

THE ACADIAN.

WOLFVILLE, N. S., MAR. 3, 1893.

The Bee Keepers' Convention.

The second meeting of the Bee Keepers' Association was held in Harrisburg, N.S., on Wednesday, March 14, at 2 p.m.

The report of the committee on constitution and bye-laws was called for and read, when it was taken up clause by clause and passed with few amendments.

The subject of "Foul Brood" was then brought up by Mr. McGregor who explained the nature of the disease and the importance of stamping it out at once if it should be discovered as it was highly contagious and had destroyed many large apiaries in the United States and Ontario.

In answer to a question by a member, Sec. Beeler said "Foul Brood" might be detected by a depression in the covering of the cell, if opened, a fetid smelling,ropy substance will be found instead of the living embryo.

A question was asked as to the best books for beginners, and Root's A. B. C. of bee keeping and Hutchinson's Advanced were recommended.

A lengthy discussion then ensued on wintering bees. Mr. McGregor said he had been successful in keeping them in a temperature of from 45 to 38 degrees, but found he had to be very careful to keep the hive from getting at the bees as they destroyed both bees and honey.

The discussion was continued for some time by J. R. Woolaver, Hantsport, J. W. Hutchinson, Morrisville, A. J. Ebbington, A. J. Woodman and others, eliciting a great deal of practical information on the subject, showing the value of a quiet situation with ample protection from wind, and a southern exposure for the apiary.

Considerable discussion then took place on the sales of honey and the variation of the different local markets, and the amount imported into the Province. It was stated that one firm in Halifax imported over two tons last season, and that they had admitted that the Nova Scotia honey when properly extracted and put up was much superior in flavor and purity to any that they could import, and would sell for better figures.

An Association brand was talked of and the necessity of preserving absolute purity of goods insisted upon; and that efforts should be made to educate the people to use purchased adulterated honey. It was considered that 20 cents per lb for best clover comb. honey, was a fair price, and that 12 cents for best extracted would be about equal.

Subjects for discussion at the next meeting were then handed in and adopted as follows: 1st.—How does Bee Keeping compare with other pursuits upon which to depend for a living?

21.—Should a beginner procure bees in ordinary box hives and wish to transfer them to the improved hives, how shall he accomplish it? and how many should he get to start with?

31.—What are the essential points in the locality of an Apiary and in what condition should it be kept to obtain the best results?

It was considered necessary for the members to prepare themselves to make as good a show of their goods and appliances as possible at the exhibition next autumn, where every field, and to ask committees to see that the Bee Industry is not ignored in the prize lists. The meeting then adjourned to the call of the executive. The annual meeting will be held in Wolfville during the last week in December.

The Canadian Magazine.

There has just been issued the first number (March) of a new magazine and national review, devoted to politics, science, art and literature, and known as "The Canadian Magazine."

The subject of "Foul Brood" was then brought up by Mr. McGregor who explained the nature of the disease and the importance of stamping it out at once if it should be discovered as it was highly contagious and had destroyed many large apiaries in the United States and Ontario.

The annual meeting of the stockholders of the above company was held at Middleton on the 14th ult. The following report was read by the secretary: To the Stockholders of the Valley Telephone Company.

GENTLEMEN,—In presenting to you our first annual report we, of course, have very little to refer to besides the expenditure of capital in the initiation of our enterprise.

The annual meeting of the stockholders of the above company was held at Middleton on the 14th ult. The following report was read by the secretary: To the Stockholders of the Valley Telephone Company.

GENTLEMEN,—In presenting to you our first annual report we, of course, have very little to refer to besides the expenditure of capital in the initiation of our enterprise.

Like all similar enterprises the cost of completing and equipping the line exceeded the first estimates; but it is a gratifying fact that the demand for instruments has been very much in excess of our expectations.

Finding the capital stock subscriptions that we started were insufficient, we concluded to offer a further issue of stock up to \$15,000 in all, some of which has been taken up, while a considerable amount remains unsold, and is now offered to the present stockholders at par, and will remain open at their option for fifteen days, after which it will be sold to the public as required in construction and equipment.

The accounts duly audited, are herewith exhibited to you.

The net revenue from the opening of the line, until the 31st December is \$692.13, out of which we have declared a dividend of 2 1/2 per cent for the three months,—being at the rate of ten per cent per annum on the capital paid up, payable at the office of the company at Middleton on the 1st of March, proximo.

"Guaranteed."

"I have used St. Laurence Cough Balsam in my family for some time and always with the most satisfactory results. Some months ago my daughter came home from Boston with a very hard and distressing cough, from which she could get no relief until she used St. Laurence Cough Balsam. Before finishing one bottle she was completely cured. John G. Clark, merchant, Berwick. Sold by Geo. V. Rand, Duggist."

Educational Exhibit for World's Fair.

The schools throughout the province have been preparing specimens of their work for the Columbian Exposition. From this work teachers have selected three specimens of each kind from each grade, and sent them to the Inspector of Schools for their district, from which he was instructed to choose three of each kind, from the different grades, and forward them to the Superintendent of Education.

The material sent me from the schools in the counties of Hants and King's was very creditable indeed; and the teachers and pupils are to be commended for the interest they have taken to make this excellent contribution to the exhibit. I feel sure the stimulus given to the schools in the effort to prepare their work will repay the time bestowed upon it.

COLIN W. ROSCOE, Insp. of Schools. HIGH SCHOOL WORK.

The King of Remedies.

Dock Blood Purifier.

Victory after victory in the recent trials of Dock Blood Purifier, which never fails to do good. Read what Mrs. Outhouse says about it:

From MRS HENRY OUTHOUSE, TIVERTON, N. S.

About three years ago I was sick with consumption, which was brought on by a heavy cold. I employed a doctor who advised me to use emulsions. I did so but they did me no good. I was growing weaker and weaker; in fact my parents had given me up as I belong to a consumptive family. Two of my sisters and one brother have already died of that dread disease. As my appetite was very poor, a friend advised me to use Dr Norton's Dock Blood Purifier. I got six bottles, the use of which soon gave me a craving for food. Soon my cough was better and I began to gain in strength. I used twelve bottles of the medicine and by that time had gained forty-four pounds in flesh with good health. I have had no symptoms of any lung trouble since and believe that Dr Norton's Dock Blood Purifier saved my life.

Chemical Fertilizer Works

HALIFAX, N. S. Established 1874. "CERES" Superphosphate! (The Complete Fertilizer) Popular Phosphate! Apple Tree Phosphate! Potato Phosphate! Strawberry Phosphate!

Our fertilizers are now being offered to the farmers for the 15th season. As these fertilizers have been used to such a great extent and for so many years, the farmer knows that he is buying something that is no longer an experiment but an established factor in the growth of all crops. Agents wanted in unoccupied territories. JACK & BELL.

To Let.

That pleasantly situated cottage adjoining the Episcopal Church, Wolfville—eight rooms, front porch, cellar, town water. Possession immediate. Apply to DR. BARSS, Wolfville, Jan. 21, 1893.

DR. BARSS, WOLFVILLE.

Residence adjoining Episcopal church, Office Hours, 1-3 P.M. Telephone, No. 17. January, 4, 1893.
