## IMPURE MILK

Is the kind most frequently gotten from grocery stores—milk that is old, tainted and poor.

We now have an up-to-date system of treating and delivering milk. We have fresh morning's milk from Jersey cows delivered to us early every morning, and it is at once put into sterilized bottles and into our new test milk cans, where it quickly cools. We can thus deliver ice cold milk which is only a few hours old—and you can always be sure it is sweet, pure and wholesome. A small item, perhaps, but an important one to our customers.

Public opinion, he said, is an ever growing power, and it is the duty of each of us to elevate it to higher levels.

## A MONTH'S RAIN HAS FALLEN THIS MORNING.

Almost as Much Up to Ten o'clock as Fell During August—It Was Greatly Needed.

The long expected rain has at last reached us and its arrival is likely to do immense good throughout the province. Its appearance, however, has not been so welcome in the city and the holiday programmes have been rather disarranged.

At ten o'clock this morning nearly as much rain had fallen as in the whole of last month. The total rainfall for August was two inches and the rainfall this morning had already reached 1 1/2 inches, with a fresh breeze blowing from the southeast. This is an excessively heavy fall.

Although rain commenced falling about midnight nearly the whole of the fall has been since five this morning. At times this morning during short periods rain fell at the rate of over an inch an hour, which is unusually heavy.

The season has been altogether an unusually dry one. Especially in the interior there has been an unbroken period of clear skies except where obscured by the smoke from the forest fires. The total rainfall for August was two inches, just one-third of the fall last year and about one-half of the average for that month. The total for July was 2.9 inches, as against 2 1/2 for the corresponding month last year.

Reports from the province show that this rain is putting out the fire in every direction. Rain was perhaps never so much needed as it has been lately. Splendid lumber lands have disappeared and villages in almost every county have been threatened.

The fires are particularly bad along the North Shore, and especially in Carleton county. At Perth and Bath, the smoke hung dense day and night, and in every direction for fifteen miles fires were in progress. A good many of these fires seem to have been set through carelessness, caused by camping parties, trains and mills and in many cases through the negligence of farmers while clearing their lands.

## SMALL BOYS FIENDISH ACT.

HANBHAL, Mo., Sept. 2.—Charles Christian, 11 years old, son of Lee Christian, was roasted alive in Union street here last night, by another boy named McLean, who dashed a can of gasoline over the clothes of young Christian and then applied a lighted match.

Other boys were playing with several other boys when McLean walked up swinging a gasoline can. He threw it which had been pushed upon Christian and drenched him from head to foot with gasoline. Before the unwary boy could get away he touched a lighted match to his trousers, which were soaked with the gasoline.

Instantly the boy was enveloped in flames. He fell to the ground screaming in agony and fighting the fire. Many persons ran to his rescue and succeeded in extinguishing the flames. Every stitch of clothing was burned from young Christian's back. The boy will die.

## RUSSIA FIETING CHOLERA.

BERLIN, Sept. 2.—Forty-three cases of cholera in all have been reported. Nine persons have died from the disease and many suspicious cases are under observation. The legal and medical machinery for dealing with this invasion of the Asiatic bacillus is now working at full pressure.

Prof. Edward Sonnenburg said tonight that no one need fear an epidemic such as that of 1892-1893, because the health authorities since that time had built up an organization quite adequate to grasp the beginnings of cholera and to put down the disease with precision and firmness.
