Twelve Colored Plates, and Three Hundred Illustrations in the Text.

Cloth, \$7.50; half morocco, \$8.50.

*Sold only by subscription.*

"He presents in the book before us all of value that is known upon the subject. The book is of great value to the pathologist, to the family physician, and to the surgeon. The chapters on the early recognition of cancer are so distinct and clear that a wayfaring man, though a general practitioner, should not err in giving or directing prompt and efficient relief."—*Medical News, New York.*

"A work of this class is an addition of real value to medical literature."—*Boston Medical and Surgical Journal.*

"We know that the Baltimore school of medicine has carried the utilization of clinical and scientific material almost to perfection, and this volume is a fresh witness to this truth. Lastly, the clinical features of the different varieties of uterine cancer and of innocent disease which simulate it are described very clearly so that Dr. Cullen's volume will be as useful to the practitioner as to the specialist and the teacher of pathology."—*British Medical Journal.*

"It represents the latest exposition of all that is known about cancer of the uterus, and we may say at once that as a monograph on this subject it absolutely eclipses any previous work. No one who wishes to be well informed on the subject of cancer of the uterus can afford to be without it."—*Medical Press and Circular, London.*
