

Even With Cut, Power Company's New Rates Double Hydro Figures

Move on Part of Power Company Will Only Increase Determination to Secure Musquash Current. Some Striking Comparisons.

A comparison of the new rates for some of its services announced by the New Brunswick Power Company with those which will be in force under hydro will stimulate the citizens in their determination to secure the Musquash power at cost. For example:

On the basis of 25 K. W. H. for lighting and 150 K. W. H. for cooking and heating, the monthly bill will be, under the N. B. Power Company's rates, \$7.50 a month net, ten days, no discount.

Under hydro the bill will be \$4.40, less 10 per cent, or a net bill of \$3.96 a month.

Under the Power Company's schedule of rates there is a fixed minimum monthly charge of \$8.00, even if no current is used.

Under hydro the fixed minimum monthly charge will be on the basis of 1,000 square feet of floor space, thirty cents. In other words, the fixed minimum monthly charge of the Power Company is, in the above example, within ninety-six cents of the total bill for the current consumed under hydro. Moreover—and don't overlook this fact—users of the N. B. Power Company's current for cooking as well as lighting purposes will have to have two metres in their houses and two sets of connecting wires, whereas with hydro only one metre and one set of connecting wires will be necessary.

So much for that. Now take the case of a commercial user:

With a connected load of three kilowatts and a consumption of 500 K. W. H. a month the bill under the Power Company's rates will be \$36.00 a month net. No discount. And there is a fixed charge of \$1.00 a month.

Under the hydro rates this bill will be \$16.20 net, which is less than half the Power Company's charge. Under hydro there is no fixed charge for commercial users.

Now take the example of alternating current for power purposes. With a 50 horse power motor and a consumption of 9,830 K. W. H. per month, the bill under the N. B. Power Company's new schedule of rates will be \$900.25 per month net. No discount.

Under the hydro rates, the monthly bill would be \$153.27, or a net saving of \$146.98.

And many other comparisons, even more favorable to hydro, can be made.

NOW THE TIME TO ENCOURAGE IMMIGRATION

Canon Heene, Home from England, Says if We Do Not Get Many in Spring it is Our Own Fault.

Quebec, Nov. 18.—The Canadian Pacific 14,000 ton steamship Minnedosa from Antwerp, Cherbourg and Southampton, in command of Capt. H. Gibbons, with 515 passengers, arrived at Quebec at seven o'clock last night.

Rev. Canon Bertal Heene of Winnipeg, who was among the cabin passengers, during his visit to England preached and lectured in several cities, and was invited to preach at the cathedral of Canterbury, and afterwards received by His Grace the Primate of all England, who manifested keen interest in Canada.

Canon Heene said that the most important question in Canada's industrial life at the present time was immigration. "Everywhere in England I was astonished at the number and the quality of the audience. We have lost three years and more on this vital question. Australia is awake and doing wonders against odds. Agricultural conditions in the Mother land are unsatisfactory. Young men are impatient to try life in Canada. If we do not get them next spring in great numbers it is our own fault.

European immigration needs more consideration and sympathetic action in favor of admitting all European nationalities under proper safeguards.

PHOTOGRAPH 96 FT. LONG, 10 FT. HIGH

Chicago Museum Curator Makes Large Pictures of Lake Dune Region.

Chicago, Nov. 18.—A photograph ninety-two feet long and ten feet high, one of the largest ever made, has been completed by Dr. Frank M. Woodruff, curator of the Chicago Academy of Sciences, in Lincoln Park. It shows a panorama of the Michigan shore at Miller Beach, near Gary, Ind.; the famous Indiana sand dunes, the sluggish Grand Calumet River, and the swamps and swale stretching eastward to Chicago. The photograph is tinted in natural colors.

The picture is one of four immense panorama photographs which, when all are complete, will form the background of exhibits showing the birds, animals, reptiles, trees, and flowers common now or in earlier days in the "Chicago region."

A second picture seventy-two feet long and ten feet high has been completed, and the other seventy-two feet long are to be made. When complete the scenes will show typical life at various points of the sand dune region, through the swamps to the Calumet Sag, north through the prairie, and back to the lake some twenty miles above the north shore suburbs.

The photographs mark the advent of a new art, and have displaced oil paintings costing thousands of dollars. A picture ninety-two feet long can be produced, according to Dr. Woodruff, for less than \$100, and the tinting in transparent oils costs but a small amount, as compared with the heavy cost of oil-paintings. Any artist who understands color can do the tinting, he says, as the photograph itself furnishes the high lights and shadows.

Photographic backgrounds, according to government ornithologists who recently inspected the pictures during the convention of the American Ornithologists Union, mark a milestone in museum displays. Unlike the oil paintings formerly used, they are made in every detail, and the perspective is much better.

Birds, animals, trees and special objects can be added to the background, Dr. Woodruff found, by enlarging their photographs on the original, cutting out the picture, tinting it and sticking it on with a pin.

In making the immense photographs Dr. Woodruff, who took all the original pictures himself, had to develop new methods and special equipment. The photographs are printed in 10x11 foot sections, each section being the enlargement of one 8x10 negative. Developing papers in strips eleven feet long and forty inches wide are used, three strips being mounted on the printing board at a time. To develop the huge prints an immense tray is mounted on wooden horses and four men drag the paper back and forth while a boy wearing rubber boots climbs into the developer armed with a swab mounted on a broomstick handle and assists their efforts.

Pheasant birds resembled the early airplanes in their small wing expanse and large tails.

Troop Colors are Presented to the Y.M.C.A. Boy Scouts

Presentation of colors to the two Y. M. C. A. Boy Scout Troops was the principal feature of a boys' night held in the Institute last evening. The flags were a gift from the Institute in recognition of the good work that has been accomplished by the boys since the formation of the troops last summer.

The programme started with a basketball game at five o'clock, the team from Troop 10 defeated the Troop 18 team, 11-7. The winner was composed of Scouts Chandler, McGourty, Kennedy, O'Leary, Breen, J. B. Barry, the Scoutmaster, Newman, Nugent, Lyden, Murphy, McGowan and Kirk. Each troop is now organized into two teams, and a league is being arranged.

After a plunge in the tank, the boys, including the Scoutmaster, presented the presentation of troop colors to the Scoutmaster of the Institute, sat down to a supper which was greatly enjoyed, and during which Eugene Bennett and his son, members of a company now playing at the Opera House, delighted the boys with a few good songs.

The boys then adjourned to the gymnasium floor, where they witnessed the presentation of troop colors to the two troops, who were drawn up in horseshoe formation. J. E. Quinn, Scoutmaster of the Institute, presented complimentary words, presented the colors to the scoutmasters, W. E. Heistering and F. X. Jennings, who in turn handed them over to the troop standard bearers, Don Chandler and Hugh Fitzpatrick, respectively.

Rev. W. Duke also addressed the boys, complimenting them on the showing they had made in the recent field day competition, and also in their success in bringing the Thorne trophy to the Institute.

Mr. Short, district commissioner, spoke a few words on Scout principles and urged the boys to keep up the good work. He referred to the coming visit to Canada next spring of the Chief Scout, Sir Robert Baden Powell, and the projected visit of Rodney C. Wood, camp chief for Canada, this winter.

It is planned to have the new colors consecrated in the near future.

A STRAIGHT TALK TO EVERYONE USING DRUGS AND PILLS

Internal Bathing is the only quick relief and natural remedy for constipation, piles, headaches, biliousness, indigestion, and all the ailments which result from the use of cathartics, pills, and kindred ailments.

Nothing that comes out of medicine bottles or pill boxes is going to put the bowels of health into you, check the merry tingle into your laughter, or that glorious old slip back into your system which makes you spring from bed in the morning, eager for work and with a good appetite. Physicians are agreed since the dawn of history that the first step in bringing the body back to sound health is to make it clean inside as well as out.

Because ninety-five per cent. of all human ailments are attributed to the accumulated waste in the lower intestine which poisons the system. This is due to the sedentary life we live. Witness the increasing deaths from Cancer! Don't temporize with pills and medicines. The natural way to rid the system and keep it free from impurities, is by bathing internally with Dr. J. B. L. Cascade, which keeps the intestines sweet and clean naturally. You cannot have Constipation, Piles, Biliousness, Headache, Stomach trouble, Kidney, Liver and other kindred complaints, unless the bowels are constipated.

The J. B. L. Cascade is shown and explained at Clinton Brown's, Druggist, 375 St. John Street, St. John, N. B.

Ask for a free booklet, "The What, How and Why of Internal Bathing," or write direct to Tyrrell's Hygienic Institute, 165 College Street, Toronto, Ont.

Thousands Of Women Are Now Taking This Newer Form Of Iron

Worn-out Housewife Tells How She Quickly Regained Her Health and Strength.

"Only a short two weeks ago I was so nervous and worn-out from the drain on my nerves and strength of household drudgery, that though I could not keep up another day, and do not have any more household duties, I am now as strong and healthy as ever."

"The above is a typical household case," says Dr. James Francis Sullivan, formerly physician of Bellevue Hospital, Westchester County Hospital, and the Westchester County Hospital. "You can feel well and strong and full of vigor and power unless your blood is rich and contains enough iron to enable you to resist and overcome disease and take normal action in your body. Without iron your blood becomes thin, and the following household duties, indigestion, headache, and feel all 'run-down' and tired out."

When your blood lacks iron do not waste your time taking stimulating medicines or narcotic drugs, but directly enrich your blood with the newer form of iron sold by all druggists under the name of Nuxated Iron. It is like the iron in spinach, lentils, and apples, and is in a form easily absorbed into your blood.

Get a bottle of Nuxated Iron today. Take it for two weeks and if you have not like thousands of others, obtained more restful sleep, stronger nerves and energy, and your hair will grow again, you will sell your Nuxated Iron with this 'satisfaction' or money back guarantee.

TURN HAIR DARK WITH SAGE TEA

If Mixed with Sulphur It Darkens So Naturally Nobody Can Tell.

The old-time mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grandmother's recipe, and folks are again using it to keep their hair a good, even color, which is quite as desirable as being in an age when a youthful appearance is of the greatest advantage.

Newsdays, though, we don't have the troublesome task of gathering the sage and the messy mixing of hot water, Sulphur Compound, it is a very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, but what does it do? Weyth's Sage and Sulphur Compound, is that, besides beautifully darkening the hair for a few weeks, it also produces a soft lustrous and appearance of abundance which is so attractive.

MORNING NEWS OVER THE WIRES

Chancellor C. C. Jones of the U. N. B. and Dr. Murray MacLaren, chairman of the finance committee of the university, will attend a meeting in the hall on Tuesday next to confer upon the proposal for university federation in the Maritime Provinces.

A meeting of the Liberal-Conservative Association of Montreal was held there last night and the chief speaker was Hon. C. C. Balfour, former minister of marine and fisheries. He addressed the meeting in the absence of Sir Hon. Arthur Meighen, who was unable to be present. In closing he urged his hearers to be ready for an election. He prophesied that there would be either a fusion of the Liberal and Progressive parties or a general election.

In the case of the King against Reuben Dickie of Campbellton, charged with opening and allowing others to open his Majesty's mails, the Crown was represented by M. A. Kelly of Campbellton and the accused by H. A. Carr of Campbellton and H. Powell, K. C. of St. John. Judge McLachey is the presiding judge. The case was taken up yesterday in Dalhousie and argument concluded. The jury was out ten minutes and returned with a verdict of not guilty.

COAL SEIZED AT HOME OF MRS. ROBI. W. GOELET

Newburgh, N. Y., Nov. 16.—Continuing his search of wealthy homes in this section for coal supplies in excess of the quantity prescribed by William Perkins, the Fuel Administrator, today seized three cartons of chestnut coal on the property of Mrs. Robert W. Goelet, near Chester. Yesterday 393 tons were seized on the property of J. P. Morgan, at Highland Falls.

Investigators found fifty tons of coal piled near the barns of the Goelet property, it having been impossible to house all of the delivery. Mr. Perkins directed a local dealer to distribute it in one-ton lots to residents of Chester and Florida, nearby hamlets, which had no anthracite.

The regular meeting of the Trade and Labor Council was held in the hall on Wednesday. The president, F. S. A. McMullin, was in the chair. Routine business was transacted, there being no special business before the board.

RADIUM AT LOW PRICE PROMISED

Colorado Company Says a Merger with Belgian Producers will be Boon to the Medical Profession.

New York, Nov. 17.—The distribution of radium at a remarkably low price to the medical profession is promised as the result of a consolidation of Belgian and American interests effected at Brussels, according to an announcement by the Radium Company of Colorado. At a meeting in the Colonial Museum at Brussels, attended by King Albert and 800 eminent scientists, it was disclosed that the Societe Generale de Belgique had created, at a cost of 5,000,000 francs, a plant, which already was in operation, at Oolong, Belgium, for refining radium ores brought from the Belgian Congo.

"This plant," says the Radium Company of Colorado, "will exceed in size and capacity the sum total of all American plants formerly in operation. Because of the richness of the Belgian ores this will mean the cessation of all American manufacture of radium from the carnotite ores of Colorado, formerly considered the highest grade radium deposits in the world."

"In the development of this industry American aid has been solicited. The Congo discovery and the combination of Belgian and American efforts will result in offering radium for the first time in the history of the world at a remarkably low price to the medical profession, thereby conferring a blessing on suffering humanity by permitting more extensive use of this important therapeutic agent."

The announcement further says that since July last members of the executive and technical staffs of the Radium Company of Colorado have been in Belgium working out details of the radium enterprise, and that the Radium Company of Colorado, with main offices in Denver, which is to market the Belgian product in America, has formed a joint corporation with the Societe Generale du Radium to market radium throughout the world.

DEAF MUTE WAS BURNED

Enraged Tramp Set Fire to Bed of Papers Under Bridge.

Paris, Nov. 13.—Enraged at finding another mendicant occupying his habitable room, a vagabond called Trotsky tonight set fire to a bed of papers under a bridge at a late hour and finding an unoccupied space, thought it unadvised to wake the sleeping tramps. He returned and found the intruder he protested loudly, awakening all sleepers but the deaf mute, who fled in terror. The archer, who fled the shrill-voiced disturber away, but the man, enraged, returned after a few minutes with a lighted fire which not only dangerously injured the innocent deaf mute, but burned several other sleepers, who started a conflagration which required the attention of the Paris fire department.

Ends Stubborn Coughs in a Hurry

For real effectiveness this old home-made remedy has no equal.

You'll never know how quickly a cough can be conquered, until you try this old home-made remedy. Anyone who has coughed all day and all night, will say almost like magic. It takes but a moment to prepare and is as easy as nothing better for coughs.

A meeting of the Liberal-Conservative Association of Montreal was held there last night and the chief speaker was Hon. C. C. Balfour, former minister of marine and fisheries. He addressed the meeting in the absence of Sir Hon. Arthur Meighen, who was unable to be present. In closing he urged his hearers to be ready for an election. He prophesied that there would be either a fusion of the Liberal and Progressive parties or a general election.

Kelly of Campbellton and the accused by H. A. Carr of Campbellton and H. Powell, K. C. of St. John. Judge McLachey is the presiding judge. The case was taken up yesterday in Dalhousie and argument concluded. The jury was out ten minutes and returned with a verdict of not guilty.

NEW SOUTH WALES LABOR TO GO SLOW ON PAY CUTS

Sydney, N. S. W., Oct. 11.—(By Mail)—The "go slow" policy of the New South Wales Labor Council, as a weapon to counteract wage reductions and the lengthening of hours of work, has been adopted by a congress of trade union delegates representing sixty-two organizations.

It was decided to elect a state council from the congress to work with the Australian council of action and to draft definite proposals as a "policy of action" for the Australian trade union movement. "The council of action shall deliver its attack against the employers by the strongest action, union or industry men," an adopted motion said. "The employers shall be attacked at their weakest point."

Minnard's Liniment for Warts

IRATE SUBSCRIBER HURLS PHOENIX THROUGH

Rutland, Vt., Nov. 15.—Thomas D. Noel of Mt. Holly, lost his temper when he could not get "Central" on the telephone. He ripped the instrument from the wall of his home, dumped it into his automobile and then drove two miles to the home of the telephone operator and shied the fixture through the plate glass window in the front door.

In City Court he pleaded guilty to a charge of breach of the peace, paid a fine of \$25, agreed to repair the damaged door, and promised to treat the telephone with more respect in the future.

Turn To The Right Instead of the Left

Do Not Forget That On and after December 1, 1922

The Rule of the Road for the Province of New Brunswick will be "TURN TO THE RIGHT instead of the Left."

Like Grapes in September!

Rich clusters of Black Hamburg Grapes, their skins tight to bursting with goodness—they're never so sweet as when they come in on the crest of their season.

Tea, too. It holds its goodness for a season, then loses it a little at a time. Last year's tea is like last year's grapes.

The new crop of tea has just been gathered in the gardens of India and Ceylon. And it's the most delicious for decades.

Blue Bird is the first to offer this new season tea to you. For Blue Bird being the fastest selling tea was first to dispose of the last season crop.

So every package of Blue Bird offers you the new crop of tender young tips and baby blossoms. Want a royal cup of tea, right to your taste? Ask for
