A visitor to the Percy Yerger mansion on Austin avenue remarked, as he caressed little Mollie Yerger, "She takes after her papa and has got his hair." "No," said the little cherub, "it's not me that takes after papa and gets his hair It's mamma who does that when he comes home tight. -Texas Siftings

Californians find the cultivation of walnut trees as a regular crop extremely profitable. Ten years growth produces a tree twenty inches in di-meter. Why should not other states find remuneration in walnut-tree culture? The demand for the wood for manufacturing purposes is as great in other sections as in California.

A father at Hudson, Mass., punished his sixteen year old daughter for some offence. He stripped her to the waist, and fasten-ing her securely to a ladder, whipped her on the bare back with a leather lash till the blood came. When this was known to his neighbors they were so enraged that he had to fly to escape being lynched.

In the Evangelist Rev Theodore L Cuyler speaks of Daniel Webster as "an example and warning to young men not to assassinate their brains with the bottle." And yet there are men, both young and old, who, if they were assured of making Daniel Websters of themselves by assassinating their b:ains with a bottle, would willingly ply that singular weapon night and day. All stories respecting Sir Garnet Wolseley

are interesting just now, says the London Truth. It appears that he is fond, like Napoleon, of addressing himself directly to the soldiers under his command. "Now, my man," he said, "if you were told to highten your kit by half a pound what should you throw away?" "The Soldier's Pocket Companion," answered the man as he respectfully saluted his commander.

The first fleur mill in Minneapolis was built in 1860, and in that year the ship. ments of flour were 30,000 barrels, in 1872 they were 585,000 barrels, and in 1881 3,142,974 barrels. This quantity of wheat ground into flower in 1881 was 16,500,000 bushels, being 2,500,000 bushels more than the entire receipts at Chicago in that year. The foreign export of flour from Minneapolis began in 1877 with 109 183 barrels, and amounted in 1881 to 1,181,324 barrels. The products of the minufacturers for the year were valued at \$15,000,000.

John Brown, having been sent the other day at Balmoral by the queen in quest of the lady in waiting, who happened to be the Duchess of Athole, suddenly stumbled against her. "Hoot, mam," said J. B., "yer just the woman I was looking for." The euraged duchess dashed incontinently into the real presence and evaluates. me; he has had the impercinence to call me me; he has had the inperturbed a woman." To which the queen replied with cutting severiy; "And pray, what are you?" All the ladies in waiting and ladies of the bedchamber have a deadly hatred of John Brown.

One of the Chinese students formerly at Hartford was understood to have been deeply enamored of a girl whom he met in so-ciety there, and to have had some expecta-tion of winning her But he writes back from China that he is involuntarily a husband. He found, on returning home, that his parents had chosen a wi'e for him. "I tried to break it off," he says, "but with out success, as the Chinese consider an enout success, as the Chinese consider an engagement of marriage the most sacred contract. If it is once made, it can never be broken. According to the Chinese custom the younger brother cannot marry before an elder one. I have two younger brothers who have to wait for me to marry before who have to wait for me to marry before they can. Therefore I was urged very strongly by my relatives to marry right away, so I consented. Of course it is not a love affair, but I shall try to do my duty."

HORSE EDUCATORS.

TO THE MAN WHO THINKS

Suppose a wealthy man of your acquaintance, one whose word and whose ability to carry out his promises you placed full confidence in proposed to sell you a valuable farm, werth at this time, say \$10,000, and would sell it to you as being an exceptionally healthy man, on a credit running through ten years, with a certain equal amount payable each veen of the ten, and that it was in your power to apply that sum each year to the payment required. Suppose further, that this friend said: You can make these yearly payments for any number of the ten years that you please, and if you see fit, for any cause, to stop these payments at the end of any of the years short of the ten, after two years have been paid for! I will make you a deed of the land in the proportion you have paid for; and, further, I agree to give you, at the end of each year, while you are making these payments, the annual profits, earnings, or dividends on that farm, and, each year; deduct from your annual payment such earnings, profits, or dividends as the farm may earn that year; and he saures you that these earnings or dividends as the farm may earn that year; and the saures you that these earnings or dividends as the farm may earn that year; and be saures you that these earnings or dividends will probably increase each year, and materially reduce the amount of your annual payment, and that the farm in that ten years shall not be subject to onerous city, country, or town teaction, nor be liable for your debts, and he further guarantees that at the end of the ten years the farm shall be worth exactly \$10,000. He then says: Take this offer and I will further bind myself and guarantee to you that if you keep up your annual payments, and die ANY TIME within those ten years, and before all the payments are made, that in such case, I will deliver or pay over to your heirs or administrator, or to any person you may will or devise it to, THE ENTIRE FARM, or \$10,000 IN GOLD Coin, and require no further payments on the same. WOULD YOU NOT BUY A FARM UNDER SU

INSURANCE.

This is a fair sample illustration of a Ten Year Endowment in the ÆTNA LIFE INSURANCE COMAPAY OF HARTFORD. This is a fair sample illustration of a Ten Year Endowment in the Erna Lipe Insurance Compary of Hartford.

To save money for old age or for our families in case of death, is what all strive for, but outside of Endowment Insurance there is no certainty. Debts, endorsements, bad partnerships or failures, our instortunes or follies, all are so many trape lying in our way through life. Happy the man that can encape them all—to expect it is to expect too much. With all the rest of your investments, would it not be well to make one small one that may prove the BEST you ever made, and the one that shall at any time guarantee your family a support, or provide for your own old age. The thought that misfortune may come upon us, (and who is safe, positively safe,) reducing wife and children to want, is too painful. But add old age to this and it is unbearable. The wise man provides in time.

You may say, you have a Farm; is it certain you will always have one? You are a Mechanic: is it certain that the cunning of your hands will always provide for you? You are a Mechanic: is it certain that to cunning of your hands will always provide for you? You are a professional man: is it certain that you are above misfortunes? Do you know your brain will never eafle? Poes not the old man commit financial follies that sate middle age he would have deemed impossible? Now, grant that at .60 or 70 years of age, you will surely have a competence; that in a wonderful manner you will have escaped the thousand and one misfortunes in your way. If you had insured, it would have but added to your wealth; if financially unfortunate, it would have saved you from ruin! THINK OF THIS.

The Erna Lire Insurance Company offers to the Business Men of Canada, on the Endowment system, a Medium of Investment superior to any other. It has in constant operation the most perfect arrangements for investing the Trust Funds committed to its charge for the benefit of its numerous membership in the safest and most profitable manner. Having branches, and being a
