Nat glanced at his watch. It was a uarer of five. If 'Gene did no arrive within fifteen minutes it meant a walk of twenty miles back to St. Croix, and then—God knows where. But if he found then—God knows where. But if he found the boy had gone to Rio de Janeiro again, there he would follow him. He would follow him around the would end back again.

there he would follow him. He would follow him around the werld and back again, and this pine on Eagle could go.

In the shack to the right there was a great rattle of tin dishes and the growling early morning talk of the men. The smell of strong coffee scented the cold air.

"Had your grub?" questioned Nat.

"And you—is it that you have eaten?"

"Not yet."

His eyes were again trying to pierce the heavy shadows which clotted the snow. He listened, but heard no sound. He recalled his talk with 'Gene and made sure that he had made no mistake in the day or time. This heavet had because the side of Bartineau. In the stable that morning 'Gene gave that stable that morning 'Gene gave vent to his wrath on the horses. He was leading out Nat's own team when the animals, becoming frightened at a moving shadow, crowded back upon him. He had a whip in his hand, and brought it down sharply across the quivering flanks of the nearer one. It was at this point that some demon sprang out of the dark, and, gripping his throat, held on. For a monent 'Gene thought it was an animal. He could see little, and the breathing was not that of a man. Nat freed him from Bartineau.

Snow. He listened, but heard no sound. He recalled his talk with 'Gene and made sure that he had made no mistake in the day or time. This brought his thoughts back again to Julie, who for a week now had been a wife. He had not seen her since the day he left her, but at times he felt as though he should go mad with the yearning to look upon her face again. The desire was an acute pain which gnawed at his heart, choked him in the throat, and blinded his eyes. It came at might and it came in the day, and the fight against it left him limp. And yet, though she was the cause of it, he could in no wise put the blame upon her. There was neither anger nor jealousy in his heart, neither hope nor regret. He knew that Julie saw 'Gene—falr to look upon, big of body, ready and pleasant of tongue. So women had seen 'Gene since he was a small boy, and seen nothing else of him. None of them ever had occasion to watch him in a man crisis, for even at school, when trouble threatened, he was bold enough before the petticoats, and never ran until the latter were out of sight. But men knew him instinctively, even as Silas did, who had seen little of him.

Once again Nat glanced at his watch, lis feet and took up his belt a notch.

Once had been ad wife left her, but at times had been a wife. He had on the seem left her, but at times and the point where things swam black before 'Gene's bulging eyes and he seemed about to die.

It lacked five minutes of five. He rose to his feet and took up his belt a notch. Then in the yellow alley of light made by the lantern he saw the form of a man emerge from the pines and step heavily toward the camp. Nat went forward to meet him.

'Gene!" he called. The latter wheeled in his tracks as suddenly as though expecting a blow.
"I've been waitin' grub for ye," said

Nat.
"It's you, is it?" growled Gene.
He came nearer.
"See here, Nat," he began, "I jus' came up to tell ye I had another job in the dllage."
"Ye have a job here," answered Nat.
"I've got a better one."
"How much?"
"Ten dollars a week."
"I'll pay ye fifteen."
"It isn't so much the money," answered 'Gene.

### English Beauty Tells Complexion Secrets

["Elise" in American Home.] ["Elise" in American Home.]

Through a fortunate meeting with an English lady, noted for her dazzling complexion. I recently learned the full meaning of that old adage, "Beauty is but skin deep," She taught me how to remove my muddy old skin, reveating the young and beautiful skin underneath. The process is so simple, harmless and inexpensive, I'm sure you'll be glad to know about it. Just get an ounce of ordinary mercolized wax at any drug store and apply nightly, like cold cream, for a week or so. Every morning in washing off the wax, tiny particles of worn-out cuticle come off, too. The action is so gentle and gradual, there's no discomfort. It's a wonderful treatment, as it not only peels off the faded or discovered skin, but all of lis defects, as chaps, translated in the same of the same of the pages. out all of its defects, as chaps,

The instructions were given with brutal calmness. Nat caught a shifty look in 'Gene's eyes which meant but one thing, a passion for escape. His heart grew bitter, and he seized his brother's arm. "Husband of Julie," he said, "if ye do not beat him today, ye must try again tomorrow. So until ye do beat him. If ye run—then I will follow. Don't look around any more. Keep your mind on what ye've got to do."

To Be Continued. 'Gene laughed sulkily.

'I see myself,' he answered. 'It took me four hours to make it this mornin'.'

Nat frowned. The man would allow a four hours' walk to stand between him to be a four hours' walk to stand between him

With the dark and tension of the day and the face of Bartineau scowling at him for twelve hours, 'Gene was growing uneasy. It was one thing to fight in the heat of the moment, and another to go at it deliberately. He had never fought such a fight in his life,

"Why should I fight the Canuck?" demanded 'Gene. "I'm not holdin' any grudge ag'in him."

"You." answered Nat, "are the husband of Julie Moulton. That is why. The husband of Julie Moulton must fear no man. You have much fighting before you until in the end you fight me."
