send them their best wishes for their properties in the camp. The principal sinking that has been future welfare, and on Friday forwarded undertaken is on the No. 1, where a the following telegram: two-compartment shaft is under way. John L. Long is in charge of the task, The Right Hon. and with one machine, assisted during part of the month with another drill, he put the shaft down 68 feet in the 30 days. With two machines working full time, Mr. Long would have had no difficulty in reaching the 90-foot mark, equal

to a rate of three feet per day. The British America corporation has five properties under active development right around Rossland, and 150 men are ers. Bon Voyage. engaged in actual mining, not to mention the office staff and the force engaged in surface improvements. The Columbia-Kootenay is being developed on ad an extensive a scale as any, and the the work there is opening up big bodies of low grade ore, alternating with streaks of high grade mineral. In the Nickel plate the work is being carried on at the 200 foot level, where the vein is being thoroughly explored. The Nickel plate

ore bodies show a good grade of rock. At the Josie, extensive and unusually thorough development is under way at the 300-foot level, with a view of opening the property economically at the lower levels, which will be driven later on. A similar process is under way at the Great Western.

At the No. 1, which has developed more quickly than perhaps any other property in the camp, crosscutting for the vein has just been commenced at the A. G. Jordan, police magistrate, W. M. 200-foot level in the shaft. Some remarkably handsome ore has come out of the No. 1 vein in the tunnel.
