PLAYS, PICTURES AND MUSIC

"A KING OF NOWHERE."

Lou Tellegen begins his first appearance here tonight in "A King of Nowhere." This brilliant young actor is well known for his work on the screen, but up to this time has not been seen here in a spoken drama.

In his present starring vehicle he is fitted with a part that shows him at his best. He is pre-eminently a romantic character, and in fact, the only star we have today who is suited to the role of a hero in a costume play. A splendid cast supports Lou Tellegen, and the play will be seen at the Alexandra Theatre this week, with the usual matinees.

"WHEN DREAMS COME TRUE."

"When Dreams Come True," which will be seen at the Grand Opera House this week, is the first presentation here at popular prices, is heralded as a dainty musical comedy of youth. Philip Bartholomew, who is responsible for the book and lyrics, is the apostle of youth on the American stage, and his success has confirmed him in the belief that he is wise. In this he has found many who agree with him, because the characteristics of youth are pleasing. The music is by Silvio Hein, and is melodious and pleasing. Among the many hits that should linger in the memory are "Dear Betsy," "When Dreams Come True," "Love is Such a Funny Little Feeling," "The Town that Grows Where the Hudson Flows" and many others. The company is perfect in every particular, while there is no particular star to feature. The scenery is adequate in every way and the costuming exquisite.

LOEW'S.

George Kinead Davis and his celebrated Kinead Kites will be the feature attraction at Loew's this week. This is the biggest and best act of its kind ever presented in vaudeville. Another big attraction will be Charles B. Lawlor and his daughters, presenting their character singing revue, "The Albright and Mack," one of the brightest and best singing and comedy teams in vaudeville, show unusual ability as funmakers. The Bell Theaters Brothers, acrobats and jugglers, furnishing new thrills, Marshall and Gordon, musical funmakers, and Dan and Virden in musical comedy hits, together with a five-act photo production, featuring Virginia Pearson, in "A Tortured Heart," complete the bill. The Winter Garden is now open every evening.

SHEA'S.

Headlining the bill at Shea's this week will be Houdini, acknowledged to be the world's greatest self-liberator. Houdini is the man who has fooled the police of two continents for the past decade. At Lamont and his cowboys will present their round of mirth and melody. Eva Taylor and

Hon. E. L. Patenaude Says All Blush With Shame Over His Writings.

PRaises THE SOLDIERS

Minister Says French-Canadian Troops Prove Themselves Worthy of Canada.

Special to The Toronto World.

Beauharnois, Que., Oct. 15.—Hon. E. L. Patenaude delivered one of his best speeches here today, taking as his text the following extract from Henri Bourassa's pamphlet: "Yesterday, Today and Tomorrow." "Hate in Canada we are forging around our necks a mill of war without parallel in any civilized country, a depraved and undisciplined soldiery, an armed roidism without faith or law."

The minister said that they all blushed with shame that such disgraceful and insulting epithets should be applied to Canadian brave army of almost 400,000 men, who are giving up their lives for the liberty of the world and the protection of the nation. The speaker could not believe that any very considerable section of Canada would hold the French-Canadians responsible for the ravages of such a school, whose one object is to sow discord and hate among the people of Canada. As for himself he had other occupations than that of throwing mud at his opponents, but he called upon the people of Quebec to do justice to those who would bring this province to the level of their own degradation.

Mr. Patenaude said when the 400,000 men return to our shores covered with glory, they will take the first place among the people, while the man who penned the lines just quoted will take the last and most humiliating, and that Mr. Patenaude declared, is what he merits.

Such a description of our great volunteer army must not be allowed to go unchallenged. In asking his fellow-countrymen to help the cause of empire, either in men or money, the minister said the French-Canadians would prove themselves worthy of the past, and also worthy of the place that had protected them. What, he asked, would be happened if German ships escaped from the British fleet, or if a submarine like the one that sank six ships of Boston, should come up the St. Lawrence, and he wanted to know where these same people would be who used to say that they would fight if the enemy attacked our coasts.

"If, however, you persist in declaring, 'In doing nothing, then you will require all you have to protect yourselves from the chills of your isolation.'"

In conclusion, Hon. Mr. Patenaude asked why the maple tints along the shores of the St. Lawrence blend in such beautiful harmony with them, cannot the two elements live together in a like accord?

THE NEW ELECTRIC RANGE.

Almost Twice as Efficient as Those of a Few Years Ago.

With the steady decrease in the cost of electric current there becomes apparent a corresponding increase in the popularity of electric cooking. Many hotels and restaurants have adopted the all-electric kitchen with most satisfactory results. Numerous private homes are also equipped with electric ranges, while in some of the more modern apartment houses electric kitchen ware has been installed as part of the equipment of each apartment.

The secret of the modern electric range is in the efficient material used for heat insulation. For years formerly man have been hard at work experimenting with heat and its insulation. It is a well-known fact that the common cook stove wastes heat. Heat radiates away from the iron stove as easily as water flows through a sieve. Only about ten per cent of the heat energy of a coal range is used in cooking. The other ninety per cent radiates out into the room or goes up the chimney. The first electric ranges also wasted a great deal of heat, because the designing engineers knew so little about insulating and the saving of heat produced by the electric current. The new electric cooking ranges shown by the Toronto Hydro Shop are almost twice as efficient as those of a few years ago.

Electric cooking is most satisfactory
