

WATER POWERS ALREADY DEVELOPED

IT is estimated that in New Brunswick there has been developed to date about 13,000 horse-power. Of this amount 56 per cent. consists of small saw mills, grist mills and pulp mills, while the balance is made up of small electric plants from 100 to 500 horse-power capacity, and one plant with 3,800 horse-power installed. This plant, one of the largest single electrical developments in the province, is located on the Aroostook River at Aroostook Falls, but the greater part of the output is used across the border in the State

Power Plant on the Aroostook River, N.B.

of Maine. Small plants exist at Bathurst, Centreville, Edmunston, St. Stephen, Shediac and Woodstock, all of which are privately owned, except the Edmunston development, which is a municipal enterprise.

In Nova Scotia about 21,000 horse-power has been developed. Of this amount, 12,650 horse-power is used in the manufacture of pulp and paper, 2,700 horse-power consists of small electric light developments, 350 horse-power is used for gold mining purposes at Isaac Harbour, and the balance is made up of numerous saw mills and grist mills. Small electric light plants exist at the following places:—Annapolis Royal, Bear River, Bridgetown, Bridgewater, Dartmouth, Liverpool, Lunenburg, Yarmouth and Shelbourne. The plants at Annapolis, Bridgewater and Liverpool, are owned and operated by the Municipalities, and
