

THE DENTAPHONE.

A recent Scientific Invention, by means of which the deaf hear from the teeth. The sound vibrations are conveyed through the bones of the face and head by new channels to the nerves of hearing.

It consists of a thin flexible diaphragm, and weighs but a few ounces, can be folded and carried like a fan; which it resembles.

EXTRACTS FROM THE PRESS.

FROM THE REV. ISAAC ERRETT,

Editor of *Christian Standard*.

The Dentaphone is all that it claims to be.

February 20th, 1883.

It was found that the deaf, and partially deaf, could readily hear anything spoken in the room in an ordinary tone of voice.

Pittsburg *Presbyterian Banner*, Pa.

So carefully has the instrument been tested and so reliable is it in its effects that a man totally deaf for 40 years, was enabled by its aid to hear distinctly.

New York *Christian Observer*.

The efficacy of the Dentaphone is beyond all question, and it has the unqualified endorsement of leading journals in whose offices experiments and tests were conducted.

FRANK LESLIE'S,

Illustrated Weekly Journal,

The folding fan Dentaphone, is without doubt the best known form of apparatus for conveying sound to the auditory nerve.

The Medical and Surgical Reporter, Philadelphia, Pa.

I have no doubt that the Dentaphone will in time supersede every form of that very inconvenient instrument, the ear trumpet, and I believe aurists can make use of it in diagnosis of disease of the ear.

W. A. RATTACK, M.D.,

Prof. Pathology and Surgery, Cincinnati Medical College.

I have been partially deaf for six years. I find the Dentaphone of great value. I unhesitatingly recommend it to those similarly affected.

REV. FATHER J. H. BURWINKEL, Cincinnati, O.

My Daughter has been 22 years deaf. She finds it of great service in church, and values it very highly and hardly knows how she would get along without.

JAMES E. HUTT, Fenwick, Ont.

There are two sizes of this instrument. The ordinary conversational, \$12.00. The Concert and Lecture, extra power, \$18.00.

Address,

2 McNab St. South, Hamilton.

JOHN M. CAMPBELL & CO.,

General Agents.
