

1880-81 also be offered for the competition of students who have completed their third Winter Session in this school.

—The amounts of the several scholarships will be given in money to the successful competitors as soon as they have been awarded.

PROSECTORS AND ASSISTANT DEMONSTRATORS OF ANATOMY.—  
There will be appointed annually two students as Prosectors, who will have the great advantage of preparing the material required for the Lectures on Anatomy.—Also two Assistant Demonstrators, to aid the Demonstrator in such ways as may be required.

## HOSPITALS.

---

### THE TORONTO GENERAL HOSPITAL.

This Institution, which is under the best and ablest management, is now greatly enlarged, so as to be capable of accommodating 300 to 400 patients in the various buildings on the grounds, and is visited daily by the medical officers in attendance. The patients—extern and intern—are examined and prescribed for in presence of the students. The operating theatre is large and well lighted, having been recently greatly improved, and the seats are so arranged so as to enable the students to see fully the successive steps of the numerous operations performed in it. The theatre is also, through the courtesy of the Trustees, used daily as a lecture-room for the delivery of Clinical Lectures. Under existing arrangements, the Clinical Course, both in Medicine and Surgery, is very full; and all the numerous Lectures delivered in the Hospital by the various members of the Hospital Staff, are open to every student who has taken out his Hospital and Clinical Lecture tickets. Toronto being the great railway and manufacturing centre of Ontario, accidents requiring operation are of frequent occurrence. The attendance of out-door patients daily, is also very large, and thus abundant opportunities are enjoyed by students, for acquiring a familiar knowledge of Practical Medicine and Surgery, including not merely major operations, but minor Surgery of every kind—ordinary Medical Practice; the treatment of Venereal Diseases, and the Diseases of Women and Children. A large building has been erected during the past season, in the Hospital grounds, as a Fever Hospital, where the treatment of all Fevers can be practically and profitably seen and studied. A building for the Eye and Ear Hospital is now finished and in use on the same grounds which will give unprecedented advantages to students who wish to make a special study of the diseases of those important organs.

### CLINICAL TEACHING.

This being of the utmost importance, no pains will be spared in imparting daily instruction in the spacious wards and theatre of the General Hospital, and every opportunity will be given students of seeing for themselves, with the members of the Hospital Staff, all interesting cases—Medical and Surgical.
