changed to 1/2 down, oats off 1/2 to 1/2 and provisions varying from 10cd decline to a rise of 5c.

Nearly twice as much wheat arrived at the principal terminals today as the total amount on the corresponding date a year ago. Besides, the figures for the week exceeded by 2,500,000 bushels the record for the preceding seven days. In this connection it was said that so much wheat had already been sold to go to Europe that exporters were becoming reluctant to take the risk of contracts which called for shipment during November.

Corn Sold Off.

Fine weather put something of a check on the bulls in corn. Account was also taken of the setback in wheat. On the other hand. French sales to Europe were reported, and it is said that the new federal grading would delay the marketing of a great deal of corn which was moist. Oats were governed chiefly by the action of wheat and corn. The December option seemed to be under considerable selling pressure from cash houses.

Buyers held off in the provisions market. Offerings were only moderate.
