cutive months. I need hardly olserve that I sought the aristance of the medical profession, is represented by some score of gentlemen who are supposed to be experts in the art. of healing, and this, without any other effect than the depletion of my pochet. For upwards of twelve years, Ihad to suffer from the consequences of my fall. About a twelve-month ago, a friend of mine at Ospringe provided me with some of Mr. Masun's Mritish Magnetic Appliances, and I had not worn them more than half an hour, before I fclt a gentle tingling in my legs, like a mild shock from a battery. After the lapse of three weeks, I was sufficiently restored to lee able to walk, and before the end of April, I was following the plough. Since that time I have often been ploughing trom 5:30 a. m. to $70^{\prime}$ 'clock, p. m., and I trace my recovery solely to the instrumentality of skilfully applied magnetism.

Villiam McCutcheon.
It is a fact which ought to be instructive, that not one of the twenty gentlemen who relieved Mr. McCutcheon of his dollars, as he lay a helpless paralytic, found it convenient to enquire by what means the change was accomplished, which resulted in his being steadily at plough from o:30 a. m. to 7 o'clock, p. m.

The Honorary Registrar-General Degs leave to submit to the Honorable Members of the Legislative Assembly, the fact that there is it leastone M. D.in'Toronto, who isconversant with cases of cure of hydrophobia. A vapor-bath, as hot as the sufferer can bear it, every few hours, is one of the principal means employed.

The same physician, in a practice extending over twenty-five years, has not lost a patient from croup.

## PILLS FOR "THE PROFESSION."

The accepting that bribe of $\$ 600$, on the part of the Medical Council, in consideration of granting a license to practise, at the cost of their neighbors' lives, is the more reprehensible when viewed in the light of the fact that the power to grant licenses and degrees was extended to the Council, in consequence of needy Colleges having proved unable to resist the temptation of a bribe. Whether the Legislative Assembly will plead "inebriety" for having indiscreetly extended such a power to the Council, as the Council did, for ganting the license, is among the problems of the future.
"Practice" which may be termed sharp.-A medical practitioner of this city had been attending a patient, and the lady, on the score of economy, called on the doctor, on almost every occasion of seeking his aid; the doctor's bill, on a liberai calculation, could not have exceeded $\$ 26$; before it was sent in, he ordered goods from the lady's husband, which amounted to upwards of $\$ 50$, and remarkably enough, when his own bill came in, it corresponded with that of the merchant, within a few cents.

When the Legislative Assembly awakes to a becoming sense of it i responsibility, in regard to the public health and life, we are of opinion that a heavy penalty should be inflicted on any doctor or $n u:$ :je, who may approach a patient, when in any degree the worse - for liquor.
