

SKULL OF A HUMAN FETUS
CHARLES CLIFFORD MACKIN

PLATE II

14. Coronal section through head showing dorsal part of ethmoidal and ventral part of orbitotemporal region. Asymmetry is due to obliquity of section. The posterior clinoid process on the left side (right side of illustration) is shown joining with the side wall; on the other side, in which the plane of section is posterior, the process is completely joined to the ectethmoid.
