

PAGE.	PAGE.		
Steel, medium, character of.....	698	Study, continuance of after graduation.....	511, 826
Steel, nickel.....	260	Study, course of for recent graduates.....	826
Steel, open hearth, specifications for.....	681	Study, methods of.....	8, 9, 179
Steel, open hearth, superiority of.....	680	Study, time for.....	98
Steel piers, method of construction.....	904	Study, where students should.....	158, 160
Steel, present mode of manufacture.....	777	Styles of bridges.....	371, 389, 436, 448
Steel, process of manufacture.....	666, 675	Sub-grade, finish embankment to.....	59
	683, 701, 710, 774, 777	Subjects for engineering course.....	939
Steel, reliability of.....	777	Sub-letting railroad work.....	50, 888
Steel, shapes of.....	778	Subordinate positions, for sake of experience.....	823
Steel, single grade desired.....	701	Sub-punching and reaming of metal work.....	594, 661, 675, 684, 687, 702, 704, 716, 776
Steel skeleton buildings for the City of Mexico advantages of.....	808, 809	Subways, field for.....	590
Steel, soft, advantages of.....	699	Sulphur, elimination of.....	680
Steel, soft, reasons for its use.....	699	Super-elevation of chords.....	751
Steel, soft, shock resisting qualities of.....	698	Super-elevation of track on girders.....	610
Steel, specifications for.....	363, 368, 577	Supplies, stores of.....	50
	581, 650, 653, 676, 679	Supporting power of Mexican soil.....	806
	682, 689, 692, 700, 776	Surveying instruments.....	56
Steel strength of medium.....	500	Surveys, exploratory.....	30, 31
Steel, strength of soft.....	500	Surveys, preliminary.....	31
Stiff bottom chords, reason for use of.....	440	Suspended floor beams.....	431
Stiffeners, proportioning of end.....	289	Suspending floors for lift-bridges.....	561, 564
Stone drains.....	22	Suspension bridge, cable stiffened.....	8
Stone for concrete.....	777	Suspension bridge over Kansas River.....	8
Strait of Canso Bridge.....	7	Suspension bridges, highway.....	227
Strength of elevated railroads.....	618, 619		228, 229
	620, 624, 626, 628	Suspension cables, attachment of.....	922, 924
Stresses, calculations of.....	379	Swamps, railroads crossing.....	45
Stresses, combined.....	286	Swamps, situation of.....	17
Stresses, data regarding.....	36	Swinging bridges, cost of.....	528
Stresses, eccentric on groups of evils.....	292	Swinging bridges, objections to.....	527
Stresses for railway bridges, safe working.....	491	Systematization, instruction in.....	937
Stresses in trusses, calculation of.....	464	Systematization, the study of.....	832
Stresses, intensities of working.....	264	System in work, value of, in professional life.....	518
Stresses, labor of calculation of.....	264	System, teaching of.....	163, 175
Stresses, maximum.....	264, 265		
Stresses, methods of computation of.....	457	<b>T</b>	
Stresses, secondary, in Second Avenue Elevated Railroad.....	734	Take-off drains, the laying out of.....	16, 17
Stringers, calculation of stresses in.....	432	Take-off drains, value of.....	16
Stringers, connection to floor beams.....	340, 357, 394	Teachers, amount of work of.....	161
	452	Teachers, character of.....	144
Stringers, distance between.....	279, 391, 452	Teachers, experience of.....	161
Stringers, safety.....	452	Teachers, professional standing of.....	141, 144
Stringers, spacing of.....	437	Teachers, qualifications for.....	134
Structures, ownership of partially completed.....	887	Teachers' work, importance of.....	507
Structures, the study of.....	835	Teaching, desirable amount of experience in.....	791
Students, age of.....	121	Teaching force, lack of.....	139
Student's choice of profession, advises regarding.....	862	Teaching, for experience.....	790
Students, development of.....	844	Teaching, methods of.....	131, 146
Students, failure of.....	95		
Students, Japanese.....	143, 148		
Students, relation of to faculty.....	843		
Studies for elevated railroad structures.....	615		
Studies, number, at one time.....	98
