IMPORTANT

If you require good serviceable implements get Colland's Flexible Iron Harrows, Cultivators and Iron Combined Horse Hoes. These implements are extensively used and have given and continue to give general satisfaction. For strength, efficiency and durability they cannot be surpassed. The Harrows can be made to cut any width of ground and of any size of iron required. Many object to them because they are too heavy. This they need not do as I am now manufacturing harrows suitable for any soil, from 100 pounds in weight and less up to any weight they may want. The harrow teeth are all steel pointed.
