

## PUBLISHER'S DESK

## Absorbine for Wire Cuts

Mr. O. Herriot, Galt, Ontario, writes under date of July 15, 1906: "I used your Absorbine on a barbed-wire cut which left a lump on the fetlock, with very good success on my three-year-old, which people said would always show, but it has all gone." Absorbine is a prompt and effective remedy in removing blemishes from horses and cattle. It does not blister or remove the hair, and horse can be used during treatment. Manufactured by W. F. Young, P.D.F., Monmouth, St. Springfield, Mass. Your druggist can supply you or send \$2.00 to Lyman, Sons & Co., Canadian Agents, 280 St. Paul St., Montreal, P.Q., for a bottle, express prepaid.

## Do You Want Clothing?

It is not every day that a company is prepared to go to the extent that the Mail-Fit Clothing Company of Montreal are doing in order to get new business in districts where they have not an agent. A perusal of their advertisement on page 871 of this paper will give full particulars of their scheme. Premiums, as generally known, are often of no use to half the people who get them, but what man can say that an extra pair of pants and a suit-case will not be acceptable. Some time ago the company engaged a well-known newspaper man to take charge of their publicity department, Mr. William B. Naylor, who for some time was manager of the "Montreal Sunday Sun." This scheme was placed before the company by him, and they gave him full permission to enter into the movement, and so far, the results have proved more than good. Orders quickly follow the sending out of patterns. Their great open and shut offer of "no fit no return" commend itself to all. The company have testimonials from every part of this great Dominion, from Victoria to Newfoundland, all telling in plain language the truth—Satisfaction. Readers of this paper can well leave themselves in the hands of the Mail-Fit Clothing Company, and send for patterns, when in want of clothing.

## Father Took Son's Whipping

The boy had misbehaved, as he often did, and his father called him to account.

"Son," said the father, "I hate to lick you, but some one must get a whipping for what you've done."

The boy whimpered a little. "Suppose," said the father, "that I take the whipping for you."

The boy laughed at the idea, but the father took down a dog whip, called a friend who was visiting at the house, explained the situation to him and then requested the visitor to use the whip on him.

The father wore a long-tailed coat and the visitor hit the tails of that coat in great style.

At the first crack of that whip the boy was wild-eyed. At the second he was clawing, biting and kicking the man with the whip.

"Don't whip me! Papa! Don't whip me!" he cried. "Whip me! Oh, whip me!"

That was a year ago. Since then that boy has never done anything seriously wrong.

# ONE LEVER DOES IT ALL ON THE I. H. C.

You would rather operate one lever than get mixed up with three or four. The I. H. C. Spreader has but one lever—the only spreader of that kind.

This is just one point of superiority over other spreaders. There are others.

No other spreader has a vibrating rake to level the load and bring the manure up square to the cylinder. Everybody knows a spreader works better and gives a more even distribution when the load is level.

Great power is required when a spreader is in operation to run its cylinder, move its apron, level the load, etc. The I. H. C. Spreader gets single power from both the rear wheels of the wagon.

It not only gets more power but it is surer of its power at any moment. It makes no skips, and it avoids friction, side strains, and consequent breakage.

This same thing helps to secure the light draft for which I. H. C. Spreader are noted.

Call on the International local agent or write nearest branch house for catalog.

CANADIAN BRANCHES: Calgary, London, Montreal, Ottawa, Regina, St. John, Toronto, Winnipeg.

Send three-cent stamps for a copy of "Farm Science." Book just from the press, written by eight leading agricultural authorities of the United States. Treats practically every farm topic in the most forceful, money-making way.

**International Harvester Company of America, Chicago, U. S. A.**

(INCORPORATED)

Its steel wheels have a superb strength. Broad tires, they do not rut the land or cut in to make heavy pulling. The turned-in flange keeps out the dirt and mud.

Rear wheels are provided with traction lugs. There's no slipping or sliding on wet or frozen ground.

It has a wide range of foad. You spread as thick or as thin as you like.

You see everything has been thought of and worked out to make the I. H. C. the leader of all spreaders.

You have choice of two types—Clover-leaf, endless apron spreader and the Corn King, with return apron. Each type is made in three sizes.

If you buy an I. H. C. manure spreader you know it is right.

## TELEPHONES

WE make a specialty of high grade telephones for Rural Telephone Lines and can supply you with everything needed to build telephone lines.

If you are interested write us for our prices and instructions for organizing companies and constructing the lines.
