B. ARMSTRONG & SON, Codrington, Ont.

Wheat, Manitoba best, 1915.....\$2.25
Barley, Canadian.....1.08
Oats, Canadian (40 pounds per
bushel).....1.10
Rye.....1.50
Corn.....1.37½
Flour, Canadian best, per 280 lbs.10.25
Bran, per ton.....27.50
Rolled oats, Canadian, per 240
pounds.....8.50
Hay (clover), per ton.....30.00
Hay (meadow), per ton.....24.00

Cattle—An average of 25 cents per
pound live weight, \$250 for a good
bullock or steer is frequently realized.
Sheep are 25 cents. Ewes and tups
18 cents. Lambs \$9.00 to \$11.00 each.

The reading of the Canadian grain
and live-stock markets is simplicity
itself. The English markets, on the
other hand, are almost incomprehensible,
as every market appears to have its
own method of buying and selling.
To illustrate this take the grain re-
port of the few following markets:

Barnsley—Wheat a little dearer up
to \$4.75 per load.

Braintree—Market quiet. English
wheat \$12.00.

Birmingham—Manitobas \$14 to
\$14.50 per 496 lbs. at Bristol.

Manchester—\$12.75 per 504 pounds
on rail.

Preston—\$5.75 per windle.

The live-stock trade reports are
likewise confusing, and to tell at a
glance which market is the more profit-
able requires much time to find out.
For instance, at Braintree, cattle made
up to \$202. Leicester, choice compact
bullocks 25 cents. Nottingham, best
beef \$3.50 per stone. Dublin, prime
beef \$23 per hundredweight.

The hog market is almost a trade by
itself. Hogs are sold as: Sizable bacon,
small pigs, sows, young pigs, stores,
pork pigs and eight-week-old pigs (which
make \$7.00). Prices, of course, vary
according to grade. At present hogs
of all descriptions are very high.—H. P.
JAQUES.

Questions and Answers. Miscellaneous.

Ensiling Dry Corn.

1. We are building a small silo
10 feet by 24 feet, but are a little late
in getting it finished for this year.
We have our corn cut and shocked up,
but the fodder was not cut with the
frost. It was nice and green when cut
and was set up before it cured. It
will be about two weeks from the time
the corn was cut until we fill the silo.
Will we have to put water on the fodder?

2. How much water should we put
on it, and what is the best way to put
it on?

3. Which is preferable, a hollow
brick or a wooden silo? L. A. M.

Ans.—1. It is usually advisable to
put a little water on corn that has stood
in shock for some time. A certain
amount of moisture is necessary for the
proper fermentation processes which
take place in the silo. If too dry there
is always danger of corn fire-fanging
and moulding.

2. The amount of water depends
altogether on the dryness of the corn.
Too much moisture tends to make sour
silage. From one-quarter to a half-
inch stream running into the blower
at time of filling is generally considered
sufficient. The rate of filling and the
pressure of water must also be taken
into account. While some sprinkle
water over the corn in the silo, it is
more evenly mixed through the corn if
the stream enters the blower at the
cutting box.

3. Both give good satisfaction. It
is impossible to say which kind is the
better, as both have many good points
and their admirers are fairly evenly
divided. What appeals to one man
may not impress another so favorably.
Consequently, it is advisable for a
person intending to build a silo to visit
farms where the different kinds are
used, and draw conclusions from what is
seen.

"Is Smith a good advertising soli-
citor?"

"Is he? I should say he was. Say,
Smith could talk a brewer into putting
a back-beer ad. in a prohibition paper,
and then talk the paper into accepting
it."

Laid THREE Eggs in 23½ Hours

The Star Performer in the poultry world is a Canadian Hen, owned by a farmer
near St. Lambert, Que. This bird has beaten the former world's record by laying
three eggs in 23½ hours. The owner uses Pratt's Poultry Regulator for all of his
flock. This extraordinary performance was, of course, due to an unnatural condition
and should not be attributed to the use of

Pratt's POULTRY REGULATOR

—the one best egg producer and tonic on the market. Pratt's Poultry Regulator
will make YOUR hens beat their past records, not by freak performances, but by
steady year in, year out laying. It keeps the fowls in vigorous health—tones up
their entire system and prevents disease. Increases fertility and insures sturdy
chicks. You do not experiment when you use "Pratt's." The Pratt Experiment
Station on our 100-acre farm is maintained for the sole purpose of saving YOUR
time and increasing YOUR profits.

Your Money Back If Not Satisfied.

At your Dealer's—12-lb. pail, \$1.25; 25-lb. pail, \$2.50; 100-lb. bag, \$9.00;
also in pkgs. at 25c, 50c and \$1.00.

Write to-day for Pratt's 64-page Book, "Poultry Wrinkles." It's FREE.

Pratt Food Company of Canada, Limited

68 J. Claremont Street, TORONTO.

P-1

Every
owner of
Poultry or
Live Stock
is constantly
fighting against those pesky parasite
pests, lice, mites, fleas and ticks, that
torment his cows, horses, pigs, sheep
and poultry. Zenoleum kills these
pests. Zenoleum is harmless, will not
burn, is not greasy or dirty, and will not
poison. It is the cheapest and most pow-
erful Germicide; it is used at the Dominion
Experimental Farms at Ottawa, at Guelph
and by 50 Agricultural Colleges in Canada
and U.S.A. A \$1.50 tin makes 80 gallons of Disinfectant dip. Write
for Booklet. Ask your dealer or send 25 cents for a tin containing
enough for 5 gallons of dip, carriage prepaid.
Write for Booklet—"How to Cure Sick Livestock."

Zenoleum Kills Lice

ZENNER DISINFECTANT CO., Sandwich St., Windsor, Ont.

PEERLESS POULTRY FENCE

A Real Fence—Not Netting

Strongly made and closely spaced—making it a complete
barrier against large animals as well as small poultry. Top
and bottom wires No. 9—intermediate No. 12 wire—made
by the Olsen Hearth process which time and other tests have
proven to be the best. Send for catalog. Ask about our farm and ornamental
fencing. Agents nearly everywhere. Agents wanted in unassigned territory.
