

- Declaration of locations where certain chemical explosions are conducted routinely
- Prior notification of chemical explosions above a designated threshold
- Post event notification of unscheduled events/of all explosions above a designated threshold
- Sensor deployment at a limited number of specific sites, such as mines, which have chemical explosions above a designated threshold
- Visits by an inspection team of the Organization at such specific sites

*Dependent upon the outcome of discussions on the above listed transparency measures, in this section language could be introduced describing agreed transparency measures in detail and appropriate procedures to be applied.]*
