THE GENUINE SILVER-STEEL, Lance Tooth CROSS-CUT SAW!

It stands without a rival, and is the fastest cutting saw in the world. It has beaten the best Canadian and American made saws 75 per cent in every contest. Its superiority consists of its excellent temper. It is tempered under the secret Chemical Process, which toughens and refines the steel. It gives a true and keener cutting edge, and will hold it twice as long as any other process. We have the sole right for this process for the Dominion of Canada.

None genuine that are not like the above cut, with registered trade mark with the word "The Lance," and Maple Leaf with our name. Price \$1 per foot. Beware of Counterfeits. There are in the market many counterfeits, which are intended to be sold at a high price upon the reputation of this saw. We will send to any address a saw exactly like any counterfeited, warranted equal in quality or no sale, at five per foot. These are not to be confused into passing a first class price for a second class saw. A test to bear in mind is that if the material steel temper is not of the very best quality the shape of the teeth is not something. A saw, like a knife, will not cut without it will load a keener cutting edge. We have cut off a 14 inch round basswood log in eight seconds with this saw. Manufactured only by
