31	Sat.	4 47	7 24	11 06	11 31	p.m. 31	5 42	Loyola b. 1556.

The Hay Crop of Canada is not only of much pecuniary consequence but it is in other respects of great importance. All farm stock must be kept up for about one hundred and fifty days, and fed with harvested food the bulk of which must be hay. By keeping our stock in stables during the long winter we accumulate a large quantity of manure of the most valuable kinds which goes back upon the tillage, mowing or pasture lands as it is needed thus not only keeping up but increasing the fertility of our soil. There is an old Dutch proverb no hay, no cattle; no cattle, no manure; no manure, no crops.

JULY was originally the fifth month in the calendar. Numa reduced it to thirty days, it was restored to thirty one by Julius Cæsar, and after the death of the great reformer of the Calendar. Anthony changed the name to July, in honor of the family name of Cæsar.
