

Our Humane Societies promptly get on the tracks of a man who works his horses with bruised shoulders or other sores which inflict pain during work. Is a man who keeps cows in the condition just referred to, more justified than he who would thus use his horses? Surely, if our dairymen will not regulate this matter themselves, it is time that some one else, or our governments, took a hand in it.

It might be argued, what is a man to do if he is heavily stocked with cattle, and has little fodder with which to feed them? We certainly do not think a man is justified in keeping stock to starve, and if he cannot feed them properly he had better sell a portion of his herd, or else step down and out of the business. But, aside from this aspect of the question, a man who treats his stock in such a manner, stands to lose much in the way of returns which he otherwise would have secured from his stock, had they been properly cared for.

Dairymen in general agree that if a cow is allowed to run down seriously in flesh, that it takes at least two years to get that cow back to her normal production of milk. It has been amply demonstrated that a cow to produce largely must draw up on the energy stored up in her body, the feed she eats during the period of lactation will not suffice to produce a large flow of milk. Realizing these facts and believing them to be correct, it is a mystery why some farmers will starve their dairy cows, knowing that they are robbing themselves by so doing.

Our dairymen need a fuller appreciation of the principles underlying milk production, and until this is realized, we may expect to find cattle abused in this way through ignorance. As for the present, those who have ill-treated their cattle in this respect must pay the consequences in accepting diminished returns from their herds.

What They Say

The amalgamation of The Canadian Dairyman and The Farming World as one publication has proved a very popular move with the readers of both papers. Old subscribers of The Canadian Dairyman are pleased to see the improvement in size and appearance of the paper, and they are de-

SURPASSES EVERYTHING

"I received the pure bred Berkshire pig in good condition from Mr. S. Snowden, of Bowmanville, Ont. I am very proud of it. It surpasses anything in this part of the country."—J. J. McDonald, Glenagarry Co., Ont.

Note: This pig was sent to Mr. McDonald, as a premium for securing only seven new one year subscriptions to The Canadian Dairyman and Farming World at \$1.00 each. Our offer is still good. We will send you a pure bred Yorkshire, Berkshire, or Tanworth pig, eligible for registration, in return for seven new subscriptions. We have other splendid premium offers. If you are interested write us. Sample copies, etc., free. "The Canadian Dairyman and Farming World, Peterboro.

partment. Former readers of The Farming World like to receive the paper weekly—more than twice as often as formerly—as they are then able to study the market pages, which are kept strictly up-to-date, and which are proving to be one of the strong points of the new publication. Read what some of our readers have to tell us about ourselves:

"I would not be without your valuable paper for a good deal."—W. J. O'Brien, Russell Co., Ont.

"I appreciate The Canadian Dairyman and Farming World very much, especially the City Milk Supply Department."—W. S. Moir, Lanark Co., Ont.

"The Canadian Dairyman and Farming World is certainly a fine paper, and I hope to try to extend its subscribers in this settlement."—W. N. Morley, Strathcona Co., Alta.

"I like The Canadian Dairyman and Farming World very much, and do not like to miss a copy of the paper."—Mrs. A. Kennedy, Bruce Co., Ont.

"We find The Canadian Dairyman and Farming World of considerable service to us in our business, and cordially wish it every success."—Herbertson & Hamilton, Glasgow, Scotland.

A CHANCE FOR YOU

We want to increase our circulation. It is growing fast, but we want to keep it going. For this purpose, we have made a number of exceptionally liberal offers. What do you think of this one?

Secure a club of 50 new one year subscriptions to The Canadian Dairyman and Farming World at \$1.00 a year, and we will pay you \$35.00 in cash. On larger clubs, we will pay you a larger percentage over than this. If you do not secure 50 subscribers, we pay you liberal commission on what you do secure. We sign an agreement with you to pay this, so that you are safe. Write for particulars regarding our cash offer.

Perhaps you would like to secure some pure bred live stock. Send us a club of seven new subscriptions, secured at \$1.00 each, and we will send you a pure bred young pig, of any breed, and of either sex. Or, send us a club of 30 new subscriptions, and you will receive a pure bred calf, of any of the standard dairy breeds, with the exception of Holstein heifers. On account of the high price asked by breeders for these, we are obliged to ask you to secure 45 new subscriptions to secure one of these. All animals sent by us are pure bred, and secured from some of the best breeders in Canada. Write for sample copies.

Notes from Saskatchewan

Ed. The Dairyman and Farming World.—Wheat and oat seeding with very few exceptions, is completed and these grains are well up in our locality. Flax, of which a very large acreage is grown in this district, is well under way. Fifteen steam plowing outfits are working within a radius of fifteen miles of Drinkwater, all of which are breaking prairie to be seeded with flax, up to as late as the 15th of June. These outfits or most of them, run day and night, and plow from thirty-five to forty acres of sod in the twenty-four hours.

In 1907 little or no seeding was done until after 20th of May, so crops this year are at least three weeks ahead of those of last year. Prospects so far are very encouraging.

This being a comparatively newly settled district (mostly since 1902) cultivated meadows and pastures are very rarely found as yet, a few cases there may be of from two to five or ten acres of broome and rye grass.

The district has been favored with

RAPID BUNDLE DISCHARGE

No Tangles, Choking or Clogging

There's a big satisfaction in owning a Binder that ties securely, and delivers each bundle in perfect time with the other machine that cuts, elevates and delivers the grain to the packers. That's why our

Improved No. 3 Binder

is so popular from British Columbia to Nova Scotia. C. W. Harper, Brandon, Manitoba writes: "After trying your Improved No. 3 Binder, 4 ft. cut, in a very heavy piece of wheat (200 acres), I felt satisfied that this machine was all right, and decided to buy one. One thing I must say, it ties every sheaf, and elevates the grain." Each movement from the cutting of the knives to the discharge of the bundle promptly follows the other, like the movement of the train of clock-works. An important and indispensable part of the tying and discharge mechanism is the "eccentric wheel," shown in cut near large pulley. This wheel is used exclusively on Frost & Wood Binders. When compressing and tying the chain pulls over the large spool and makes a snug, tight bundle. When the knot is tied the chain runs over the short spool, thus making a rapid discharge of the bundle and a quick return of the machine to the next sheaf.

This one cut of wheat, excellent points. Our book "Frost & Wood's Way" tells these all. Send for it and our catalog of all our binders.

an abundance of rain to date, hence the prairie grass has made and is making rapid growth. It would be very difficult indeed to say exactly how many acres will be seeded al-

together, but a vast amount of new land still remains to be brought under cultivation. Raw prairie can be bought from \$10 to \$20 an acre in good localities.—A. H. Hawke.
