WOOED AND WON A QUEEN'S DAUGHTER.

The Marquis, from his boyhood's days, has been a prime favorite with the Queen, as he was with Prince Albert, and the marriage with the Princess Louise was decidedly one of choice, and not simply of political convenience. His ancestry is most unexceptionable, he being descended from the second Duchess of Sutherland, who was once Mistress of Robes to the Queen. This office is one of considerable political character which cannot be misused. Duchess of Sutherland, who was once Mistress of Robes to the Queen, This office is one of considerable political importance, perhaps the only office of political importance in England be stowed upon a woman. It is the gift of the Ministry for the Haim being, and is generally conferred upon a lady of high social rank, whose appointment of Mistress of the Robes has always been looked upon as one requiring careful and discreet consideration; but never was a wiser selection made than when the late Duchess of Sutherland was appointed to the office. Besides being a person of extraordinary ability and force of character, she was the very quality that has made the present in every quality that has made the present late Mistress of the Robes had much to do in moulding the character of the late of the Marquis of Lorne, and she we may add was endowed with that italienable wealth of be misused, since the consideration in the political importance in England beautiful of the weather of the last century with Maria, and its the prove acceptable to the Sovereign. Since the accession of Queen Victoria the appointment of Mistress of the Robes has always been looked upon as one requiring careful and discreet consideration; but never was a wiser selection made than when the late Duchess of Sutherland was appointed to the office. Besides being a person of extraordinary ability and force of character, she was the very quality that has made the present in every mater relating to his early education. The Queen thus withheld, if, after having announced hardyng to make them looked upon as one for the Mistress of the Robes had much to do in moulding the character of the last century with Maria, the case is such that the tone, which is other advances and the present and the present in every mater relating to this early proposed undergraph of the present of the present in every mater relating to his early educatio to his early education. The Queen thus writes in her "Journal of Our Life in the Highlands," of the Marquis when a boy. "Outside stood the Marquis of Journal of the Marquis of Journal obsolete bondage tend Lorne, just two yeers old, a dear, white, fat, fair little fellow, with reddish bair, but very delicate features, like both his father and mother. His early boyhood was mostly spent at Inverary Castle, his ancestral home, and here he obtained his first training as a sports man. At an age when most lads have been barely relieved from the restraints of the nursery he was a keen histerial so the hand of Princess Louise. The lady had the courage to accept the suit and to take a husband from among the people, and her royal mother felt free to uphold her daughter's choice. The Parliament of the country ratified Her thanks the mixture of the hand of Princess Louise. The lady had the courage to accept the suit and to take a husband from among the people, and her royal mother felt free to uphold her daughter's choice. The Parliament of the country ratified Her thanks the mixture of the mand of Princess Louise. The lady had the courage to accept the suit and to take a husband from among the people, and her royal mother felt free to uphold her daughter's choice. The Parliament of the country ratified Her thanks the mixture of the mand of Princess Louise. The lady had the courage to accept the suit and to take a husband from among the people, and her her out and the mixture of the mand of Princess Louise. The lady had the courage to accept the suit and to take a husband from among the people, and the mixture of the mand of Princess Louise. The lady had the courage to accept the suit and been barely relieved from the restraints of the nursery he was a keen fisherman and elever sportsman, dividing his leisure between whipping the mountain streams and tramping the heather-clad moors, wary in the use of the fly and true in his aim with gun and rifte. The ruder accomplishments of the English gentleman did not, however, render him insensible to the reever, render him insensible to the refinement and courtesies of existence, and it has been said that the graceful courtliness displayed by the Marquis of Lorne when a mere boy was most marked, and such as frequently engaged the attention of strangers. In the sumptuous palace of the Sutherlands used to assemble the foremost men in the State, in the church, in literature, in art, in every vocation of life. The young Lord of Lorne was accustomed to meet under his grandmother's roof all who took an active part in the government of the day. William Ewart Gladsbone, Lord John Russell, the Duke of Somerset and the chief among their colleagues, and such representative of the send of the sumptions was born Aug. 6, 1845, and consequently is now in his 34th year. The Princess was born March 18, 1848, and is now in her 31st year. ever, render him insensible to the re- besides the host of celebrities who colleagues, and such representative men as Whewell, the mathematician men as Whewell, the mathematician and erudite Master of Trinity College, Cambridge; Motley, the historian; Dr. Robertson, of Edinburgh; Drs. Guthrie and Norman McLeod; Tennyson, the poet laureate; Richard Owen, the pale ontologist; Arthur Penrhyn Stanley, Charles Kingsley, Panizzi and others learned and great were not without has destroyed about 4,000 lives, drink from a cup or eat from a platter; and while, all unconsciously, they imbibed the pure water of Liberalism, from the very fountain source, they settlement and detached plantations, inestimable value of learning. Until twelve years ago the young Lord pursued his studies at home under the tutorship of a Suabian pastor, Schmidt able would reduce it considerably. It by name, who instructed him in the Latin and Greek verbs and the ancient classics. Neither his father nor mother of the country where there is only one had much respect for public schools. but after much earnest thought and so scattered, and from a disease which but had a furnished house of their own. small part of it, though the most ar presided over by a Mr. Lampney, who had been private Secretary to Lord died have been prostrated by the dis-John Russell, and was a graduate of Trinity College, Dublin. Prime Minis- which have fellowed in its train have ter Gladstone always looked in upon the boys when in their neighborhood, and from him they naturally received many hints which were of use aftermal which were on the work of the

CATS. What is this ? 'This is a cat. Do you see the bear tiful curve to his back? If you continue to be a good boy you shall day have a thousand cats.

Breeding from unsound stock, especially horses, is a serious, yet common mistake of farmers. No rule is better 'Are cats a useful animal?'
'Yes, very. If it wasn't for the cat established, than hereditary transmission of qualities; and this does not mean that actual disease is community by the commun

mean that actual disease is communicated, but merely that such peculiarities of constitution, or form, are handed down from generation to generation as renders the offspring extremely liable to the same disease as their parents, whenever they are exposed to

as renders the offspring extremely liable to the same disease as their parents, whenever they are exposed to suitable exciting causes. No one would, of course, believe in the transmission of a deformity from an accident, as a broken limb, or a dislocated joint. But in considering the purchase of a breed-to ing mare, or the use of a certain stallion be careful of what is admitted into the list of accidents; do not be imposed upon by the assertion that this spavin, ringbone, curb, heaves, or roaring, occurred from a wrench, strain, or fall, violent or sudden over-exertion, for which the animal is not to be blamed. Trust invariably to the mare, or stallion that goes through her or his work, at all ages, sound, and turns up sound at the last. Such can speak for themselves, and need no apologies for this or that zilment. Some diseases are so is trivial, that they need not to be taken into account; but many others are so serious that they should never be overlooked. Broken wind, ringbone, navicular disease, curb, spavin, and scrofulous diseases of the joints (found especially in cattle), periodic ephthalmia, catarties and the same disease as the rivish, periodic ephthalmia, catarties.

What food do cats prefer?
