

## The M'Cormick Will develop more power from a given quantity of water than any other Turbine.

IT WORKS WHERE IT GIVES MORE THAN DOUBLE THE POWER OF MOST WHEELS OF THE SAME HEAD, AND FOR THE SAME REASON, IT HAS THE COST IN LESS THAN HALF.

These statements are based on tests made in the Holyoke Testing Flume, where the M'Cormick Turbine recorded over 80 per cent. of efficiency—some of the larger sizes over 85 per cent.
