

# NEW CONCENTRATING MACHINERY

**FOR A COMPLETE PLANT, HAVING A CAPACITY OF 50 TO 75 TONS.**

We have at Mattawa, Canada, in warehouse, for immediate delivery, the following: New Blake Crusher, Cornish Rollers, and Concentrating Machinery, to form a very complete concentrating plant for low grades of Argentiferous Galena, Copper, or any kind of concentrating ore, and has a capacity of 50 to 75 tons in 24 hours. The machinery is extra heavy and of best material. Will furnish parties purchasing this plant working plans, &c. A 35 to 40 horse power engine will be sufficient as motor.

This machinery includes the following:

- One 9 x 15-inch Blake Crusher complete.
- Two sets 22 x 14-inch Cornish Crushing Rolls, all complete.
- Two Revolving Screens, 4 sections each, all complete.
- One Classifier all complete.
- Four Double Jig Machines, 8 sieves each, all complete.
- One Rotary Table (iron parts only) all complete.
- Two Elevators 12 inches wide, all complete.
- All Shafting, Pulleys, Couplings, Bearings and Collars, with all necessary Belting for above machinery, as per plans.

This invoice of machinery is all new, and has never been erected, and was ordered as a duplicate of a similar plant we furnished and erected for a company who operated very successfully in Northern Canada, but on account of the scarcity of ore, do not now require the duplicate plant, and we can offer it to any one requiring a first-class concentrating plant of this capacity at a great bargain. We can also furnish a competent man to erect and operate same if desired.

## H. WARD LEONARD & CO.

We will do no manufacturing and will do no supply business; neither will we under any circumstances act as the selling agents of any concern directly or indirectly.

We will, however, act for the purchaser either as Consulting Engineers, Supervising Engineers, Inspectors or Purchasing Agents. When acting in this way we will make the following charges based upon contract prices:

For making preliminary plans, designs, distributions and estimates, 1 per cent.

For making final plans and specifications, 1 per cent.

For drawing and executing contract on behalf of the purchaser, 1 per cent.

For supervising an installation made by another contractor, 3 per cent.

For acting on behalf of the purchaser in making the settlement with another contractor, 1 per cent.

For acting as the agent of the purchaser, from the beginning to the final settlement of the contract, including the making of estimate plans, determinations, specifications, contract, supervising the installation, final inspection, and report and final settlement, 5 per cent.

It will be seen from the complete schedule given above that the purchaser will be able to obtain our services for any portion of the work, and under terms which are so reasonable that there can be no question, in the minds of those familiar with the subject, that any purchaser contemplating the installation of an electric plant would not only save a great deal of his own time and be spared a great deal of annoyance, but would actually effect a very material saving in retaining our services to represent the interest of the purchaser.
