

The Only Successful Kiln for Drying Oak and other Hardwoods

"THE ANDREWS"

NEW LUMBER

DRY-KILN

Its remarkable efficiency depends upon its peculiar mode of applying heat to, and eliminating moisture from, the air used in drying. We use no costly fan, engine or other device that requires constant attention, nor do we waste heat by a special chimney. The air circulates through the lumber, and the moisture absorbed from it is extracted from the air by natural methods. You can not afford to be without it.

Our Process Duplicates Nature.

Outside View of the Andrews Kiln.
