Ganadian Successes

Exhibit Has Proved a Revelation.

Visitors Take Great Interest in the Pavilion, Which Is Crowded Daily.

It may well be said now that the success of the Canadian exhibition in Paris is assured. The juries, belonging to the different sections, have begun their visits, and with every one Canada is awarded prizes of which she may well be proud. These rewards do not consist of mere honorable mentions of marks of approbation, they are gold medals, and in many cases grand prizes. It is fortunate that our country has had the opportunity of making itself known, since to be known is to be apducts contained in the Canadian pavilion have been a surprise to a great number of visitors. Most of the Europeans

have very false ideas concerning our country, its productions and climate. and the many visitors entering the Canadian pavilion every day are a proof of the new interest taken in this part of Ameri-They come at first through curiosi-C2. ty and because of the sympathy existing between Canada and other countries, but having once entered they are attracted by the variety, the choice and the beauty of the exhibits. The Paris exhibition will therefore do much more towards making Canada known than all the visi-

than all that has yet been written about Let us glance at the mining section as it is represented in our pavilion, where occupies a prominent place. Mining being one of the principal industries of the Dominion, the government wished it to be represented in a manner worthy of its importance. The director of the cological survey at Ottawa, Dr. G. M. Dawson, superintended the collection of specimens of the different mines extend ing from the Atlantic to the Pacific Coast, so that a good idea might be given of their intriusic as well as collective value. The most important mines of Canada are represented by large specimens, which make this department not only one of the largest, but also one tion. This is the opinion of competent persons such as mining engineers, of Paris and elsewhere. This statement has moreover been confirmed in a most the universal exhibition of Paris. conspicuous manner by the great number

of awards given to Canada by the jurors of the mining section. It may also be stated that the prizes awarded to this Toronto department are twice as numerous as those won by England and other colonies. This collection is installed on the ground floor, and occupies a very large space. Coming in one is amazed at the artistic manner in which the different samples are laid out in glass cases on

Refused Admission to Canada-He Was Arrested at Halifax. (Associated Press.)

A SWEDISH MURDERER.

Halifax, N. S., Aug. 24.-Detective Power and Immigration Agent Clay, acting upon instructions from the department of justice, Ottawa, last night, arrested John Hannu, a Swede, on bcard the steamer Assyrian from Liverpool. Hannu is said to have committeed nine murders in Stockholm, Sweden, and after serving 12 years' imprisonment was deported from the country. Hannu boarded a steamer at Glasgow and was bound for Winnipeg; where he intended marrying a young Swede to whom, he said, he forwarded £4.000. Hannu applied for release through his

counsel this morning, intimating that he would at once leave Canada should the request be granted. The lawyers for the Dominion, however, refused to permit him to leave the steamer.

terpreter, admitted he committed the murders attributed to him. He admitted also he had escaped from prison several times and had threatened to commit more murders while in Sweden. He says the Swiss government pardoned him on condition he would leave the country, He declared that he had obtained free transportation to Canada.
