

## COCKSHUTT

# HELP YOUR SEED BED AND YOU HELP YOUR BANK ACCOUNT

LAND Rollers properly used increase the wheat yield per acre as much as five bushels. A good roller easily pays its cost. A cultivator that clears

the land of weeds, using wide, medium, or narrow points, meets every farm need. Cultivating increases crop yield.

### F. & W. "CLIMAX" CULTIVATOR

THIS cultivator is built entirely of metal parts solidly riveted together to make a strong and rigid machine. The drag bars and braces are best steel.

The interchangeable wide, medium or narrow teeth are held to their work at the exact cutting angle for easiest draft. A relief spring prevents breakages against boulders.

The "Climax" may be set to work 6 inches deep, or just to skim the surface of the ground.

Let us send you the illustrated F. & W. Implement Book, giving full particulars. Get it free.

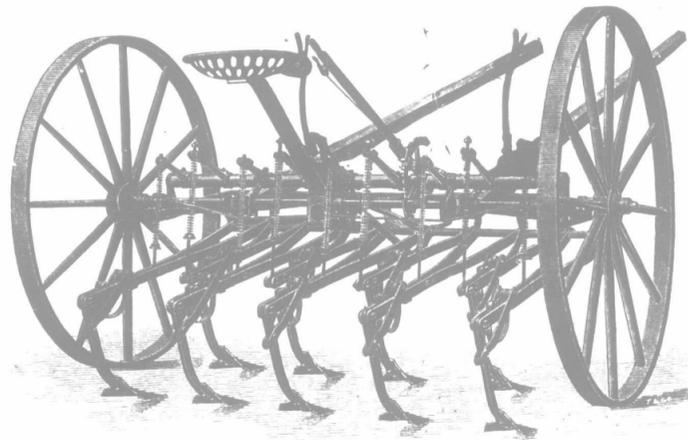

### GET THIS PERFECT STEEL ROLLER

ONE of the most useful implements on the farm is the roller. The F. & W. "Champion" has 2 or 3 drums, according to the width of 6 to 9 ft., made of heavy sheet steel with closed ends, and with heavy axles turning in roller bearings. It has a steel frame which will carry any ballast desired.

This roller will last a lifetime. The sheet-steel face cannot be dented by stones. Your seed bed will benefit by the use of this roller to pack the seed closely. It should be used on plowed sod before disking. It will help crop growth if used after rain to break crusted ground. A light-draft F. & W. or Cockshutt roller will help under nearly every condition of crop tillage.

We have several kinds of steel rollers in various widths. Let us send you the F. & W. Implement Book or the Cockshutt Catalogue. Free on request.

Write us if in need  
of any implement

The name of "Cockshutt" and "Frost & Wood" both stand for the highest quality of product. Behind each is long experience in the making of plows and farm implements. Each line shown in the free books and catalogues (which you may have on request) has in it all the improvements demanded and desirable for Canadian farming methods. If you are in need of any implement for your farm, we will be glad to advise you in detail. Simply send us a post card.
