McCormick Drills

STRENGTH, simplicity, and good planting—three features that every farmer wants in a drill—make **McCormick** drills the choice of Eastern Canadian farmers who know them best.

Strength—The main frame is made exceptionally strong because it takes the strain of holding the moving parts in their places. The wheels are strong. The one-piece continuous steel axle is strong and is held to the main frame by four wide, strong bearings, securely riveted in place. Strength is in evidence everywhere.

Simplicity—From the grain box to the boot the whole course of the seed is through the simplest kind of mechanism. The double-run feed carries out the grain in uniform quantities without cracking or breaking kernels. Large seeds, such as beans, peas, corn, etc., and small ones like wheat, rye and flax, are planted with equal uniformity.

Good Planting—The seed is dropped at the bottom of the furrow, just where the marker is deepest. It is planted uniformly, at even and correct depth, in the desired quantity.

Buy **McCormick** drills—disk or hoe—for your planting this spring. See the **McCormick** local agent. If you had rather write we will send you full information.

Papec Pneumatic Ensilage Cutters

"The Wonderful Papec"

Elevate silage to any height at 600 to 800 R. P. M. with one fifth less power than any other blower cutter. This is due to the fact that the Papec first uses centrifugal force, then with its six fans moving the cut silage in a steady stream—out in bunches—the elevating is accomplished under high pressure through a small pipe. Iron and semi-steel construction; easy to operate. Built in sizes for any power from 4 H. P. up. Investigate the Papec now—and save time, annoyance and money at cutting time. Write today for our new illustrated catalog. It is **FREE**.

NAME _____
ADDRESS _____

Lincoln's Home Springfield, Ill.

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Co. with the skill, intelligence and honesty associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

ARMCO IRON Resists Rust

Better than the Iron Roof on Lincoln's House Did

The iron roof on Lincoln's Springfield home, after nearly seventy years, is still good, because the iron in it is almost pure. Impurities make iron rust.

The American Ingot Iron in Armco Roofing is purer than the iron in Lincoln's roof. Under like conditions an Armco roof would outlast that old-fashioned roof.

Besides rust-resistance due to purity, quality of galvanizing recommends Armco Roofing. Armco Iron, because of purity, dissolves very slightly in zinc galvanizing; therefore the zinc coating is purer and will last many times longer than the galvanizing on ordinary metals.

How to Get Armco Iron—Armco Iron, which has been and still is widely known as American Ingot Iron, is sold through Distributors of Sheet Metal, and is used for making sheet metal products by many manufacturers. You can buy Armco Iron products from hardware dealers, tinners and sheet metal workers. If you have any difficulty in getting Armco Iron, write to us for names of dealers and manufacturers who use Armco Iron.

Write for Illustrated **FREE** Armco Books

Your dealer should have Armco Roofing, but send for big illustrated Armco Roofing Book. "Iron Roofs that Resist Rust" will save you money. So will the book, "A Journey to Armco Farm"—a mighty interesting story of the use of rust-resisting Armco Iron, in buildings, in Page wire fences, in tanks, silos, water troughs, stoves, furnaces, etc. Read these two books.
