FOOD HOARDING BY INDIVIDUALS TO BE STOPPED

Enforced Conservation in U.S.
Restaurants Also Planned

Saving to Feed Allies—Surplus for
Export Only Possible by Rigid
Economy of Foodstuffs

Washington, Jan. 15.—Enforced food conservation in restaurants, and extension of anti-hoarding regulations to include the plans of the Food Administration for creating a larger export surplus of food for the Allies.

This was revealed in a statement by Food Administrator Hoover, setting forth that the Allies are in need of an additional 75,000,000 to 80,000,000 bushels of wheat, and that they have asked America to double meat exports. Only by further saving, Mr. Hoover declared, can the food be shipped.

There is no need for rationing in America in Mr. Hoover's opinion, and with the supplementary regulations there will be no shortages.

It is true that the Allies need from 75,000,000 to 80,000,000 bushels more American wheat, says the statement. "It is also true that we have already exported the theoretical surplus of last harvest over our normal consumption. The American people have saved a considerable amount, estimated from 25,000,000 to 50,000,000 bushels, during the past five months and we are exporting this saving."

We cannot and will not expect more than our savings, for our own people must also be fed. The Allies have reduced the bread ration to their people sharply in the last few days, and if this lowered ration is to be maintained, we must save more than hitherto.

We are asking the American people

Hopes Women Will Adopt This Habit As Well As Men

Glass of hot water each morning helps us look and feel clean, sweet, fresh.

Happy, bright, alert—vigorous and vivacious—a good clear skin; a natural, rosy complexion and freedom from wrinkles, "run-downs," "brain fags" and pessimism should be a virtue, optimistic throng of rosy-checked people everywhere.

An inside bath is had by drinking, each morning before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour fermentations and poisons, thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

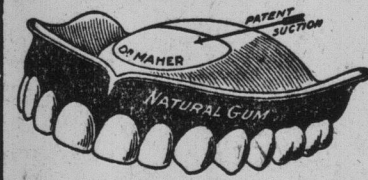

Those subject to sick headache, biliousness, rusty breath, rheumatism, colds; and particularly those who have a pallid, sallow complexion and who are constipated very often, are urged to obtain a quarter pound of limestone phosphate at the drug store, which will cost but a trifle but is sufficient to demonstrate the quick and remarkable change in both health and appearance awaiting those who practice internal sanitation. We must remember that inside cleanliness is more important than outside, because the skin does not absorb impurities to contaminate the blood, while the pores in the thirty feet of bowels do.

to further reduce their consumption of wheat products and use other foodstuffs instead, for the Allies must also have some wheat as well as ourselves. It is one of the vital issues in winning the war that we must maintain the health and strength and morale of their men, women and children over this winter.

"Our forty-eight State Food Administrators have been in session in Washington the last few days, devising with us a programme of saving which we will announce in a few days in which we count with confidence on public support."

"The Allies are also asking us if we can double our meat and pork produce exports, as they must in England, France and Italy further reduce their meat and

fat ration unless we can increase exports. We have replied that we will ask our people to save more, for we can only export our savings.

"There need be no fear that our own supplies will not be protected, and if, as a result of misapprehension, anyone should attempt the purchase of foodstuffs for hoarding, it will be robbing the Allies of just that amount, and is a violation of the food law that will be followed up sharply. We have ruled that the holding of more than thirty days' supplies by dealers, manufacturers, wholesalers and retailers constitutes hoarding, and the purchase of more than usual amounts by consumers will likewise be so construed."

RADICAL CHANGE IN THE TRAIN SERVICE

Beginning next Monday the C. P. R. morning train for Boston will be cancelled. The C. P. R. day trains for New Brunswick points will be extensively reduced through this change which, it is explained, is made necessary by the increased amount of rolling stock constantly devoted to moving Imperial supplies. Moving mails to Charlotte county points will now have to be dispatched by way of the Shore Line, and Fredericton, Woodstock and many important points in Carleton, Victoria and other counties will receive a greatly delayed mail service.

It is thought that the Boston morning

ing train will not be restored before April 1.

C. P. R. agents have been notified of the following changes, the time given being Atlantic standard:

St. John Subdivision.
Effective January 21, 1918:
Train 101, St. John to Vanceboro, cancelled.
Train 102, Vanceboro to St. John, cancelled.

The connections with these trains to and from Boston, over Maine Central and Boston & Maine are also cancelled.

Train 104, now leaving Vanceboro at 7.45 a. m., will be thirty minutes later, arriving at St. John forty minutes later (11.45 a. m. instead of 11.05 a. m.), daily except Sunday.

Fredericton Subdivision.
Train 107, leaving Fredericton Junction 7.15 a. m., cancelled.
Train 111, leaving Fredericton Junction 9.05 a. m., cancelled.

Train 108, leaving Fredericton 8.35 a. m., cancelled.
Train 112, leaving Fredericton 7.55 a. m., cancelled.

Train 109, effective January 21, will be operated from St. John, leaving that point 8.20 a. m. daily except Sunday, arriving Fredericton 11.10 a. m. daily except Sunday.

Train 110, will leave Fredericton 8.10 p. m. daily except Sunday, arriving St. John 7.35 p. m. daily except Sunday.

NOTE—Trains 105 and 110 will run solid between St. John and Fredericton.

New Scottish Bill

A bill to make further provision for education in Scotland was introduced in the British parliament by Mr. Munro, Scottish secretary, and read a first time.

Mr. Munro explained that the measure would raise the school age from 14 to 15, make attendance at continuation classes obligatory on pupils between 15 and 18, who are not in full-time school attendance; restrict employment before

and after school hours, and regulate the employment of children under the age of 15 in factories and mines.

The school unit, Mr. Munro added, would be the county, a provision which would do away with the inequality of wages which now prevailed.
