONDON, July 25.—The majority of the Canadian side team called for home by the Canadian from Liverpool on Thursday week. The winners of the team were: Staff Sergeant, Ogd, £21 15s.; Capt. Moore, £21 10s.; Staff Sergeant, Davidson, £20 10s.; Staff Sergeant, Simpson, £20; Lieut. Mitchell, £18 10s.; Private Bayles, £18 12s.; Private Bertram, £18; Gunner Turnbull, £8; Staff Sergeant, King, £7 14s.; Private Hayhurst, £6 13s.; Corp. McNaughton, £6 10s.; Private Johnston, £6; Staff Sergeant, Mitchell, £5; Lieut. Curran, £4 10s.; Sergeant-Major Case, £4; Lieut. Ode, £3 14s.; Private Milligan, £2 10s.; Staff Sergeant, Ball, £1 10s.; Private Kaunbury, £1; Lieut. Williamson, £1. The general winnings being divided, each man has from this source no less than £18 13s.

AT GOLDSTREAM TO DAY.
The Vancouver and Westminster riders who will take part in the provincial rifle meeting arrived by last evening's steamer. The matches, which will continue for three days, commencing this morning, the first being open only to recruits who have never won a prize, for a series of prizes presented by Lieut. Colonel Peters, D.A.G. The extra series matches will also be in progress during the morning. The important event of the day takes place in the afternoon, this being the Helmsken match, at 200, 500 and 600 yards, seven shots at each range. The top scorer will win the handsome "Dorothy" medal, of gold, presented this year as usual by Mr. E. Dallas Helmsken. Combined with this match is one for teams, with the Laurie bugle as the chief prize to be contested for between the companies of this military district, the winners to hold it for the year.

LAWN TENNIS.
THE TOURNAMENT ENTRIES.
Entries for the club singles handicap have been coming in rapidly. As the list for this event does not close until 8 o'clock this evening, ample opportunity will be afforded those members who have not yet entered their names. A list of the other entries given in another column and entries for the same should be sent to the hon. secretary no later than Saturday.

LACROSSE.
"STARS" V. "JAMES RAYS."
All arrangements have been completed for the match next Saturday between the Stars and the James Rays of this city to be played on the Caledonia grounds. Both teams are in excellent condition with chances slightly in favor of the Stars. Mr. C. L. Cullin has been agreed upon as referee.

THE WHEEL.
THE CHAMPIONSHIP MEETING.
The following is the proposed programme of the annual provincial meet to be held at Vancouver on the 26th May, 1893, it only requires the approval of the racing board to become the final and official card:

1. One mile (novice)—open.
2. Quarter mile (tying start)—open.
3. Two mile handicap.—open.
4. Quarter mile championship.—open.
5. Two mile—open.
6. One mile handicap.—open.
7. One mile (obstacle)—open.
8. Half mile—open.
9. Three mile (handicap)—open.
10. Five mile championship.—open.

CRICKET.
VICTORIA V. NAVY.
The following eleven will play the Navy on the Canteen grounds, the match commencing at 2 p.m. Players for the team to leave on the 1:30 train for Esquimalt: Messrs. J. D. Helmsken (captain), C. E. Pooley, J. A. Crabbe, B. J. Perry, E. W. C. Hilton, J. W. Sinclair, A. G. Smith, C. S. F. Morley, S. F. Morley, C. N. Gowan and C. P. Wallace.

TO OPPOSE THE ALBIONS.
The following is the eleven of the Victoria C.C. selected to oppose the Albions next Saturday: Messrs. G. E. Barnes, A. J. Crabbe, A. T. Goward, P. E. Irving, S. F. Morley, B. J. Perry, C. E. Pooley, C. W. Wallace, A. G. Smith, W. A. Ward, W. Wallis.

THE TURF.
LIVERPOOL CUP.
LIVERPOOL, July 25.—The race for the Liverpool cup and twelve hundred sovereigns was won by Bon-a-gun, Busey Park second, Newmarket third.

YACHTING.
THE "VIGILANT" VICTORIOUS.
ROCHE'S POINT, Ireland, July 24.—The Britannia and Vigilant to-day raced for the cup valued at 100 guineas offered by the Royal Yacht Club, the race being won by the Vigilant. The course was the same as yesterday. There was a light northeast wind, with rain. The Britannia was slightly in the lead crossing the starting line but the Vigilant, on the last lap, overhauled her and won the race by a minute and a half ahead, and she finished 4 minutes and 35 seconds ahead of the Britannia.

"BRITANNIA" RACED ALONE.
QUEENSTOWN, July 25.—The Vigilant did not start in the race to-day, owing to the fact that the injury to the jaws of her gaff which occurred in yesterday's race had not been repaired. Work was pushed throughout the night to repair the injury, but the repairs were unsatisfactory and not sufficiently definite.

The regulations were read, found favor in the sight of the board, and were adopted. A number of applications for positions as teachers were laid on the table.

The usual batch of bills was referred to the finance committee for payment if found correct.

The board then went into committee of the whole on the applications for positions of second and third master in the Collegiate Institute.

Mr. Nell Heath, B.A., was appointed second master and Mr. John Simpson, M.A., third master, thus making the full staff of the institute as below:

FRASER VALLEY RELIEF.

Report of the Committee—More Funds Required to Meet Cases of Distress.

Impossible to Estimate Actual Needs, But They Will Last for Some Time.

The following report dated Westminster, July 21, has just been issued by the Fraser Valley Relief Committee:

In pursuance of the authority conferred upon this committee at the general meeting of the mayors and boards of trade representing the cities, and the reeves and others from the flooded districts, held at New Westminster on 12th June last, the committee proceeded at once to ascertain as far as possible the needs of the sufferers by the recent flood, the plan adopted being to receive applications for relief only through the reeves or resident clergymen representing the various municipalities, and acting on their recommendations.

The inquiries thus made have discovered that relief has been very generally required, and the committee has already received some 147 cases, and further applications continue to come in. The relief so far has been merely temporary, taking the form of provisions to supply immediate want and some seed for sowing this season. The question of fencing has yet to be taken up, for in nearly all cases the loss of fencing has been very great. Applications have been received for fencing material to the value of \$8,000, based on a three-wire or three-board fence at the option of the applicant. Practically no fencing has yet been distributed, but the committee has already incurred responsibility in this direction by the purchase of wire now in transit to New Westminster.

The relief given out by the committee up to the present date amounts to about \$2,100, and funds to enable the committee to meet the expenditure are immediately required. The loss to the sufferers generally has no doubt been extremely heavy, and the committee fully recognizes the fact that it cannot attempt to approximate that loss with any estimate of the value of the property limited to cases of actual distress, and it is not as yet ascertained how far the committee is able to meet the needs of the sufferers. The committee is not able at present to make any estimate of the value of the property lost, but it will be required to meet cases of distress between the present date and the coming spring; but, while it is not disposed to exaggerate the situation, there can be no doubt that the condition of many of the sufferers, as reported by the reeves and others, is such that assistance will be urgently needed for many months to come, and a considerable sum in addition to that above mentioned will be required for relief.

The committee, therefore, deems it necessary to urge upon the donors the necessity to give or procure funds for this purpose to use every effort to do so without delay.

THOS. LEWIS, Secretary.
New Westminster, B.C., July 21, 1894.

FULL COURT.
(Present: McCreight, Drake and Walkem, JJ.)
Adams v. McCreight. This was an appeal from the judgment of the Hon. Mr. Justice Crease, pronounced on the 26th May, 1893, in which it was declared that the will of Samuel Adams, made on the 11th November, 1891, in favor of the defendant, McCreight, had been obtained by fraud and by reason of undue influence, and directing that the probate of the will should be set aside.

The trial was a very lengthy one, the material facts of which were published in these columns as the case progressed, as well as the learned judge's exhaustive judgment, the effect of which has been shortly stated above.

The grounds on which the appeal is based are, as set out in the notice of appeal: that in order to support the judgment setting aside the will on the ground of undue influence, it must be proved that the said will was executed under the influence of coercion or fraud, or that the testator was at the time of the execution of the will in such a state of mind as to be incapable of disposing of his property, or that the said will had been obtained from the testator by fraud of the defendant. That the facts and circumstances disclosed in evidence did not establish such a case against the defendant; but, on the contrary, it was proved that the instructions for the will originated with and were given by the testator personally; that the will was drawn according to his instructions; that he knew and approved of the contents of the will before and after its execution; that he executed it voluntarily, and without any improper influence being brought to bear upon him by the defendant or anyone acting on his behalf; and, finally, that the judgment is against the weight of evidence.

The appeal was originally set down for hearing on the 10th July, 1893, but, owing to one circumstance and another, was adjourned from time to time till at length an entire year was consumed, and the case reached the court of appeal. Hon. Theodore Davies, Q.C., with Mr. Walls, appears for the plaintiff, respondent, Adams, and Mr. Francis V. Bodwell, with Mr. B. G. Hall, for the defendant, appellant, McCreight. Yesterday commenced argument, and it is more than likely that the case will go into at least two or three days.

THE WORLD'S MILCH COWS.
(Continued Review.)
Englishmen are the milch cows of the world. They are the great lenders from whom all nations borrow. For generations they have been rich and saving, until at last their annual accumulations have become greater than the annual openings for legitimate investment. So severe has the pressure become that latterly the money lender has been forcing his money into every kind of undertaking, in all parts of the world, such as the building of railways, the corresponding desire to borrow. It is the weight of uninvested money which stimulates borrowing not the expediency of the impiousness. Borrowing has not produced lending, but lending borrowing. Interest has continued to fall because there are more lenders than borrowers. If Englishmen think, then, that any communities have dipped too deep into the English purse, they can easily apply the corrective by creating by their own eagerness to lend, the corresponding desire to borrow. It is the weight of uninvested money which stimulates borrowing not the expediency of the impiousness. Borrowing has not produced lending, but lending borrowing. Interest has continued to fall because there are more lenders than borrowers. If Englishmen think, then, that any communities have dipped too deep into the English purse, they can easily apply the corrective by creating by their own eagerness to lend, the corresponding desire to borrow. If Englishmen think, then, that any communities have dipped too deep into the English purse, they can easily apply the corrective by creating by their own eagerness to lend, the corresponding desire to borrow. It is the weight of uninvested money which stimulates borrowing not the expediency of the impiousness. Borrowing has not produced lending, but lending borrowing. Interest has continued to fall because there are more lenders than borrowers. If Englishmen think, then, that any communities have dipped too deep into the English purse, they can easily apply the corrective by creating by their own eagerness to lend, the corresponding desire to borrow. It is the weight of uninvested money which stimulates borrowing not the expediency of the impiousness. Borrowing has not produced lending, but lending borrowing.
