The Future Of Sealing

Professor David Starr Jordan Returns to the Attack Upon Canadian Sealers.

Industry Would Be a Profitable One If Victorians Were Not in the Business.

David Starr Jordan, president of Stanford University, writes as follows in the Boston Transcript: The future of the fur seal industry at present seems to rest in the hands of the joint high commission of which the late Lord Lansdowne was the head, and Gen. John W. Foster, representative on behalf of the United States for the fur seal interests. This commission met at Quebec in September, 1898, to consider the various questions at issue between the United States and Canada. After several months of discussion it reached a deadlock on the Alaska boundary matter, and has apparently done nothing since. At the time of its activity it was rumored in the press dispatches that a virtual agreement had been reached on the seal question and a number of the minor questions before the commission. In the fur seal matter the settlement foreshadowed pointed to the probability of purchase by the United States of the vested rights of the Canadian sealers, with concurrent action on the part of Great Britain in enforcing the abolition of the pelagic industry. The only detail remaining for adjustment was said to be the purchase price, the appraisers on behalf of Canada fixing the value of the pelagic fleet at half a million dollars, that for the United States holding that its value was not over half this sum, or a quarter of a million.
