

The material scanned for CAB Abstracts includes the following: scientific journals, books, monographs in series, textbooks, technical reports, published theses, symposia, conference proceedings, review journals, patents, annual reports, bibliographies and guides, and translated journals. The dates covered are 1972 to the present. The database is updated monthly.

## 2.5 Medline

Medline (Medlars on-line), produced by the U.S. National Library of Medicine, is one of the major sources for biomedical literature materials. Additional materials not published in Index Medicus are included in the Medline database in the areas of population and reproductive biology. Abstracts, which are taken directly from the published articles, are included for over 47% of the records added from 1975 forward. Records added before 1975 do not contain abstracts; records added from 1984 to the present have abstracts for about 59% of the records. Approximately 300,000 records are added per year, of which over 75% represent publications written in the English language.

Subject coverage includes Clinical Medicine, Experimental Medicine, Hospital Literature, Population and Reproductive Biology, Pharmacology, Psychiatry, Environment and Public Health, Veterinary Medicine, Pathology, Anatomy and Physiology, Microbiology and Parasitology, Toxicology. Medline indexes articles from approximately 3,300 journals published in over 70 countries. Dates covered include 1966 to the present.
