

Makes 'em Grow and Hustle

It takes *three weeks* to hatch a chick, and *three weeks* more to set it on the right road. The safe, sure and satisfactory food for newly hatched birds is *Pratt's Baby Chick Food*. You can feed it for the first three weeks at a cost of only 1c. per chick for the entire period. *Pratt's Baby Chick Food* is a perfectly balanced ration for baby chicks, supplying just the required nourishment and relieving the delicate digestive organs from useless strain. Remember, *Pratt's* is not a scratch feed. No other Chick Food can be "just as good," because *Pratt's* is the *only* preparation of its kind in the world that is 75 per cent. mechanically predigested. Makes the little ones grow and hustle, feather evenly and develop quickly into fine, healthy birds with long, deep, shapely bodies and plenty of vitality to fight off disease.
