...NEWS... FROM THE BOUNDARY

By the Miner's Own Correspondent

IN DEADWOOD CAMP.

Notes of the Development of the Mines.

Greenwood, B. C., Aug. 28.—(Special.)—Rapid progress is being made in the crosscut from the northwest drift in Deadwood Camp. This ledge was partially prospected by means of a 25-foot shaft, known as the No. 1 shaft in the early history of the property. In driving the long crosscut tunnel it was also encountered and crossed and now the company is running a crosscut to encounter it immediately below the old shaft. Much water is coming in and Superintendent H. O. Oliver anticipates encountering the ledge almost immediately. Near the end of the main tunnel a station has been started and also a winze. The station is to be enlarged and a hoist and pump installed when the winze sum on the No. 3 vein will be carried down 100 feet.

On the Greyhound, in the same camp, owned by the Western Copper Company, Limited, a close corporation. The crosscut on the 100-foot level is in 22 feet and is expected to encounter the rich vein on the 50-foot level. The ore is an iron and copper sulphide averaging about three and one-half per cent copper and \$3 in gold.

The crosscut tunnel on the Great Hones is in 175 feet today. Indications point to it nearing the vein by the end of the week. Greenough, the railroad contractor, own this claim and the Phillips, adjoining to the north. The tunnel now being driven will give a vertical depth on the vein of 112 feet where it is countered, and by drifting some 100 feet could be obtained.

Adjoining the Great Hones is the Marguerite, where sinking the main shaft is in progress. The workings are down 75 feet and plenty of calcite containing specks of copper indicate the nearness of the ore body, which will be encountered on its dip. The Marguerite is owned by the Quebec Copper Company, Limited.

OF PERSONAL INTEREST.

What Visitors Are Doing at the Boundary Metropolis.

Greenwood, B. C., Aug. 28.—(Special.)—T. J. Turnbull, a smelterman of Swansea, Wales, passed through the city today on his way to the Similkameen. He is said to represent Marcus Daly, of Butte, who is largely interested in the Big Nickel Plate mine in that district. His visit is in connection with the proposed smelter locations.

Dr. F. G. Moody, a dentist of Victoria, arrived here tonight for a holiday and to attend to the doctor's health has been impaired and he intends to spend two months in the district recuperating. He will go to the Sunny side ranch near Midway.

The Presbytery of Kootenay opens its season here tomorrow. About 20 Presbyterian ministers arrived on tonight's train from different Kootenay towns.

John Mack, of Spokane, manager of the Athelstan mine, in Wellington, has returned.

A. E. McKenney, of Toronto, on the road for the Gutta Percha & Rubber Mfg. Co., is in town.

BOARD PROTESTS.

Greenwood Adds Its Protest Against Further Taxation.

Greenwood, Aug. 28.—(Special.)—There was a special meeting of the Council of the Board of Trade tonight at which the following resolution was passed and sent by wire to Premier Turner and Smith Curtis, M. P. P.: "Whereas the mining industry is destined to be the most important industry in the province and whereas the said industry during the past two years has received a serious setback; and whereas it is desirable to encourage and not discourage capital, be it therefore resolved that, in the opinion of this board, any increase in the taxation of mines at the present time will be highly injurious, and further resolved that this board respectfully protest against the proposed increase in such taxation."

HOTEL TONASKET.

Molson's New Three Store Hotel to Be Opened Shortly.

Molson, Wash., Aug. 28.—(Special.)—Invitations are out for the opening of the new three-story hotel on Sept. 3. It will be known as the Hotel Tonasket. On the same date (Labor Day) there will be field sports to conclude with a ball and supper at the hotel. C. A. Blatt has furnished the hotel from top to bottom in a most elaborate manner, and intends to make his hotel the leading one in the Myers Creek district. It is a substantial building fitted with all modern improvements and handsomely finished.

KOOTENAY PRESBYTERY.

Proceedings of the Body Now in Session at Greenwood.

Greenwood, Aug. 30.—(Special.)—The Presbytery of Kootenay commenced in Greenwood Tuesday morning. There were present President D. McG. Gandier, of Rosland; W. G. Fortune, of Cranbrook; Alex. Dunn, of Moyie; D. McK. Reid, of Fort Steele; A. D. Menzies, of Kaslo; J. A. Ferguson, of Sandon; A. Mac Rae, of Whitewater; J. G. Colquhoun, of Rosland mines; J. Young, of Robertson, of Sloan; J. R. Alexander, of Columbia; G. A. Sutherland, of Phoenix; R. P. Murray, Midway; D. Campbell, Greenwood; J. Munro, Trail;

H. Mackay, Eholt, and K. W. Barton, of Cascade.

Rev. D. McG. Gandier, as moderator, occupied the chair and conducted devotional exercises. Considerable routine business was conducted after which attention was called to the urgent need of rendering assistance to the Sandon people in rebuilding their church which was destroyed in the late disastrous fire. It was unanimously agreed to appoint the third Sabbath of September as a date for taking a collection in all the churches within the bounds of Kootenay Presbytery to assist in this good object. Appeal was also made to the other Presbyteries and the synod of B. C. Urging that at least one thousand dollars be raised to assist Sandon, and the church named building fund were asked to make a grant of \$300. The whole matter was taken up enthusiastically by all the members of the Presbytery, and will doubtless be carried to a successful issue.

In the evening the ladies of Greenwood church entertained the members of the Presbytery by providing supper in the hall. This was a most enjoyable occasion at which much was taken in and afterwards some excellent speeches were given. They may not have been very witty from the theological standpoint, but they were well fitted to aid digestion. All were loud in their praises of Greenwood hospitality. In the evening the Presbytery gave attention to Greenwood affairs and sought to aid the congregations in choosing a site for the church and get a more thorough organization. Arrangements were also made for the license and ordination of Mr. Hector Mackay, of Eholt, on the following evening. The items remaining on the docket are the Home Missions report and the resignations of Rev. John Munro, of Trail, and Rev. D. McG. Gandier, of Rosland.

SIMILKAMEEN CITY.

A Chat With Frank Bailey, the Owner.

Greenwood, B. C., Aug. 30.—(Special.)—Frank Bailey, owner of the Similkameen townsite in Hedley camp, Similkameen district, is here in connection with the formation of a joint stock company to acquire the property. Speaking of the undertaking to the Miner correspondent, Mr. Bailey said: "Similkameen city is located on the river at that name, 22 miles northwest of Princeton, just about half way between these two towns which will shortly be connected by a government wagon road which passes through the townsite. We are in the centre of the Similkameen. We are in the richest copper camp discovered in the district, the principal mine being the Nickel Plate, owned by Marcus Daly and associates. This mine is probably the best developed property in the district and I understand that the owners will erect the ore shaft and smelter for the treatment of the ore at the mine. Another important consideration is Sterling Creek camp. I own 252 acres of crown granted land and 300 acres for which an application for title will be made. Beside this land there is a timber limit of 1,900 acres."

"Arrangements are now in progress for the formation of the Similkameen City Townsite company, with a capital of \$20,000 in 500 shares of the par value of \$40 each. The company will acquire both the townsite and timber limit and will also purchase some 480 acres of land in the immediate vicinity of the townsite. The Similkameen City is one of the best situated in the district, and is most centrally located with regard to the nearby camps. It is to that district that Greenwood is to be the Boundary district the natural centre for a big town. In time when the proposed extension of the Columbia and Western railway is built through to Hope the line will pass through the town according to the present survey. The Similkameen is slowly but surely coming to the front, it has many rich copper-gold camps, and with development gives every promise of being in the front ranks of the mineral producing districts of the province."

ARRIVALS AT GREENWOOD.

Greenwood, B. C., Aug. 29.—(Special.)—S. F. Parrish, manager of the B. C. mine, in Summit camp, returned on tonight's train from an extended visit to Colorado.

Registered at the Imperial Hotel are Dr. H. S. Simmons, wife and son. The doctor informed the Miner correspondent that he intends to open a dental office here at once. Other arrivals in town today are Stanley Mayall, of Cascade City. George C. Tunstall, Jr., of Nelson, and Gilbert Mahon, of the Jewel in Long Lake camp.

IRESBYTERY MEETING.

Rev. D. McG. Gandier Resigns Pastorate of St. Andrews.

Greenwood, Aug. 31.—(Special.)—The presbytery continued its sessions here yesterday and today. The home missions committee's report showed that good work was being done, and despite the general financial depression which has prevailed during the past half year, the people have contributed generously to the support of our churches. Grants to the amount of \$2,250 were asked from the church's home missions fund, and \$200 from the Augustations fund. As several of the presbyteries are leaving the bounds of the Presbytery a number of new men will be required. Phoenix congregation asked for permission to call a permanent pastor, as did Rosland; W. G. Fortune, of Cranbrook; Alex. Dunn, of Moyie; D. McK. Reid, of Fort Steele; A. D. Menzies, of Kaslo; J. A. Ferguson, of Sandon; A. Mac Rae, of Whitewater; J. G. Colquhoun, of Rosland mines; J. Young, of Robertson, of Sloan; J. R. Alexander, of Columbia; G. A. Sutherland, of Phoenix; R. P. Murray, Midway; D. Campbell, Greenwood; J. Munro, Trail;

in the evening Rev. H. Mackay of Eholt, was licensed and ordained. The moderator presided and addressed the nister. Rev. A. O. MacKae, Ph. D., of Whitewater, preached, and Rev. W. G. W. Fortune gave words of counsel to the people.

Attention of the Presbytery being called to the statements of the papers regarding the situation was passed: "Having observed in the newspapers that there is some dispute in Ainsworth regarding an organ, we the Presbytery of Kootenay, while not expressing any opinion as to who should possess the organ named by the Methodists, yet strongly advise the Presbyterians of Ainsworth to be parties to any amicable arrangement rather than to purchase another organ for their own use."

At the same time it was agreed that an amicable arrangement could not be reached over the organ now in dispute the ministers of the Presbytery, will themselves pay for another to be used by their own use."

Rev. D. McG. Gandier of Rosland, presented his resignation of the pastoral charge of St. Andrew's church, and asked to be relieved as early a date as was consistent with the best interests of the work. After expressions of regret on the part of several members of the Presbytery, it was agreed to enter the resignation to appear at an adjourned meeting of the Presbytery to be held in Greenwood on Wednesday, September 19th. Mr. Gandier then tendered his resignation as convener of home missions and moderator of the Presbytery. These having been accepted, the Rev. A. D. Menzies of Kaslo, was appointed to the former position, and Rev. Allen Lunn of Moyie, to the latter.

It was then agreed that the place of the next meeting should be in Greenwood, on the last Wednesday of February, 1901, and the Presbytery adjourned.

MINER-GRAVES BANQUET.

Brief Notes of the Principal Features.

Greenwood, B. C., Aug. 31.—(Special.)—The local contingent that went over to Grand Forks to attend the complimentary banquet tendered to S. H. C. Miner, president and Jay P. Graves, general manager of the Granby Mining and Smelting company, by the citizens of the Boundary district, returned home tonight. They were delighted at the success of the party in that the assurances given by Mr. Miner in his speech outlining the future policy of his companies was alone worth that his undertaking in the Boundary district, both mining and smelting, where it is to be on a gigantic scale, where he proposed to mine, ship and treat one million tons of ore at a profit, said Mr. McIntosh. "When he added that the smelter was a success it made me feel that there was no longer any doubt left as to the glorious future of the district."

Mr. Miner can do so much for the district, and I sincerely hope, that he will do so. He has paved the way, and I, the pessimistic, have been the Eastern croaker. I have not the least doubt that within 15 months the Grand Forks smelter will have a capacity of 4,000 tons daily, and by that time the equipment of the Knob Hill and Old Ironsides mines will include a 30-drill compressor plant, and I sincerely hope, with Mr. Miner, that he may live to see the day when the smelter will be treating 4,000 tons daily and will have its own refinery. The solution of the difficulty of over-coming the long and expensive haul of matte to New York and the fact that the rake off on the copper at that end of the line in the Granby company owning will be in the hands of the Boundary refinery. When Mr. Miner says its will make copper at a cost of five cents per pound, I am convinced that he will do it, he concluded.

Mr. Miner, relying to the toast of "Our Guests," delivered an eloquent reply, which was enthusiastically applauded throughout. His announcement of the policy of the Miner-Graves syndicate and his declaration that the problem of the successful treatment of the low grade ores of the Boundary had been solved proved the leading features.

After paying a high tribute to Mr. Graves, whose persistence had worked out so many points, he proceeded to show how little he had accomplished without the co-operation of the staff including W. Yolen Williams, the general superintendent; J. E. Hemmaway, agent of the Knob Hill, and Old Ironsides; G. W. Wooster, treasurer of the smelter; A. O. Fluemfeld, assistant general manager, and A. B. Harkins, superintendent of the smelter. If the most perfect smelter in the country, said he, were located in Grand Forks, the credit was largely due to Mr. Hodges, a metallurgist without a superior.

Mr. Miner recalled the circumstances of his first meeting with Mr. Graves in Montreal four years ago, and the reasons that prompted him to invest in the Boundary mining enterprises. Mr. Graves was then the principal owner of the Knob Hill and Old Ironsides. Continuing, the speaker said he had visited the Boundary to discover that nine-tenths of the ores were low grade. Then began his association with Mr. Graves in a work which became more fascinating as it grew in extent. He had no use for croakers. It was sickening to him to hear the prattle of those who discussed the merits and demerits of the Boundary, claiming that the ores could not be treated at a profit. These poor creatures, he dramatically declared, did not know all the great possibilities in the world were against investment in properties with small ledges and high values. As a rule, both were liable to disappear at depth.

"I desire to refer," he added, "to some of the great mines of the province, mines of which I am interested, and in some of which I am interested. The Cobalt and Hecla is one of the richest in the world. Its very name represents something fabulous, yet it ranges in value from one and three-quarters to five per cent. This signifies \$6.50 ore taken on the unit basis, but last year the mine cleared \$10,000,000, paying \$3,000,000 to the shareholders. The dividends it has paid to date have exceeded \$6,000,000. Every ton of rock has to be raised from a depth ranging from 4,000 to 5,000 feet. In other words, a depth of nearly a mile has been attained. Upwards of \$10,000,000 has been expended for equipment and 35 years have been occupied in bringing the workings to this stage, and yet the mine does not carry a cent in gold values. The ore is mined, treated and sent to New

York at a net cost of from 6 to 6 1/2 cents per pound." Mr. Miner gave additional information respecting other Lake Superior copper propositions. In the Itanarack, which has the same lode as the Calumet, \$400,000 was expended in five years in sinking a shaft to catch the lead at a depth of 2,500 feet. There were no surface showings but an engineer assured the owners where the ore could be found. The opinion of the expert, both in regard to cost, depth and time, had been verified almost to the letter. With a par value of \$25 the shares today were worth \$200. Last year the Osoola mined 1,250,000 tons. The Anaconda raises 6,000 tons daily. Mr. Miner then quoted authority to prove that all the ores of Butte mountain do not exceed an average of \$7 per ton in value. Proceeding, he said: "In recent years efforts have been directed to effect every economy in mining equipment and transportation, the idea entertained being to bring smelting ores not exceeding 100 miles to a profitable point. Under such conditions business is created for an immense population, and enormous profits are made on the large turn over. I saw the limits of Phoenix, and realized that we had a world-beater. We have kept clear of the market, not attempting to protect our shares, but have treated under the conditions I described a moment ago. We demonstrated that at the smelter today. I informed our smelter superintendent, Mr. Hodges, a year ago that we must mine, ship and treat \$5 ore at a profit. Reasonably handling charges, when fully equipped, little economies here and there, and other factors will accomplish the result. We expect to install an 80-drill plant in the near future, and will be in a position within 15 months to treat 2,000 tons of ore a day at Grand Forks. I expect these figures will be doubled later on, and to see us operating a duplicate 2,000-ton smelter in Grand Forks. The Michigan mines, operating their own refineries, turn out finished copper at a cost of six cents per pound. We have not yet worked out a portion of the treatment problem. We must erect our own refinery. Copper matte, after treatment in New York, nets about 10 1/2 cents per pound here. Well, we propose to save this New York rake-off, and operate only way it can be done is by operating our own refinery and refining our own matte. If prices fall we have yet the advantage of the gold values our ores carry."

Mr. Miner quoted John Stanton, secretary of the Copper Exporter's Association to show that the consumption of copper in the world was increasing rapidly and price of copper were increasing. As for himself, he shared the same opinion. In conclusion, after referring to the bright future of British Columbia and Canada generally, Mr. Miner evoked a hearty outburst by his reference to the Anglo-American entente, and the high place destined for the Dominion in the sisterhood of nations.

The following notes were gathered by the Miner representative at the banquet: The Yale Hotel dining room is an ideal place for a banquet. Over 100 were comfortably seated. A. W. Ross, of Columbia, was the right man in the right place as toastmaster. Superintendent Hodges, of the Granby smelter, in replying to the toast of "Smelting and mining interests," made the statement that on Wednesday 318 tons went through one 250-ton furnace in a 24-hour run or one ton each four minutes. Truly Boundary ores are ideal fluxing.

Wm. Yolen Williams' story of the two babies (Knob Hill and Old Ironsides) was one of the laughable features of the dinner. Duncan McIntosh, of this city, had something to say on mining interests and his early experiences in the district, and he said it in a way that amused the guests.

Here is J. B. McArthur's prediction: "In 1910 Southern British Columbia will produce two hundred and fifty million dollars' worth." May he be a true prophet.

Nelson sent the largest contingent headed by Acting Mayor Irvine. C. P. R. staff was represented by Captain Troup, F. W. Peters, J. P. Gutelius and J. G. Sullivan. Without a doubt the award must be given to Mr. Burrell, made the cleverest speech of the evening. He replied to the toast of "Agricultural Interests."

Mr. Miner's speech was, of course, the feature of the evening. His assurances that he proposed to mine, ship and treat at a profit ore running from \$5 and up, was the keynote. His partial announcement of the future operations of his syndicate included a 30-drill compressor plant for the mines at Phoenix, the ultimate enlargement of the smelter to 4,000 tons daily, the operation of the mines at Phoenix by electrical power taken from the company's plant at Grand Forks and the possibility of the smelter company ultimately building. "We must make copper at a cost of five cents a pound," he said, "and to do so we have yet to overcome the long and expensive haul to New York refineries and the rake off connected with the handling of the copper. Our next step is to build our own refinery, and I intend to start at this work and keep it going until Southern British Columbia is put in shape to compete with the world."

The toast of "Municipal Corporations" was proposed by Mayor L. A. Manley, of the Forks, and responded to by Mayor Goodeve, of Rosland, Acting Mayor Irvine, of Nelson; Mayor Hardy, of Greenwood, and Mayor McCallum, of Columbia.

"I woke up to find it was a fish story," said Mr. Harkins, the press correspondent, in replying to the toast of the press, after the proposer, a reverend gentleman of Columbia, had dressed the subject down in a semi-theatrical fashion; much to the disgust of the pensioners present. It was bad enough to listen to Mayor Hardy's roast of the newspaper men (undressed as it was), and courtesy as a guest, if nothing else should have refrained these two from the insinuations cast upon the representatives of the press at the banquet. "The pen is mightier than the mouth" can go in place of the old proverb.

The dinner, God bless them, were not neglected for Dr. McDonald, of the Forks, championed their interests, and the doctor is a lady's man.

The next "blow-in" banquet will be at Greenwood sometime in November, and it will be a hot one, too. You are all invited by The Scribe.

Messrs. R. Marpole, A. J. Cambie, E. Hall and Mr. Lawrence form a party of C. P. R. railway officials who were at the Allan yesterday.

An Inspection Trip.

Greenwood, B. C., Aug. 31.—(Special.)—Superintendent J. W. Troup, of the Kootenay division of the C. P. R., accompanied by J. P. Gutelius, engineer of the division, arrived this evening from Nelson. They are on one of their periodic tours of inspection of the Columbia-Kootenay branch.

OLD TIMERS BANQUET.

Pioneers of the Boundary Contry Have a Feast.

Greenwood, B. C., Sept. 1.—(Special.)—Many old time residents of Eholt's ranch, Lind's ranch, Boundary Falls, McRae's ranch, Grand Prairie, Ross Creek, McKinney and Osoyoos are gathered at Midway tonight for the semi-annual banquet of the Old Timers Association of the Boundary Creek district. Only old timers previous to the flood of the Kettle river in 1884 are eligible to membership.

Rheumatic Joints.—Mrs. George Smith, 62 Charron street, Point St. Charles, Que., says: "Rheumatism in my joints caused me suffering that words cannot describe how terrible. I took four bottles of South American Rheumatic Cure and am a well woman. I have recommended it to others with as good results. Think the treatment nothing of a wonder."—10. Sold by Goodeve Bros.

LOCAL BREVITIES.

Many Sportsmen at Greenwood Gunning.

Greenwood, Sept. 3.—(Special.)—The members of the fire department are arranging for a ball, to take place in Miller's hall on Friday evening.

Today, Labor Day, all local stores closed at 10 a. m., and the members of the Retail Clerks' union journeyed down to Grand Forks for a holiday.

Many left town Saturday for the opening of the shooting season, and parties are strung out all along the line to the West Fork and Myers creek districts.

Last night's arrivals in town included a party composed of R. E. (Barbarian) Brown, of New York; J. R. Stephens, San Francisco; Jack Empey and Robert E. Pitcher of Spokane. A. H. Buchanan and T. J. Landrum of Nelson are also here. T. H. McKeggie, a banker of Barrie, Ont., and George G. Mitchell of Toronto, are traveling through the district together.

DANGEROUS EXTREMES.

THE SEASON WHEN Paine's Celery Compound SHOULD BE USED.

Nothing Like it for Health-Building.

A sudden jump from torrid heat to weather of a changeable character! The change is a serious one for the ailing, weary, sleepless, despondent, irritable and for those whose nerve energy is almost exhausted. The quickly varying temperatures experienced during this month-aid to the sufferings and burdens of men and women whose systems are deranged or broken down.

Long years of triumphs and successes have established the fact that Paine's Celery Compound is the infallible cure for the fearful ills that result from an impaired nervous system and impure blood.

Paine's Celery Compound makes nerve fibre and nerve force; it purifies and enriches the blood; it regulates digestion; it promotes sleep and gives to the entire system a fulness of health and strength that makes life a pleasure.

Our best people are users and friends of Paine's Celery Compound and recommend it to their friends; it is prescribed daily by some of our best physicians.

A Pleasant Duty.—"When I know anything worthy of recommendation, I consider it my duty to tell it," says Dr. Jas. Murdoch of Hamburg, Pa. "Dr. Agnew's Catarrhal Powder has cured me of catarrh of five years standing. It is certainly magical in its effect. The first application benefited me in five minutes. 50 cts.—S. Sold by Goodeve Bros.

Our remedies are perfectly harmless, and gradually tone up the entire system. Sufferers should beware of stimulating appliances of any nature. They are advertised to cure nerve troubles when in reality they are nerve destroyers, verified man killers and wreckers of human life, made to sell—not to cure. Pay when cured.

Debilitated men can never be restored to permanent strength except by thorough and proper constitutional treatment. This cannot be done by mechanical or other temporary stimulants. The latter only leave the unfortunate victims, after a few days, weeks, or months, in a condition which is almost hopeless.

Every case should be under the personal supervision of an experienced physician, as QUACK CURE ALLS ALWAYS PROVE A FAILURE. Treatment which may be beneficial in one case may prove positively injurious in another. Also treatment which will help at one stage will do no good at another.

Will undertake no case except certain a cure can be effected. We have so much confidence in our method that we will allow any patient who is the least doubtful about our ability, to deposit the price of a cure in any bank in Spokane, to be paid to us only when he is well. The patient may pay in monthly instalments, if he so desires.

CONSULTATION FREE.—A personal talk is desirable, but if it is impossible to call, write for question blank. Most cases we can treat successfully by correspondence. Plain envelopes used and all business is confidential.

DR. W. NORTON DAVIS & Co. HAZEL BLOCK, CORNER HOWARD AND SPRAGUE, SPOKANE, WASH. INGLETON. Office Hours, 9 to 12, 2 to 5, and 6:30 to 8; Sundays, 10 to 12.

UNEQUALLED SERVICE BETWEEN PORTLAND AND CHICAGO ON THE "PORTLAND CHICAGO SPECIAL."

Sunday, April 22nd, the O. R. & N. will put on a new fast train between Portland and Chicago, via Huntington. Leaving Spokane at 8:10 a. m., giving connection from branch lines, will arrive at Pendleton in time to make direct connection for 11 points east. The schedule has been arranged so as to reach Chicago in three days, or 12 hours in advance of schedule time. The "Special" will carry first class and tourist sleepers, together with a composite car, that is supplied with all the latest publications, library, barber shop, etc. The train leaving Spokane at 3:40 p. m. will connect at Umatilla as heretofore with through sleeper to Chicago and Kansas City.

(Consult the nearest ticket agent for detailed information.)

W. H. HURLBURT, General Passenger Agent, Portland, Oregon.

Peace Declared.

Why devote all your time reading about the Boer war and the gold fields of Alaska? There are others matters of vital importance. You may make a trip East, and will want to know how to travel. In order to have the best service, use the Wisconsin Central Railway between St. Paul and Chicago. For rates and other information write Jas. A. Clock, General Agent, Portland, Oregon.

DOUBLE DAILY TRAIN SERVICE The Dining Car Route Via Yellowstone Park
