merce building, received the following by rivate with from Bartlett, Frazier & arrington today: rices were somewhat lower at the opening, in sympathy with the declines in ondon, there was a fairly steady under one, and the railroads especially showa disposition to advance. The proessional element was conspicuous on the uying side, while the selling was largely by London. Some encouragement was serived from the fact that Amaigamated opper, preferred, which has for som days been the weak feature, advanced ather easily, accompanied by indications that buying was better than for some days. Before the publication of the bank statement, railroad stocks had enjoyed an advance which carried them above last alight's close. The showing by the banks was entirely satisfactory. There was a larger gain in cash than had been exampled Loans remained practically standard loans remained loans rema \$2,600,000, and is now higher than is usual at this time of the year. The market. however, instead of being stimulated by the bank statement, sold off rapidly under the leadership of Steel, preferred, which closed heavy at about the lowest price of the day. No reason was assigned for the downward movement, but it served to prove conclusively that there is little or no support, that the morning's advance was wholly due to traders over advance was wholly due to traders operating, and that an attempt to liquidate merely served to show the hollow condition of the market. It is feared that next week, when the court convenes again, further unsettling revelations will be made in the United State Shipbuilding made in the United State Shipbundan Southern Pacine.

AMERICAN MARKETS. CHICAGO.

H. C. Becher, broker, Bank of Commerce building, received the following by private wire from Bartlett, Fra-& Carington, vesterday: icago, Oct. 9.—Wheat—The market Chicago, Oct. 9.—Wheat—The market was erratic today, prices scoring a number of changes. After an easy opening on the indifference displayed by cables to our advance of yesterday, the upward course of prices was resumed and the day's top figures were made under the leadership of the Minneapolis December option. On the advance realizing was general, which is natural, as the early buils had good profits. The close was weak at %c loss from yesterday's closing market is being fully maintained. An export demand is lacking, but this may as well be overlooked for the time being, or until we have something to sell. While wheat bids are out of tone, millers are label to export their flour at prices showing handsome profits. Rumor has it that the Minneapolis strike will be settled this afternoon, in which event the situation will be very much improved. The Modern Miller reports good progress of fall work, excepting in the Ohlo valley. Local receipts were 31 cars, with 55 estimated for tomorrow.

Corn was easier from the start and the trade lacked snap. The excellent export business, placed at 76 loads, reported yes was erratic today, prices scoring a num-

terday, had a firming effect early, but prices gave way when the edge was off the wheat price. The movement of corn from Chicago continues to be on a scale which is gradually depleting our stock. Two and one-half million bushels have been shipped out the past four days, of which 1,750,000 was of the contract grade and from public elevators. The local and from public elevators. The local sample market was strong, but shipping demand was slow. Two hundred thousan bushels of corn was chartered for Buffalo The weather is clear and cool. with frost throughout Nebraska, lowa and Missouri. Estimated tomorrow, 285

cars.

Oats—The market displayed the best strength today and was not influenced by the break in the other pits, maintaining its strength to the close. The cash situation was the feature of the market. The demand is large and general, and over 100,000 bushels of standard oats were sold, c. i. f., Buffalo, today. Receipts here are moderate and the percentage of contract grade very small, being ohly 5 per cent today. Estimated tomorrow, 150 cars.

Provisions had a slow market. The outside trade is light and the buying was principally by shorts. There were sev-
